

Prospective Startups

J-BRIDGE: Princeton University and New Jersey Innovation Ecosystem Networking Event

The startups below are potential participants. Final participation is still being confirmed.

1. Enterprise AI, Automation & Productivity

Company	Business Area	Technology / Business Overview	Website
Alntropy	Enterprise AI (Knowledge Graph, Semantic Search, Intelligent Retrieval, Data Infrastructure)	Enterprise AI platform that organizes and retrieves information across documents, video, sensors, and knowledge graphs to power AI applications, semantic search, and intelligent retrieval.	Company Website
Aithon	FinTech (AI Agents, Sales Intelligence, Revenue Operations, Workflow Automation)	AI-native platform focused on financial services. The company uses AI agents and contextual data to automate sales intelligence, account planning, prospecting, and revenue generation workflows.	Company Website
Backline	Software Engineering AI (AI Agents, DevOps, Infrastructure Automation, Code Automation)	AI agents automatically deploy trustworthy code and configuration changes at scale, freeing your team from impossible backlogs.	Company Website
BroadVision	Enterprise AI (Autonomous AI Agents, Knowledge Graphs, Portfolio Management, Business Transformation)	Enterprise AI platform that uses autonomous AI agents and knowledge graphs to improve portfolio management, operational execution, business transformation, and ROI tracking.	Company Website
ConsumerIQ	Customer Intelligence (Consumer Analytics, Market Intelligence, AI Analytics)	AI-powered consumer intelligence platform focused on helping organizations derive actionable insights from customer and market data. Limited public information was readily available to independently verify a company website.	Company Website

Curium Technologies	Enterprise Software (Business Automation, Digital Transformation, AI Solutions)	Technology consulting and software development company providing enterprise software, digital transformation, mobile application, and business automation solutions.	Company Website
Digital Transformation Solutions	Digital Transformation (Process Automation, Enterprise AI, Business Optimization)	Consulting and technology services firm focused on helping organizations implement digital transformation initiatives, process modernization, and technology-driven operational improvements. Limited public information was readily available to verify a website.	Company Website
Edara	Infrastructure Management (AI Operations, Workflow Automation, Project Management AI)	Edara is building an AI-powered execution system for physical ICT infrastructure delivery work.	Company website
FinceAI	Fintech (Enterprise software, generative AI)	An AI-native financial planning and analysis platform for CFOs of small and mid-sized companies. It connects to accounting systems and produces forward-looking, auditable insights, with every recommendation traced back to source transactions.	Company Website
Kled	Data Marketplace (AI Training Data, AI Infrastructure, Data Licensing)	A marketplace where individuals get paid to upload their photos, videos, and other content, which Kled then licenses to AI companies for training their models.	Company Website
Lyxr	AI Agent Infrastructure (LLM Applications, Enterprise AI)	The agent infrastructure platform for building reliable AI Agents.	Company Website
Nova Creative Suite	Generative AI (Marketing and Media)	An AI content engine that is model agnostic for AI assisted content generation with an earlier emphasis on marketing - generates subtitles and translations in 75+ languages, and turns social posts into ads for TV, streaming, and social platforms.	Company Website

Parable	AI Transformation (Enterprise Productivity, Workflow Automation, Business Transformation)	Parable is the end-to-end AI Transformation platform — built for leaders who want productivity that shows up in the numbers, not performative efficiency gains.	Company Website
ValueChaser AI Labs	Financial Analytics (Business Intelligence, Decision Support AI, Enterprise AI)	AI-powered business diagnostics platform that analyzes company financials and procurement data to generate benchmarking, operational insights, and executive-ready recommendations in minutes.	Company Website

2. Healthcare & Life Sciences AI

Company	Business Area	Technology / Business Overview	Website
Chorah Labs	Biopharma (Regulatory AI, Compliance Automation, Life Sciences AI, Regulatory Intelligence)	At Chorah Labs we are building ARI (Automated Regulatory Intelligence); an AI-native platform building compliance-by-design tools for biopharma and advanced therapy companies	Company Website
CoReason	Clinical Analytics (Life Sciences AI, Regulatory Intelligence, Evidence Generation, Drug Development AI)	An AI-powered evidence-generation platform that helps life-sciences companies produce faster, reproducible and regulator-ready clinical, regulatory and commercial analyses.	Company Website
Delphine Diagnostics	Diagnostics (Healthcare AI, Clinical Decision Support, Digital Health, MedTech)	New Jersey healthcare diagnostics company developing rapid molecular tests and AI-enabled clinical decision-support tools for sepsis detection and infectious-disease management.	Company Website
Glucosynq	Diabetes Management (Healthcare AI, Clinical Intelligence, Medical Analytics)	A clinical intelligence platform that applies AI to raw glucose streams from continuous glucose monitors, turning them into actionable insights physicians can act on directly rather than raw numbers to sift through.	Company Website

