- iPLAB Next Ventures Representative partner

What's happening now

- You can hardly see the audience's face as you share the screen and explain it.

- It's hard to read each person's expression and reaction unless there are a few participants.
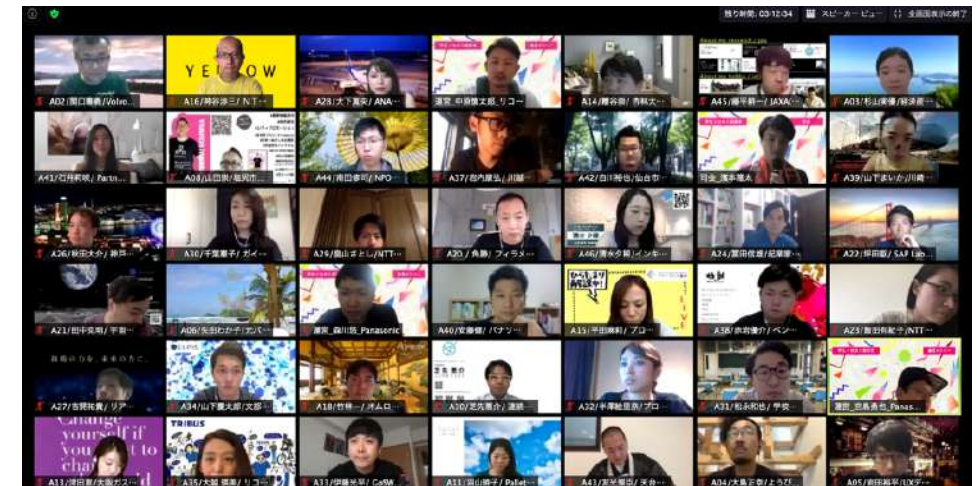

A service that provides feedback
to online session organizers
by analyzing each participant's reaction
and voice

I'm beside you

Attendee

Organizers

Online communication surges, quality is a challenge

Feedback data

Zoom video Ingest

SaaS that analyzes online video data and feeds back information about each attendee to the organizer

I'm beside you

Feature1.

Visualizing the "quality"

of the entire event

Feature2.

Heat map analysis of reactions to screen sharing.
Personalize your follow-up.

→

Visualize where participants were looking and how they were reacting when they were sharing the screen

→

Improving slides and presentations

Follow up with individual responses.

