

Construction of an International Smart Supply Chain for the Realization of Connected Industries across Borders

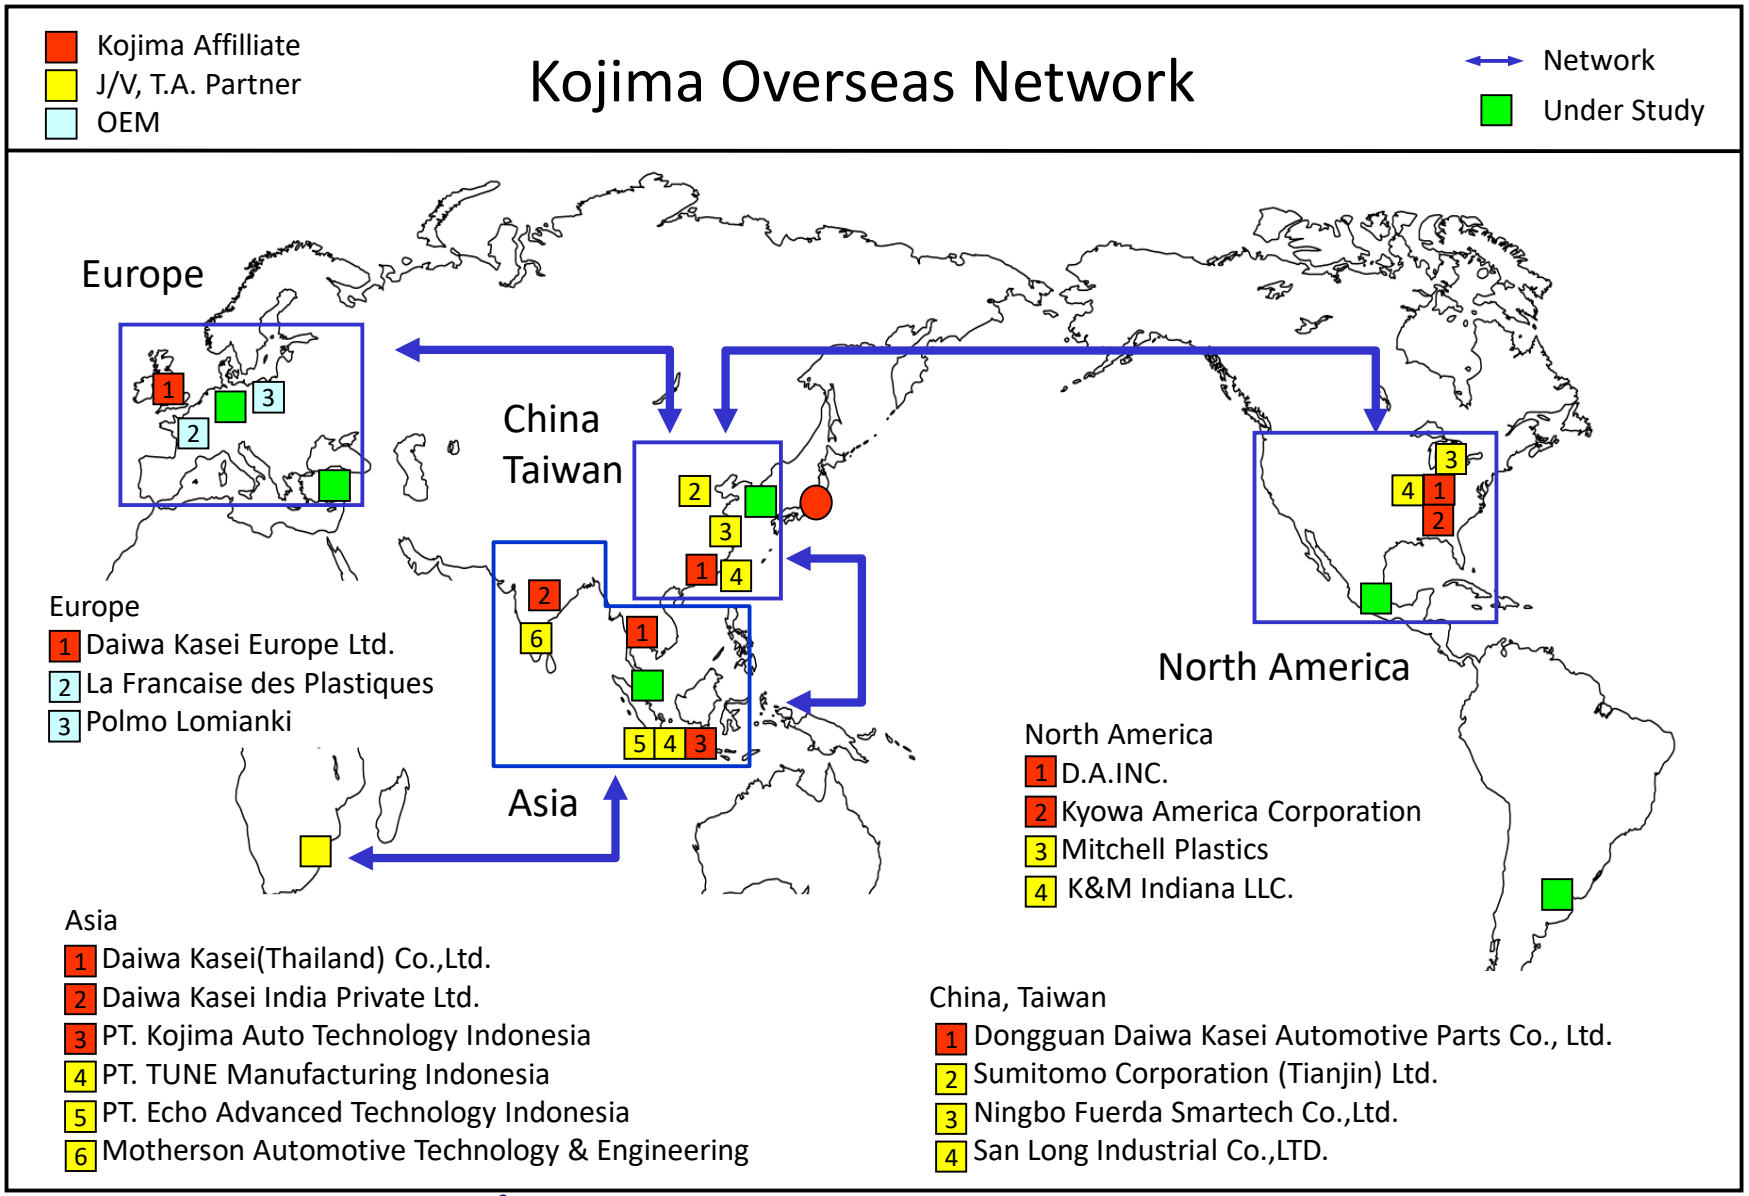

Kojima Industries Corporation
Company policy: Harmony

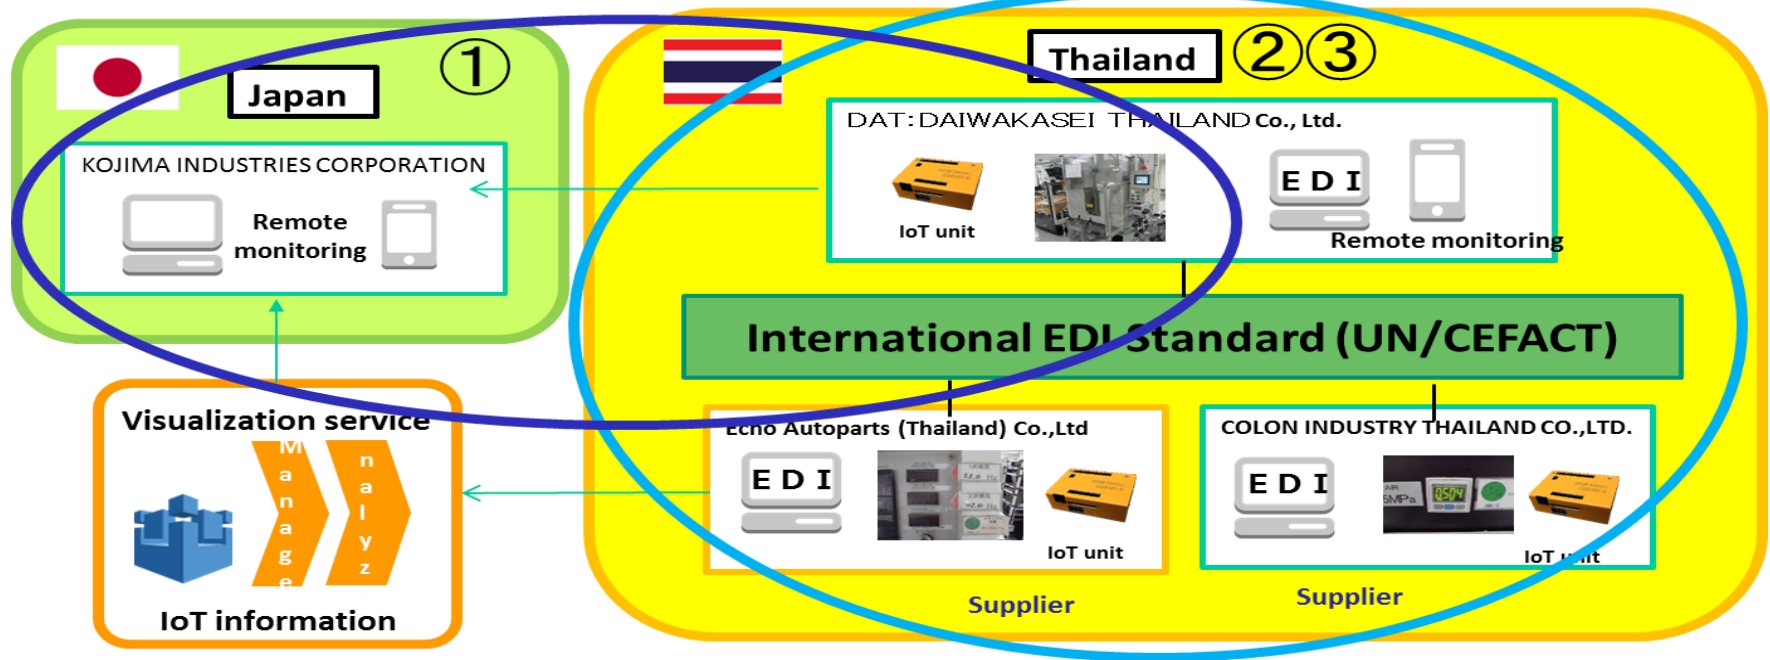

