JETRO

Vietnam - Japan relationship has reached great achievements in terms of FDI. At present, Japan's total investment in Vietnam has ranked second over total investment in the country both in terms of project's quantity and capital. From January to June 2021, the number of new investment projects decreased because of Covid-19 situation, but the investment capital increased 3.5 times on the same period last year, due to the huge projects in the fields of manufacturing and infrastructure. According to a JETRO's survey, about 50% of Japanese enterprises which have been investing in Vietnam answered that they wanted to "expand business activities" in the next 1 to 2 years that make Vietnam top group among ASEAN countries.

However, the difficulties still remain, in which one of the biggest challenge is the low rate of localization in raw materials, supplies and components of Japanese enterprises in Vietnam (37.0%) and Japanese enterprises want to further enhance localization. On the other hand, the ratio is still lower than other neighboring countries such as China, Thailand, and Indonesia. Thus, they are still forced to import the most of the major parts even now.

Therefore, JETRO and VIETRADE as the role of Governmental trade promotion agencies have co-operated to continuously organize "*The 9th Vietnam - Japan Exhibition on Supporting Industries in Hanoi - so called SIE 2021*". The exhibition is offering a place for 20 Japanese exhibitors (as BUYERS) to show parts and components they expect to purchase in Vietnam and 35 Vietnamese exhibitors (as SELLERS) to exhibit their produced accessories and production capabilities to Japanese companies.

SIE 2021 is held under the framework of Vietnam - Japan Economic Partnership Agreement (VJEPA), which was signed by the two Governments in December 2008 and took effect from 1st October 2009. It was also one of the themes of the Vietnam - Japan Joint Initiative.

This year, SIE 2021 is also co-held virtually with "VIETNAM MANUFACTURING EXPO 2021" by Reed Tradex Vietnam Co.,Ltd.

We are sure that the combination of these shows will make great effect for both exhibitors and visitors and being expected to create good business opportunities for all the concerned parties.

Also we expect all exhibitors and visitors to take full advantage of this event for networking.

With 49 regional offices throughout Japan and 76 overseas offices in the world, JETRO's main function is to promote mutual trade and investment between Japan and the rest of the world. In the 21st century, JETRO has shifted toward strengthening foreign direct investment (FDI) into Japan and helping Japanese firms, especially SMEs expand their businesses into overseas markets.

With the aim of contributing to further development of economic relations between Vietnam and Japan and to the achievement of the prosperity in the region, the Representative Office in Hanoi has been conducting and involving in many various activities that brought mutual benefits to entrepreneurs of the two countries since its establishment in 1993.

Organization Activities:

- Offer expert consultation with the latest legal writings and information relating to tax, customs, labor and investment procedures to Japanese investors who wish to invest or do business in Vietnam,
- Receive Japanese study missions to Vietnam for investment and business opportunities in Vietnam,
- Provide Japanese investors particularly SMEs with office space and facilities free of charge to promote their business and investment in Vietnam,
- Hold business matching between Japanese and Vietnamese enterprises in various fields,
- Organize an exhibition on supporting industries to match Japanese buyers with Vietnamese sellers,
- Hold workshops guiding new laws and regulations on Vietnam's business and investment issues for existing Japanese enterprises who are operating in Vietnam,
- React to inquiries from local and Japanese companies seeking information about potential partners,
- Create business chances for Vietnamese importers by inviting them to visit specialized trade fairs and production bases in Japan in fields of foodstuff, beverage, agriculture and supporting industries,
- Make a comparative survey of investment-related costs in major cities in the region and in Asia every year,
