## Place of production/processing

Niigata

## Materials

Pottery

## Selling point

The grain on the inner side causes the milk particles to become finer, and as a result, you can taste the sweetness of milk more strongly than when drinking with a glass or porcelain cup. Developed in Agano City, Niigata Prefecture, a production area for roof tiles and dairy farming. The French phrase "pour le lait," which means "for milk" was played with to create the brand name "PU.LE.LA."