和 是 社

- Address: Toyota City, Aichi Prefecture
- Capital: 450 million yen
- Founded on: May 20, 1938
- Number of employees: 1,703
- Sales: 174.2 billion yen

1. Kojima Group Overseas Subsidiaries

2. Outline of Trial Project

①② IoT collects and visualizes the operation status of manufacturing equipment in a timely manner.

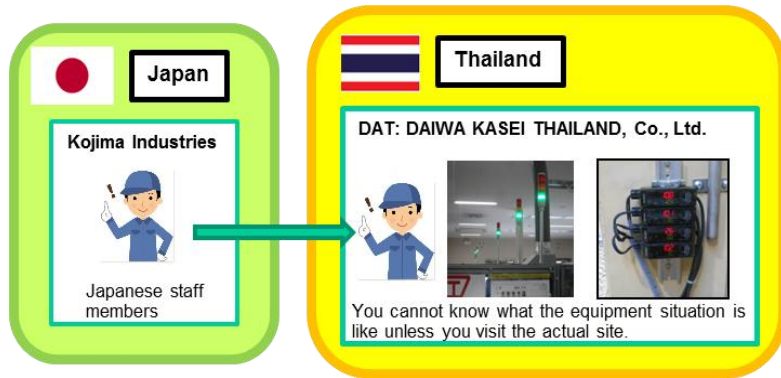

▼ Effectively utilize production resources such as human, equipment, time, and optimize according to the situation.

