institutes

ADVANTAGES

of the ZAKARPATTIA REGION:

1. The most distant region from the conflict frontline.
2. Favorable and unique geopolitical location. Proximity to European markets.
3. Successful experience in attracting investments and cross-border projects.
4. Diversified transport, energy, and industrial infrastructure.
5. High business activity and labor force mobility.
6. Climate, landscape and biological diversity of the region.
7. Rich natural, forest, water, recreational and balneological resources.
8. A significant number of recreational destinations, and tourist and recreational products.
9. Favorable environmental profile of the region.
10. Active development of selected agricultural sectors.

Throughout the war period there has been attracted already more than USD 0.5 billion in the economy of Zakarpattia region and announced further investing worth more than USD 1.7 billion in initiated projects.

Industrial Park “Friendly Wind Technology”

Its operational scope is to locate enterprises specializing in the production of metallic construction structures and their parts, electrical equipment manufacturing, repair and maintenance, as well as installation and assembly, and production of turbines for wind power plants.

One of the key industrial achievements of the industrial park in 2025 is the launch of serial production of wind turbine blades for the multi-megawatt class. The “Made in Ukraine” blades confirm the capability of the national manufacturer and the strengthening of Ukrainian wind power in the region.

“Management Company “Wind Parks of Ukraine” LLC

The company develops, installs and maintains wind power plants (WPPs), generates and supplies electricity.

It provides a full cycle of wind power plant construction in Ukraine - from design and installation to logistics, launch and long-term maintenance.

The company's mission is to develop renewable energy sources in Ukraine and promote the country's energy independence.

Industrial Park “Energy Group”

The operational scope of the industrial park includes glass production, tempering and processing, manufacture of finished products such as double-glazed windows, doors, stained-glass windows, sheet glass forming and processing, production of building metal structures and structural parts, production of PVC window profiles, metal-plastic and aluminum window frames.

Industrial Park “BF Terminal”

The operational scope of the industrial park is to host sawmilling and planing enterprises, manufacture of wood products, cork, straw and plant materials for weaving, furniture production, MDF and CLT boards.

The park will have it`s own cargo transshipment hub.

Shufani Corporation that includes 11 relocated enterprises from Kharkiv

Eskal Zinc LLC, Variant West LLC, Leda West LLC, Variant Agro Bud LLC, C H Ukraine LLC, Variant Defence LLC, EBL Trade LLC, TSS Ukraine LLC, and Stik Company LLC.

Specialization: metal processing and manufacturing of customized equipment, produces rolling mills for various profiles and pipes, equipment for agricultural production, etc.

“Biopharma Plasma” LLC

Biopharma is a Ukrainian biotech company engaged in plasma procurement and specializing in the production of plasma for the preparation of blood products.

For more than 125 years, it has been developing innovative drugs and producing medicines from human donor blood plasma – medicines that save lives.

Specialization: production of basic pharmaceutical products and production of immunobiological products.

“Ajax Systems” PJSC

Ajax is an international high-tech company and the largest manufacturer of security systems in Europe.

Its core business is the development and production of wireless security systems with smart home capabilities, a full-stack company from idea generation and development to mass production; production of electronics, including security systems.

Ajax Systems is a global company with customers in 180 countries.

“Terminal Chornotysiv” LLC

Main activities: storing and transshipment of grain cargoes, oil, oilseeds and their processed products; transshipment of various freights from auto transport and from the wide Ukrainian gauge to the European rail gauge.

The company offers full range of services in filling various types of containers with cargoes, as well as in storing packaged products in modern warehouses, trading wholesale batches of oil, grains and oilseeds, providing expeditionary services, and grain storage services.

“Centravis Production Ukraine” PJSC

CENTRAVIS

The company specializes in the production of pipes, hollow sections and fittings made of steel.

The company is one of the largest specialized enterprises in Europe for the production of seamless stainless steel pipes, which are used in the automotive industry, petrochemical and gas industries, nuclear and thermal power, shipbuilding, aerospace in the automotive and gas industries, shipbuilding, and aerospace.

