

Kawatatec Corp.

48-1 Hashimoto, Sakurai City, Nara

Basic Information

Industry	Manufacturing
Company Profile	<p>Founded in 1933, Kawatatec Corp. is a Japan-based manufacturer specializing in high-precision machine tool peripherals. Headquartered in Sakurai City, Nara Prefecture, Kawatatec serves customers in over 25 countries. With a workforce of 48 employees (As of April 2025) and annual sales of 1.1 billion JPY (FY2024), Kawatatec is known for its expertise in producing large-diameter lathe chucks, index tables, pallet changers, and related components. Guided by its mission and values—emphasizing diligence, safety, and continuous evolution—the company combines ingenuity with modern technology to support the future of manufacturing.</p>
Major Country and Regions of Interest	Asia, Africa
Business Activities	<p>Kawatatec Corp. designs, manufactures, and sells large lathe chucks (ø600–ø2000) and machine tool peripheral equipment. Our product lineup includes independent chucks, scroll chucks, and hydraulic power chucks, boring mill jaws, mechanical index tables (Touchdex), and automated pallet changers. We specialize in components for high-precision, large-workpiece machine tools and support various industries. Kawatatec exports to over 25 countries and supports both standard and custom manufacturing needs. In response to evolving factory demands, we have begun taking active steps to provide digitalization and smart automation solutions that enhance productivity and connectivity in modern manufacturing environments.</p>
Company PR	<p>With a 90-year legacy, our company specializes in manufacturing peripheral equipment for machine tools, including large chucks, index tables, and auto pallet changers. We are now integrating advanced digital technologies to enhance our precision engineering. We welcome international talent to join us in this innovative journey, combining traditional craftsmanship with modern innovation. Your fresh perspectives and skills will be vital in shaping the future of our company.</p>

Recruitment information

◦ Open Positions	<p>Engineer</p> <p>After joining the company, you will be assigned to the Development Team in the General Affairs Department for one or more years. Your role will involve using digital technologies to improve manufacturing processes, such as machining and production workflows. You will research and evaluate new systems and software, compare them with existing methods, and design optimal solutions. The team also works with interns, allowing for collaboration with students who bring fresh perspectives. After gaining experience, you may pursue new career paths in departments such as design, sales, or production management, based on your interests and company discussions.</p>