③ Requirement definition and actual operation of international EDI in Thailand

▼ Standardize and unify the ordering/order receiving operation, and pursue efficiency throughout the supply chain.

(1) Equipment maintenance cost

- Long-term support of Japanese staff

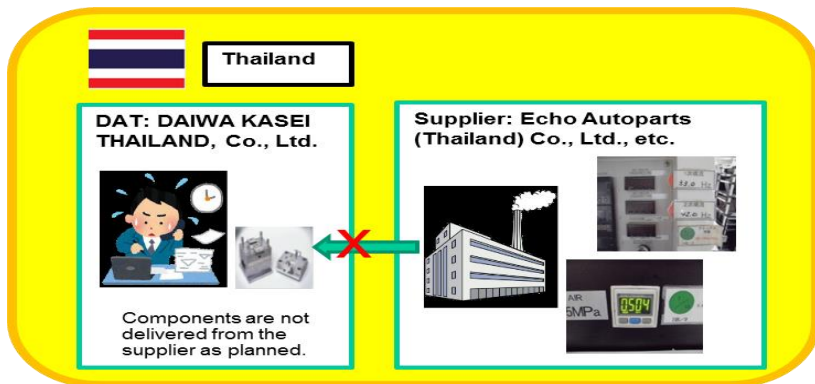

(2) Legacy equipment

- Many old type equipment, unable to link with IoT

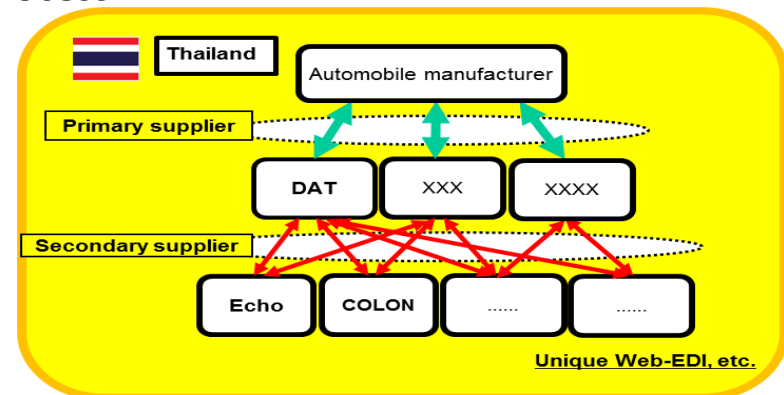

(3) Sharing progress information on production

