

# Japan Power Market Seminar:

Market Growth Opportunities for Canadian Companies on the Japanese Grid

Presented by:

With the much-anticipated next step in the reform of the Japanese electrical system scheduled to come into effect on April 1st, 2016, the Japan External Trade Organization (JETRO), with support from the Advanced Energy Centre at the MaRS Discovery District, is collaborating together on this Japan Power Market Seminar to highlight potential growth opportunities for Canadian companies on the Japanese grid as the country seeks to de-regulate this hugely important industry.

Join us as our distinguished line-up of speakers discusses the upcoming regulatory changes, business implications and opportunities. As well, successful Canada-Japan case studies will be presented by Canadian companies to give further value to our audience.
