<https://www.opexpark.co.jp/en/>

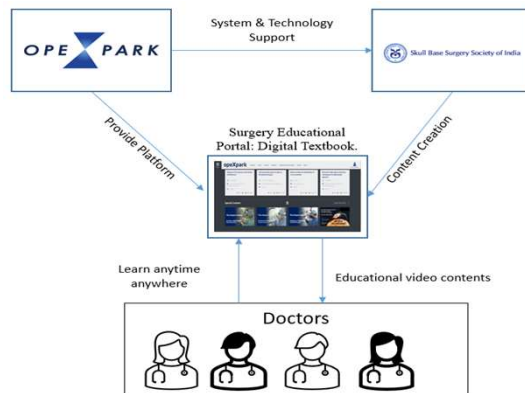

- Address : 2-2-8, Higashi Shinagawa, Shinagawa-ku, Tokyo, Japan.
- Employees : 21
- Established in : 2019
- Business : Sales of DX systems for hospitals & Digital textbook platform business.

## Project Name

Demonstration of a surgical digital textbook platform for promoting surgical education (India)

## Cooperation with Local Companies

- Local Partners : Skull Base Surgery Society of India
- Details of Cooperation : Using our system and collaborating with local academic societies to promote revitalization of surgical education in emerging countries.

## Local Economic / Social Issues

In India, the need for advanced medical care is increasing due to the growth of income levels and expansion of the middle class, but the shortage of doctors is an issue. In addition, the impact of COVID19 has increased the demand for systematic medical education in a non-face-to-face setting.

## Details of Demonstration

We are developing a digital textbook that allows users to relive surgical procedures. Also, we are expanding sales of a smart-recording system that facilitates the creation of digital textbooks. By utilizing our system and collaborating with local societies, we will create digital textbooks for doctors in emerging countries that meet local needs, while at the same time providing highly advanced Japanese-style medical care to demonstrate its effectiveness.

## Expected Outcome in the Future

This platform allows doctors to learn advanced surgical cases wherever they are, improving their surgical knowledge and skills. Furthermore, the new physician platform will also create new e-detailing opportunities for companies by visualizing surgeons' insights and accelerate medical DX in emerging countries.