- Unrecognized of production status of Thai suppliers

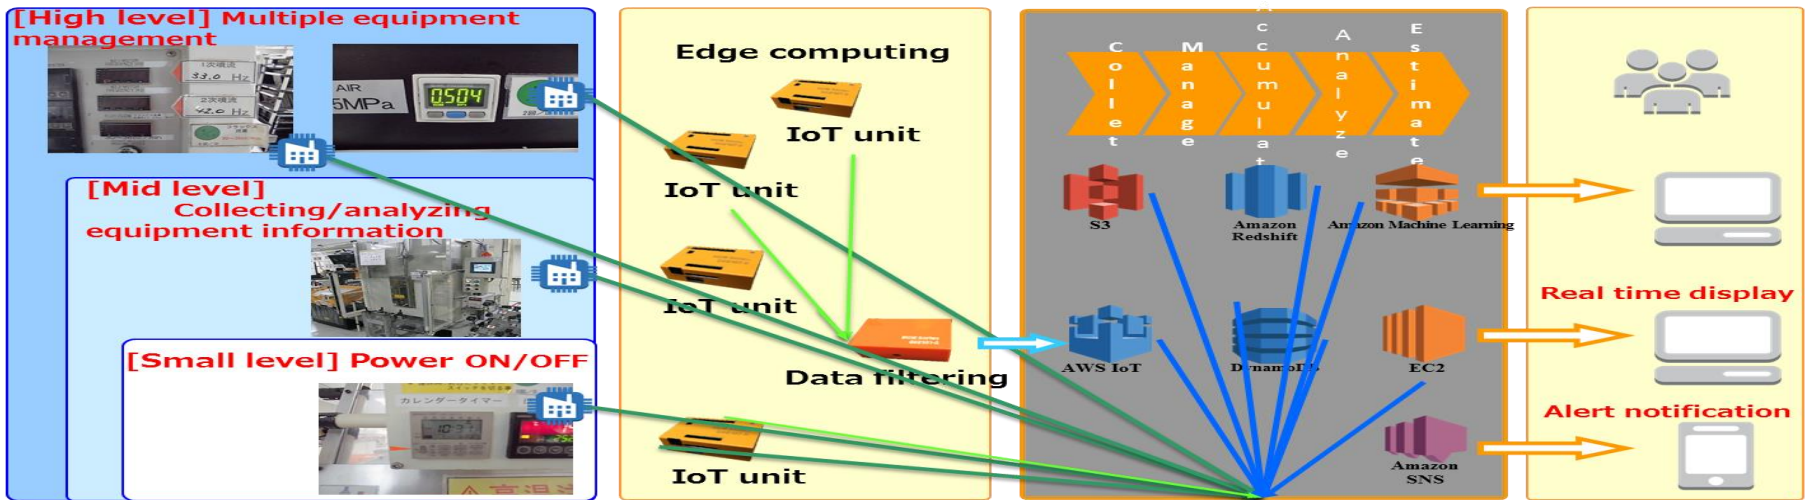

(4) Ordering/Order receiving

- A lot of inefficient ordering/order receiving process

4. Actual Trial Contents (1) ··· IOT Equipment Linkage

(to solve issues ① & ②)

Case 1: Using web camera

● Convert meter number into data.

Case 2: Using IOT unit

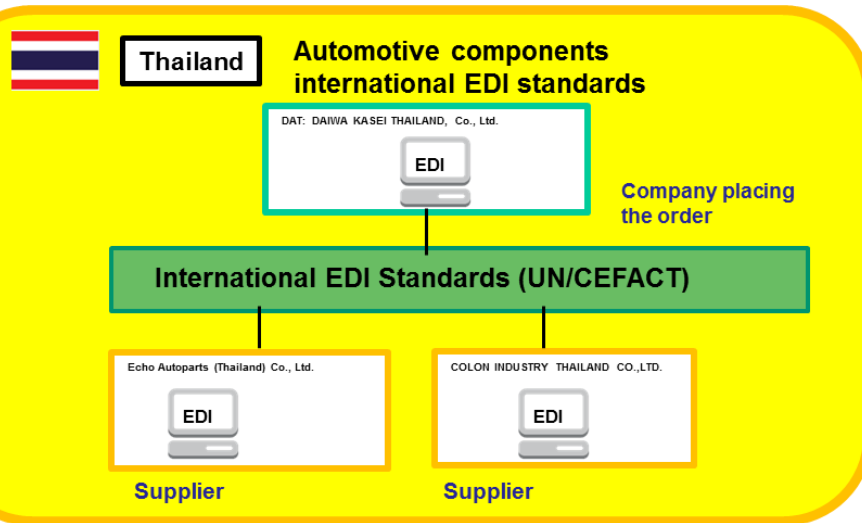

● Develop inexpensive data linking tool.

■ One set can be implemented at 70,000 yen.

