## Local economic/social issues

- The Indian government has revised its National Education Policy (NEP) for the first time in 34 years and has set a goal of increasing the enrolment rate in the secondary school to 100% (currently 77.97%) by 2030.
- In addition to the chronic shortage of teachers, there are concerns about the shortage of teachers with programming knowledge.
- The needs for online learning are increasing due to COVID-19.

## Details of demonstration

- Demonstration for the future dissemination of the service for potential future uses of online programming learning in collaboration with IIT.

## Expected outcome

- Contributing to resolving educational disparities by utilizing online learning.
- Contributing to developing human resources for engineers.
