Prodrone Co., Ltd.

1-115 Nakahira, Tenpaku-ku, Nagoya, Aichi

Basic Information

Industry	Manufacturing
Company Profile	We design drones and develop control and flight management software ourselves. The appeal point of our work is being involved in the front lines of developing, manufacturing, and implementing innovative products. We have been developing drones for 10 years and can create innovative, durable, and safe drones. These drones can fly reliably even in harsh natural environments such as disaster sites.
Major Country and Regions of Interest	Ukraine, Southeast Asia, Asia Pacific
Business Activities	We sell our own drones (multi copters and helicopters) and GCS (Ground Control System),and also conduct PoC and contract development to develop new drone use cases. Applications are diverse, including disaster response, inspection and monitoring, surveying, and logistics, and our customers include government and infrastructure-related companies. We are forming alliances with various companies to develop technology and businesses that use drones to solve social issues.
Company PR	We are developing drones, aiming to help with disaster prevention and humanitarian aid. You can be involved in the design of the drone itself and witness solutions using drones in action.
