• Yellowtail

DHA and EPA, found in abundance in yellowtail, is effective in protecting against arteriosclerosis and diabetes.

To preserve its freshness, our yellowtail is processed and frozen directly after it is caught. It is of superior quality in taste and texture making it perfect for SASHIMI.

We can maintain this high quality product all year long.

• SUSHI Topping

•Yellowtail

- Yellow Tail Fillet - Our product is of the highest quality.
It is produced at an EU HACCP certified factory always in pursuit of safety and stability.
Due to our original processing methods, the fillet is shipped with the UMAMI ingredient ATP intact.
The yellowtail fillet is complete with collar and bones making it suitable not only for SASHIMI, SUSHI and TERIYAKI, but also a variety of dishes.
For example, yellowtail can be preserved in MISO and the discarded portions can be used to add flavor to other foods through simmering.
- Yellowtail Loin - The loin is cut from an area between the back and abdomen of the fish after the collar and skin have been removed.
It is a popular product since it can easily be used as SASHIMI.
In addition to SASHIMI it can also be used for SUSHI and a wide variety of other dishes.

• Scallop Meat (SASHIMI Grade) (Fresh goods are also available.)

These “wild scallops” from HOKKAIDO are SASHIMI grade.

One by one the adductor muscles are taken from wild scallops raised in the cold Okhotsk Sea on the day they are caught. The UMAMI of fresh scallops is preserved through a rapid freezing process. Refrigerated products are also available.

• Farmed Yellowtail Fillet (Fresh goods are also available.)

Yellowtail raised in the KAGOSHIMA channel is fatty with firm meat.

Our processing technology makes for safe shipping of the freshest product.

Quality is stable throughout the year due to the integrated production system that sees the product from the young fish stage to shipment.

We guarantee a level of safety that can't be imitated.

• Farmed Bluefin Tuna (Frozen goods are also available.)

Fine fat, unique rich aroma, and the mellow flavor and taste of Bluefin Tuna are achieved.

This is the new Bluefin Tuna that changed the image of the farmed tuna.

We manage consistently from production to processing and distribution, and provide only the highly selected fine quality Farmed Bluefin Tuna.

It is high quality bluefin tuna close to natural with carefully selected food.

• Farmed Red sea Bream

Our red sea bream is raised in the KAGOSHIMA tides and adheres to strict standards in terms of color, shape and size.

While this is cultured sea bream, the UMAMI flavor and texture is superb.

We have devised the optimal environment in terms of aquaculture, feed, circulation and shipping systems so we can provide the freshest, most delicious sea bream.

KIBUN FOODS INC.

2461 (G)

- Steamed SURIMI seafood
- Fried SURIMI seafood

Address 2-1-7, Kaigan, Minato-ku,
Tokyo 105-8626, JAPAN

- **Destination for Export**
Germany, U.K., France,
Spain, Austria etc...

• Steamed SURIMI seafood (KAMABOKO)

- Characteristics of the KAMABOKO -
It is a low-calorie food with high protein.

Main raw material of cod SURIMI is white because blood, fat and its skin are removed from its meat.

The reason why it's attached on a wooden plate is because it's easier to shape, steam, and has effects on absorbing extra water when cooling and on preventing decay.

• Fried SURIMI seafood (SATSUMA-AGE)

- Characteristics of the SATSUMA-AGE -
Cod SURIMI added with salt and sugar is knead well and fried with vegetable oil.

It's high protein fish paste product.
This product contains no ingredients but you may enjoy varieties of texture and flavor of SATSUMA-AGE by kneading vegetables, squid, octopus and scallops.