Hill Research	Clinical Trials (Agentic AI, Regulatory Automation, Pharmaceutical AI, Biostatistics)	Healthcare AI company that applies agentic AI and automation to clinical trials, statistical programming, regulatory submissions, and biostatistics workflows for pharmaceutical companies.	Company Website
ImagineRx	Clinical Insights (Healthcare AI, NLP, Real-World Data, Medical Analytics)	Healthcare AI company commercializing technology that uses natural language processing and real-world healthcare data to generate clinical and operational insights.	Company's LinkedIn
Intelizen	Revenue Cycle Management (HealthTech, Claims Analytics, Healthcare Automation)	Helping healthcare organizations fight underpayments and automate reconciliation by enforcing payer contract terms.	Company Website
K3-Innovations	AI-enabled CRO (Clinical Trials, Regulatory Affairs, Life Sciences AI)	AI-native contract research organization (CRO) providing clinical trial, biostatistics, programming, and regulatory support services, enhanced through proprietary AI automation.	Company Website
PONS	Medical Imaging AI (Ultrasound AI, Automated Diagnostics, Digital Health)	An AI-based platform for ultrasound, which offers a powerful and intuitive solution to perform medical monitoring outside of the hospital environment. PONS™ is able to autodetect all the structures and tissues in the image, making diagnostics automatically.	Company Website
RegKey	Regulatory AI (Compliance Automation, Life Sciences AI, Biopharma)	AI-assisted regulatory intelligence platform for pharmaceutical and biotech companies. RegKey combines AI with human expertise to streamline regulatory strategy, compliance, and submission preparation.	Company Website
Rightview	Clinical Trials (AI Agents, Life Sciences AI, Workflow Automation)	An AI-native platform that automates clinical trial site operations — turning multi-agent workflows into the fix for the \$20B+ operational bottleneck standing between breakthrough science and patients.	Company Website

Robossis	Surgical Robotics (MedTech, Orthopedics, Healthcare Technology)	A surgical robotics company developing a robotic system specifically for orthopedic trauma and long-bone fracture repair.	Company Website
SyzOnc	Drug Discovery AI (Oncology AI, Precision Medicine, Life Sciences AI)	An oncology drug-discovery company using human-tissue models and AI to identify targets that simultaneously disrupt tumor cells, the surrounding matrix, and immune suppression.	Company Website
VerdeLab	Computational Biology AI (Healthcare and life sciences, biomanufacturing, data infrastructure)	A cellular simulation engine that integrates multi-omics data so pharmaceutical, biotech, and biomanufacturing R&D teams can run thousands of virtual experiments, predict biological behavior, and reduce costly wet-lab trial and error.	Company Website

3. AI Governance, Security & Compliance

Company	Business Area	Technology / Business Overview	Website
AwareNow	GovTech (Generative AI, Compliance Tech, Public Sector AI, Knowledge Management)	Civic technology company that uses AI to make local government information more accessible through plain-language summaries, research tools, compliance products, and public engagement platforms.	Company Website
Chakra.io	AI governance (Agentic AI, Enterprise Software)	A middleware platform that validates, constrains, and escalates AI-generated outputs before they influence business decisions, giving organizations oversight and accountability over AI-driven workflows. Initial focus is on regulated industries that must demonstrate control over AI-assisted decisions.	N/A
DataRightsAI	Legal AI (Contract Intelligence, RegTech, Compliance Automation, FinTech)	Contract intelligence platform for financial services that uses AI and legal-domain expertise to analyze complex contracts, identify rights and obligations, and support regulatory compliance.	Company Website