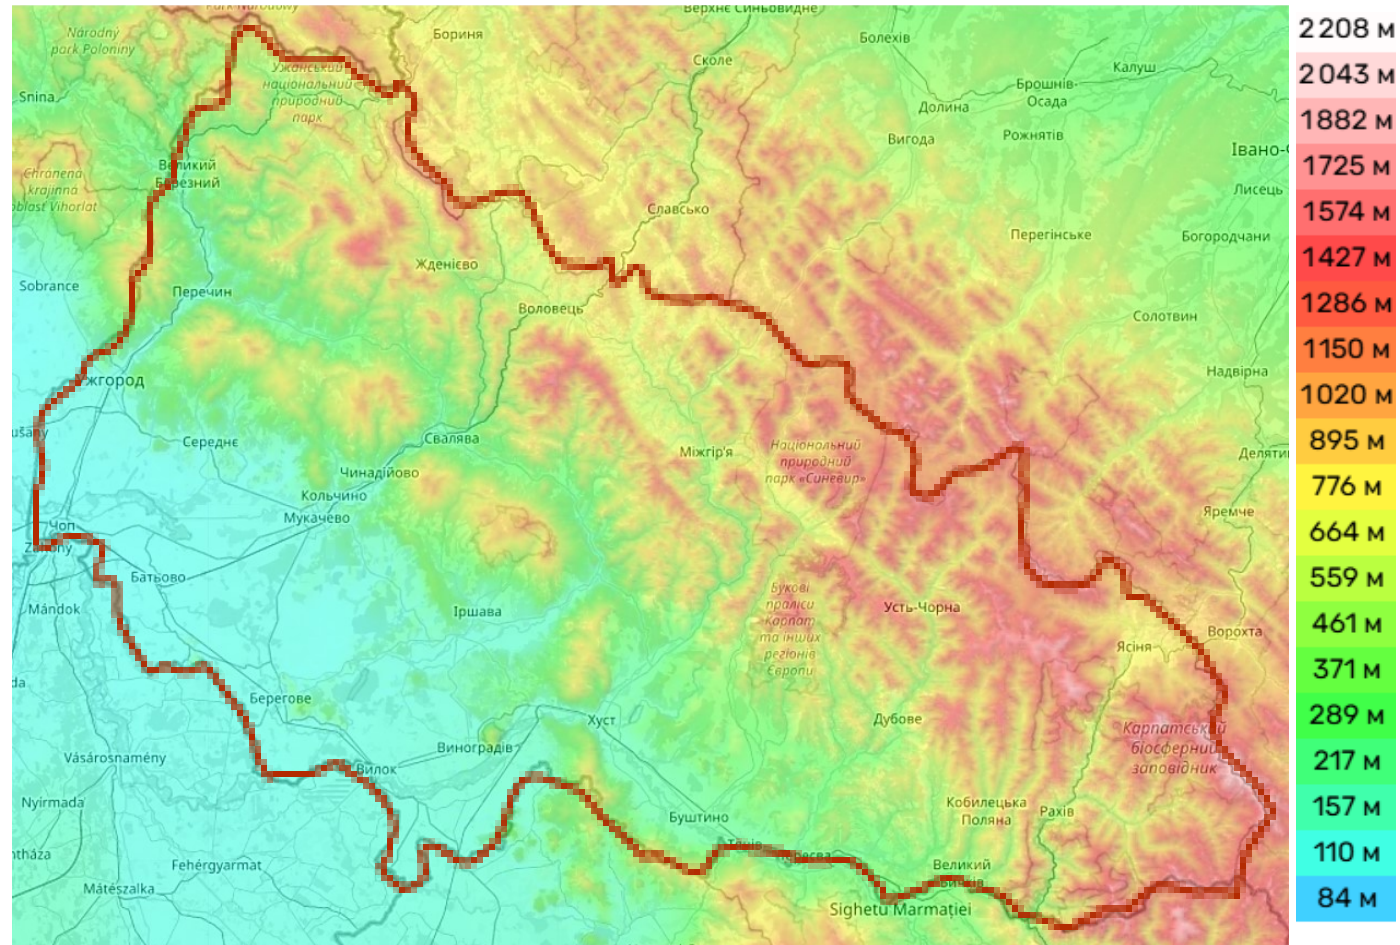

AGROINDUSTRIAL COMPLEX

About 80% of the territory Zakarpattia region is mountainous, and 52% of the territory is forested, which results in the region's agricultural land shortage.

The region's agricultural sector specializes in early vegetable production due to its favorable climate.

The early maturation of crops and vegetables provides a cost competitive advantage on the markets of Ukraine and abroad.

PRIORITY SECTORS FOR INVESTMENTS

PRIORITY SECTORS FOR INVESTMENTS

AUTOMOTIVE INDUSTRY

Zakarpattia already has a successful background in hosting automotive producers and automotive components manufacturing plants of leading global companies such as EUROCAR (Škoda), YAZAKI UKRAINE, GENTERM, FAVA-TECHNICS, which confirms the region's readiness for large-scale industrial projects.

Developed infrastructure, availability of labor resources, convenient logistics, and support from local authorities make the region an attractive destination for developing automotive cluster with an export focus on the global market.

PRIORITY SECTORS FOR INVESTMENTS

MANUFACTURING OF HIGH-TECH PRODUCTS

The Zakarpattia region is boosting the manufacturing of high-tech equipment, particularly in the electronics and appliance manufacturing sectors.

This sector contributes to the region's integration into European production chains and the creating of high-paying jobs.

Projects of the international corporations such as JABIL, FLEX and AJAX have been successfully implemented in the region.

