Singapore FinTech Festival 2024 – List of exhibitors

Fintech ZONE			
No.	**Company Name**	**Corporate Logo**	**Business Overview**
1	Credit Engine Inc.	CreditEngine	Credit Engine is a fintech company revolutionizing the lending landscape with SaaS products, including our loan management system from loan origination, loan management, and debt collection powered by advanced data-driven technology. Our mission is to transform the lending experience for both borrowers and lenders. We deliver seamless, stress-free loan management and collection services, elevating customer satisfaction and streamlining business operations for an unparalleled lending journey.
2	Ginco Inc.	Ginco	Ginco is a Web3 Development Company with the vision of "Changing the Flow of the Economy." We utilize blockchain technology to support corporate Web3 ventures. Since our founding in 2017, we have provided infrastructure for utilizing blockchain more efficiently, securely, and cost-effectively as a comprehensive developer in the Web3 industry. In addition to our B2B Web3 Cloud, API & SDK services, enterprise cryptocurrency wallet solution, and consulting services, we are also committed to the social implementation of Web3 through our mobile wallet app "Ginco".
3	JOSYS INC.	Josys	Josys is the SaaS Management Platform that simplifies how IT works. Our holistic approach equips IT with 360-degree control over their SaaS applications and device inventory by making it easier to visualize user access, analyze utilization trends, and automate provisioning processes that will make IT operations run more efficiently. By integrating with hundreds of applications and external data sources, Josys provides IT with a single portal for streamlining employee onboarding, monitoring shadow IT, and managing SaaS sprawl. IT teams can eliminate manual tasks, optimize their license footprint, and reduce risk with the power of Josys.

4	SORAMITSU	![SORAMITSU logo]	Soramitsu is an award-winning global financial technology company with expertise in developing blockchain-based solutions for digital asset and identity management. Our mission is to use blockchain to promote innovation and solve pressing societal challenges. Utilizing blockchain, Soramitsu worked with the National Bank of Cambodia to create the Bakong CBDC, and is an active contribute to many open source projects, such as Hyperledger Iroha, the SORA decentralized economic system, Polkaswap, and Fearless Wallet.
5	Tech Japan Inc.	![Talendy logo]	Talendy offers a cutting-edge, AI-driven platform for swift assignment of top-tier talent from India. Our platform is the first of its kind, developed in partnership with prestigious Indian institutions like IITs. Leveraging Talendy's Employer of Record (EOR) services, companies can seamlessly integrate Indian engineers remotely, eliminating the need for visa arrangements, payroll management, and compliance issues. Expand your development capabilities with India's top tech talent efficiently and effortlessly.
6	UPWARD, Inc.	![UPWARD logo]	UPWARD is a sales-tech SaaS startup that provides a sales engagement platform application integrated with GIS technology. Our mission is to inspire fieldworkers' creativity by empowering them with innovative tools that enhance their daily activities. We specialize in supporting fieldworkers in sales, service, and collections, who engage in direct communication with customers every day, with a particular strength in sales conducted by financial institutions and debt collection.

ESG ZONE			
No.	**Company Name**	**Corporate Logo**	**Business Overview**
1	Asuene Inc.	ASUENE	Asuene is a leading cloud-based SaaS platform for carbon reporting across Scope 1-3 and CFP. Headquartered in Japan, it's backed by investors like SMBC, Sony, and Temasek Group. Serving over 6,000 companies, Asuene offers advanced AI-OCR technology and expert sustainability consultancy, making carbon reporting efficient. Their comprehensive support from in-house consultants ensures Asuene is an ideal solution for both enterprise companies and SMEs, establishing it as a market leader in carbon reporting.
2	Sagri Co., Ltd	Sagri	Sagri utilizes geo-spatial analytics, AI, and proprietary models integrating satellite imagery with field data to provide precise farm-level recommendations optimizing irrigation, fertilizer usage, and sustainable outcomes. Our satellite analytics reveal where and how to reduce costs and emissions per yield while capitalizing on agriculture carbon credits, enabling farmers to enhance productivity through data-driven sustainable practices.
3	Sustainable Lab Inc.	SusLab	Sustainable Lab Inc. provides Japan's largest non- financial data platform "TERRAST", which evaluates the qualitative environmental and social contributions of companies using big data and AI. We also offer SaaS "TERRAST for Enterprise", to support disclosure and analysis of ESG and sustainability data. Sustainable Lab inc. aims to seamlessly connect societal and environmental contributions with the economy with experts in data science, sustainability, and financial engineering.

4	Chizaizukan Inc.	知 財 図 鑑	We at CHIZAIZUKAN are a creative media for encountering "amazing intellectual properties" that will evolve the world and create co-creation.　We focus on supporting co-creation initiatives that visualize delusional projects through innovative thinking and practice prototyping. Through holding workshops, visualizing ideas, utilizing various types of AI, and disseminating information, we help create new businesses by considering the future of multiple industries across cutting-edge technologies and future issues.
