The Future is HERE!

FROM JAPAN TO THE WORLD
PRESENTED BY

JETRO

PAVILION

about us

J-Startup

Over 10,000 Japanese startups are tackling new challenges with innovative solutions every day. Most of these companies are limited to Japan, and not yet active globally. We aim to change that. The J-Startup program, founded by the Ministry of Economy, Trade and Industry (METI), promotes the top Japanese startups with competitive and groundbreaking technologies and solutions. J-Startup brings the next generation of innovation from Japan to the world stage.

JETRO

Japan External Trade Organization

The Japan External Trade Organization (JETRO), a Japanese government-related organization, has been assisting innovative startups in expanding their businesses into the global market since 2003. JETRO provides extensive support for business development, including consultation on go-to-market strategies, in order to help small businesses grow and to foster their relationships with their global counterparts.

Pineapple Leather

Sustainable Solution for Everyone

Product Category : Food & AgTech

Our iconic **pineapple leather** is made out of leftover pineapple leaves which will usually be thrown away.

Our biggest competitive advantages are high durability and its competitive price we offer our customers.

We enable more companies and brands to make sustainable choices by providing a convenient and transparent solution.

PEEEL Lab, Inc. is a plant-based B2B leather manufacturing company, mainly tackling: food waste, animal cruelty, and global warming by producing leather from leftover pineapple leaves. We empower corporates and brands to make sustainable choices by providing our products.