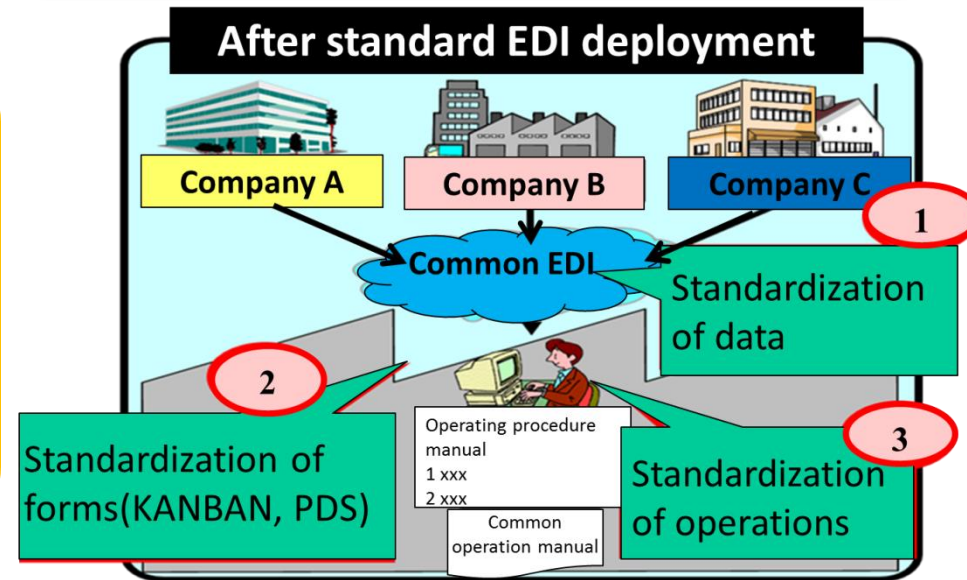

- IOT unit ··· 60,000 yen
- Web camera, Light sensor ··· 10,000 yen

Case 1: Create an EDI system

- Establish WG by 7 companies and define operation.
 - Decide transaction standard in Thailand. (Actual result: held 13 times of meeting)
- Register in the UN/CEFACT and make international standardization.
- Developed EDI system.
 - (3 times of Design Review)

Case 2: Actual trial with EDI

- Under actual trial in prototype version.
 - Buyer (DAT)
 - Seller (11 companies)
 - Currently ongoing
- Retrial after the international EDI development.
 - January, 2019

6. Results from the Actual Trial Application

Actual	Items		Before	After	Benefits	Year round benefits (10 thousand yen)	
IOT Linkage	Benefits	Number of days and times of Japanese staff	728days /Year	210days /year	65% decrease	950	
		Confirmation when problems occur Lead time reduction	24hours /year	1hour /year	97% decrease	7	
		Inexpensive handling with legacy production equipment	5million yen /piece	70,000yen /piece	99% decrease	493	
	Secondary benefits	Improve KPI, KGI skills of local staff					
Internationa EDI	Buyer	Reduction of ordering work hours	332hours /month	142hours /month	58% decrease	180	
		Loss reduction due to mistake in human error	16hours /month	0hours /month	100% decrease	9	
	Seller	Reduction of order receiving work hours	363hours /month (11companies)	122hours /month (11companies)	76% decrease	192	
		Loss reduction due to mistake in human error	55hours /month (11companies)	0hours /month (11companies)	100% decrease	30	
	Both	Shortening education time by standardization	240hours /month (12companies)	48hours /month (12companies)	80% decrease	104	
	Secondary benefits	Both	Unification of operation makes standard work unified				
Total						1,965	

[Main benefits of DAT and 11 suppliers]

Japanese companies expanding in Thailand
(Manufacturing industry)
2,346 companies

Number of supply chains

28,152 companies

*Calculated on the scale of the companies that carry out this trial.

