

Updates on Non-Invasive Blood Glucose Sensor

【Significance of non-invasive blood glucose sensor】

Currently, the only way to measure blood glucose is to insert a needle

- Mentally and physically painful daily routine...
- Medical consumables are produced, resulting in huge medical expenses...

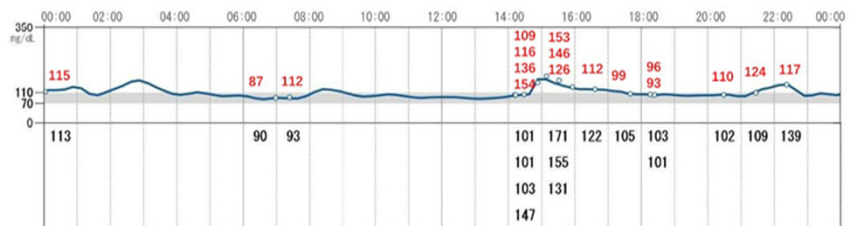

The world's first! Non-invasive blood glucose level sensor
 -Eliminates the mental and physical suffering of patients and reduces medical costs-

【The device】

【Blood glucose in-house comparison test】

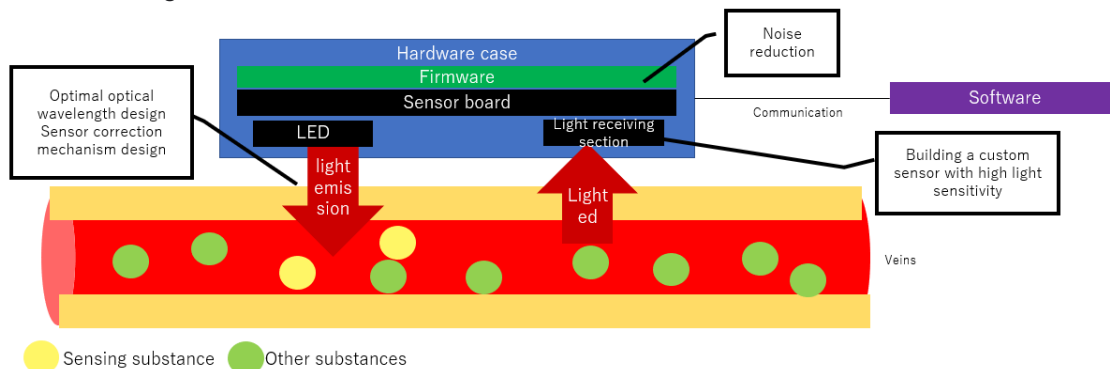

Red: Our sensor
Black: FreeStyle Libre, Abbott