Nakato	Privacy-Preserving AI (AI Security, Confidential AI, Data Protection)	A private layer between sensitive data and public AI models that keeps real data inside a customer's environment while the model works on a reversible semantic twin.	Company Website
OppyAI	AI Security (Privacy AI, Secure LLMs, Encrypted AI)	A privacy and security company that offers Noir, an AI chat product, and an API, both built on end-to-end neural encryption so that no LLM or AI provider can read a user's prompts or responses.	Company Website
Rena Labs	Confidential Computing (AI Security, Privacy AI, Secure Data Exchange)	Rena Labs enables secure AI operations on private data with TEE data exchange.	Company Website
SecuraAI	AI Governance (AI Security, Responsible AI, Compliance)	A Princeton-based startup helping highly regulated industries, such as healthcare, safely deploy AI by automating AI security and governance.	Company Website
TextMine	Document AI (Compliance Automation, RegTech, Knowledge Management)	TextMine streamlines document compliance workflows in regulated industries.	Company Website
Thalus AI	AI Risk Management (AI Governance, Responsible AI, AI Compliance)	Make AI risk reviews faster and smarter with automated risk tiering, risk detection, and risk control recommendations — delivered through an API that plugs into your existing SDLC tools.	Company Website

4. Industry-Specific AI & Emerging Technologies

Company	Business Area	Technology / Business Overview	Website
Altizon	Industrial AI (Smart Manufacturing, Manufacturing DX,	Industrial AI and smart manufacturing software company that helps manufacturers use machine and factory data to improve productivity, quality, sustainability, and operational performance.	Company Website

	IIoT, Predictive Analytics)		
FiCore	Nonprofit and Education technology (Generative AI)	A platform that helps nonprofits, scholarship providers, and corporate giving programs streamline donor engagement, create personalized impact stories, and connect students with education funding.	Company Website
Global Media Review	Media Tech (Digital Content, Marketing Technology, Audience Analytics)	Media and technology company serving Spanish-speaking audiences through a network of digital publishers, influencers, and content platforms across the Americas.	Company Website
Hydronos Labs	Climate AI (Weather Analytics, Risk Intelligence, Predictive Modeling)	Climate and weather risk intelligence company that provides data, analytics, and forecasting tools for insurance, financial services, agriculture, and risk-transfer markets.	Company Website
Materium Technologies	Materials Informatics (Materials AI, Advanced Manufacturing, R&D Automation)	An AI formulation engine for high-performance thin films that closes the loop of fragmented workflows when creating a new coating.	Company Website
Nesture AI	EdTech (Agentic AI, Learning Platform, Assistive Technology)	An Agentic AI-powered learning platform helping children develop the motor skills needed to communicate—on devices families already own.	Company Website
Nexerios	Pricing Analytics (AI Optimization, Revenue Management, Predictive Analytics)	Nexerios is an AI-powered platform designed to optimize the utilization and revenue potential of underutilized assets through intelligent demand management, pricing, and incentives.	Company Website
Nodes	AI Recruitment (Multi-Agent Systems, HR Tech, Talent Analytics)	Nodes.inc builds an AI-native, multi-agent recruiting operating system that automates sourcing, screening, retention risk prediction, and candidate fit scoring for enterprise hiring.	Company Website
PBX Energy	Energy Analytics (Energy Optimization, Data	A commercial energy procurement and data analytics platform designed for high-load power users, data centers, and industrial enterprises.	Company Website

	Centers, Industrial Analytics)		
SkillsBridge	Workforce AI (Future of Work, Upskilling, HR Tech)	Integrating work redesign and skill development into one unified system, creating the perfect partnership between your people and AI.	Company Website
Tailorbird	Construction Tech (PropTech, Cost Estimation, Workflow Automation)	Tailorbird is a construction management software package that enables fast, accurate renovation cost estimates and project workflows	Company Website
Vault Robotics	Autonomous Robots (Logistics Automation, Robotics, Last-Mile Delivery)	Princeton University robotics spinout developing autonomous delivery robots for last-mile logistics. Its focus is on safe, agile robotic systems that improve package delivery operations.	Company Website
Workbrand Global	Workforce Analytics (HR Tech, Talent Management, Employee Experience)	Employer branding and workforce strategy firm that helps organizations build, measure, and improve Employee Value Propositions (EVPs), talent attraction, employee engagement, and culture.	Company Website

Prepared by JETRO New York (as of October 8, 2026).