~ Even with 20% widespread deployment ~

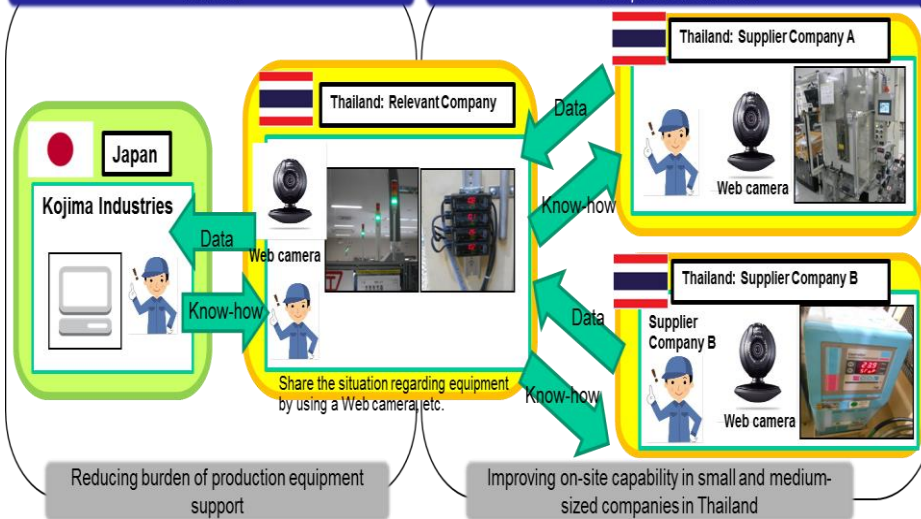

[Effect on economy]
¥ 110.6 billion

7. Future Direction

IOT equipment linkage

(1) Sharing equipment information between Japan and Thailand

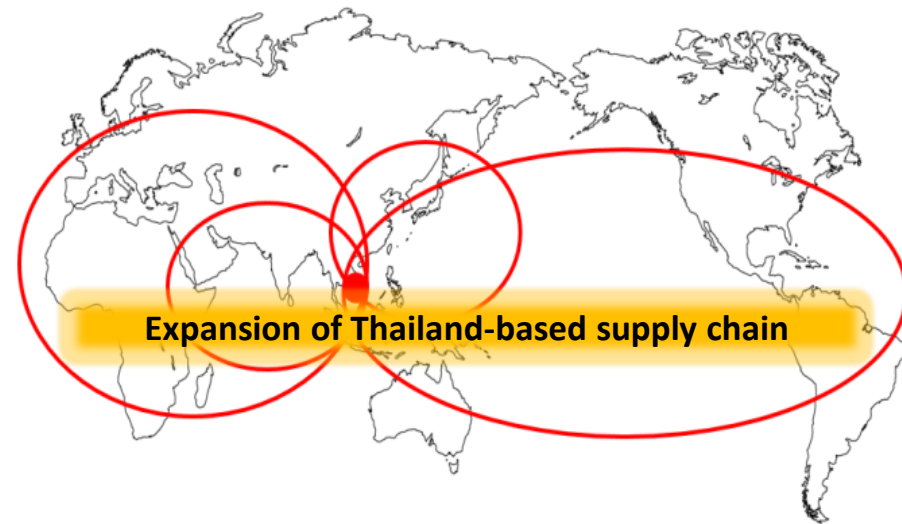

(2) Also making use of IoT in local small and medium-sized companies in Thailand

[Features]

- Data accumulation with an inexpensive system.
- Real monitoring of equipment status with IOT
→ Accumulating monitoring data and analyzing trends with AI will lead to improvement.
- ▼ *Preventive maintenance of equipment and lines*
= Improvement in quality and productivity can be expected.

International EDI construction

[Features]

- Support electronic signature
- Ordering/order receiving with unit price
→ In Japan, since the unit price is given in a separate system, it takes time for information linkage until billing.
- ▼ *Reimportation of international EDI into Japan*
= Simplify management can be expected.
