Panasonic Eco Solutions Canada Inc. is the Canadian arm of a global team within Panasonic Corporation. Our mission is to become a leader in the deployment of renewable smart energy systems in Canada. Our objective in Canada is to fulfill Panasonic's global vision of being the No. 1 Green Innovation Company in the electronics industry by its 100th anniversary in 2018. The company has been involved in the solar business in Canada since 2005 and has completed numerous commercial roof top as well as ground mounted solar projects in Ontario as part of the province's feed in tariff program.

## Products & Technologies / Competitive Advantage & Opportunities for Partners

Panasonic Eco Solutions' core customer advantage is to provide reliable, full service, market ready solutions enabling all the required elements for renewable solar and storage energy initiatives, including financing and long term assurance.

Panasonic's core competencies include;

- Top ranked bankability
- Highly recognized global brand with innovation, strength, stability of a global team
- Considerable annual commitments to R&D
- Financial stability with significant market capitalization
- Distinct ability to fulfill its long term commitments

Panasonic offers high quality and durable solar PV modules and is collaborating with leading technological partners who specialize in developing "Power Conditioning" and storage solutions for total solar generated and storage energy systems.