PRIORITY SECTORS FOR INVESTMENTS

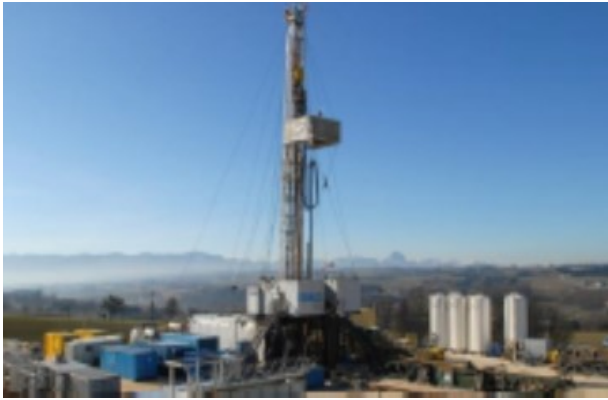

PRODUCTION OF SOLAR PANELS, BATTERIES AND OTHER RELATED PRODUCTS

Zakarpattia has its strategic advantages and is the safest region of Ukraine in the wartime situation, which makes it an attractive location for the production of innovative energy equipment.

Proximity to the EU market, developed infrastructure and qualified workforce provide region's competitiveness. Localization of production allows us to optimize logistics and minimize costs for entering the European market.

PRIORITY SECTORS FOR INVESTMENTS

GEOHERMAL ENERGY

Zakarpattia is one of the most perspective regions of Ukraine for the development of geothermal energy, with a potential of up to 1400 MW of capacity and an estimated production of up to 10.4 billion kWh per year.

Geothermal resources are concentrated in Berehovo, Mukachevo, Uzhhorod and Khust districts, where the temperature of rocks reaches 230-275°C at depths of up to 6 km. Currently, geothermal resources are used mainly for recreation, but their potential for electricity generation remains untapped.

PRIORITY SECTORS FOR INVESTMENTS

ANDESITE AND BASALTIC DEPOSITS OF ZAKARPATTIA: ESTABLISHING A CONSTRUCTION MATERIAL CLUSTER

Zakarpattia possesses significant deposits of andesite and basalt rocks. This subsoil deposits can become the basis for the development of modern production of basalt fibre and composite reinforcement — materials that are critically important for Ukraine's reconstruction, particularly in residential, road, and bridge construction.

Investments in this sector will enable the development of a full-cycle production cluster with strong export potential, aligned with Ukraine's strategic goals for infrastructure restoration and industrial development.

PRIORITY SECTORS FOR INVESTMENTS

SALT MINING (SOLOTVYNO)

More than 30 types of minerals have been identified in the region, including polymetallic ores, alunites, perlites, zeolites, and liparites that are not typical for Ukraine.

The Solotvyno salt deposit holds about 3.5 billion tons of rock salt, which has higher quality parameters compared to European ones.

PRIORITY SECTORS FOR INVESTMENTS

WASTE RECYCLING

There are 2 solid waste landfills and 62 ordinary landfills in Zakarpattia, but for now there is no waste recycling plant.

Therefore, it is particularly important for the region to implement waste sorting and waste processing plants.

PRIORITY SECTORS FOR INVESTMENTS

Wine production

Zakarpattia is one of the regions of Ukraine with unique natural and climate conditions for the development of viticulture and winemaking. In addition, our region has a convenient geographical location as it borders four countries of the European Union, which provides additional opportunities to study and implement best practices in viticulture and winemaking. **The area of vineyards is 3.1 thousand hectares, including 0.7 thousand hectares owned by agricultural enterprises.**

PRIORITY SECTORS FOR INVESTMENTS

SHEEP BREEDING

One of the key priorities are promotion and preservation of local traditions and culture, including cheese and dairy production methods, which will be saved and passed on to future generations.

It provides accessibility and variety of dairy products and cheeses for the local population and tourists.

PRIORITY SECTORS FOR INVESTMENTS

TOURISM AND RECREATION

Zakarpattia is one of the most picturesque regions of Ukraine, located on the southwestern slopes and foothills of the Ukrainian Carpathians.

Tourism is becoming widespread and has already become one of the leading, highly profitable and fastest growing sectors of the global economy.

An invaluable treasure of our region are mineral and thermal water deposits which have medical properties. There are more than 360 deposits in Zakarpattia. Mineral waters that can be used for medical purposes are represented with 60 main deposits. Among 205 mineral water deposits in Ukraine, 38 main deposits are located in Zakarpattia.

ADVANTAGES

of the Zakarpattia region :

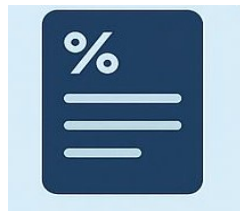

Security

**Proximity to
the EU**

Climate

**Tax
preferences**

**Human
Capital**