ALL

*Identify participants by facial recognition. Visualize the reaction of each segment. In consideration of personal information, it is only used to uniquely identify individuals in the video.
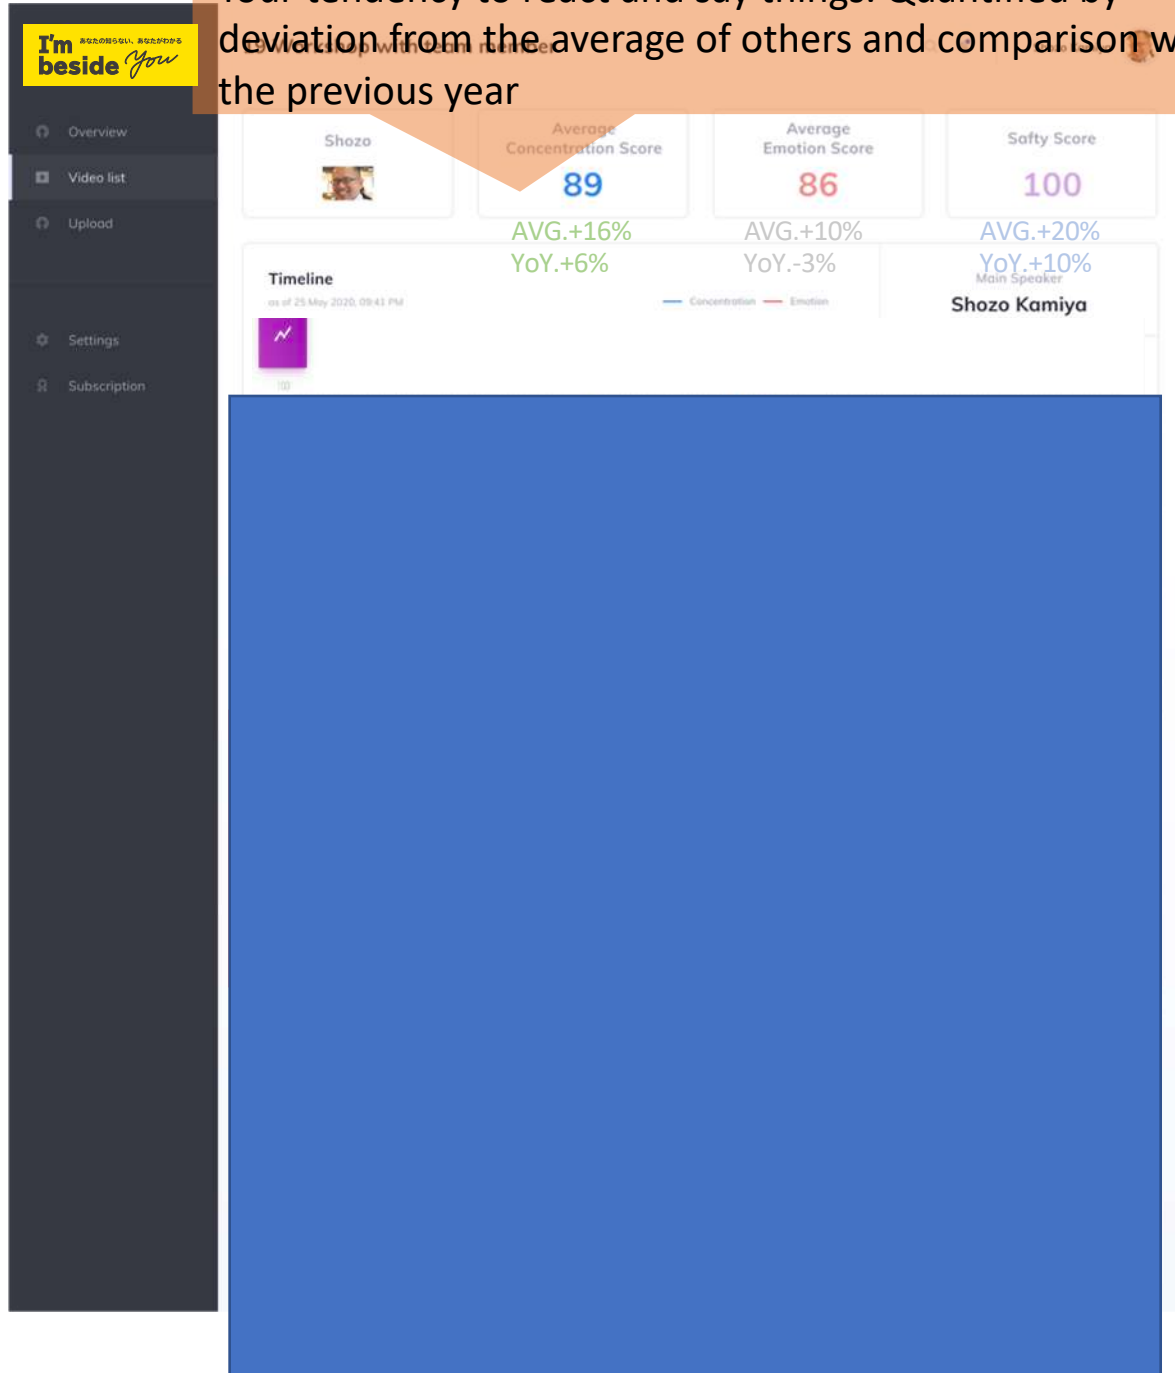

Feature3.

The "face identification" approach to

make a record on an individual basis.

Changes from the past and good or

bad compatibility are also quantified.

Timeline
as of 25 May 2020, 09:41 PM

— Concentration — Emotion

The one-on-one communication that only online can provide

Use case①

Analyze all online sessions to significantly reduce churn rates.

INPUT1

REC ▶

Past movies
(over 6 months)

INPUT2

Churn history
data

I'm beside you
あなたの知らない、あなたがわかる

Finding features of churn users
from facial reaction, voice, line of sights ,etc

Verified Data model

REC ▶

I'm beside you
あなたの知らない、あなたがわかる

Daily video
data

Checking every
customer for
prediction of churn

Reducing churn
by prioritized
follow-up
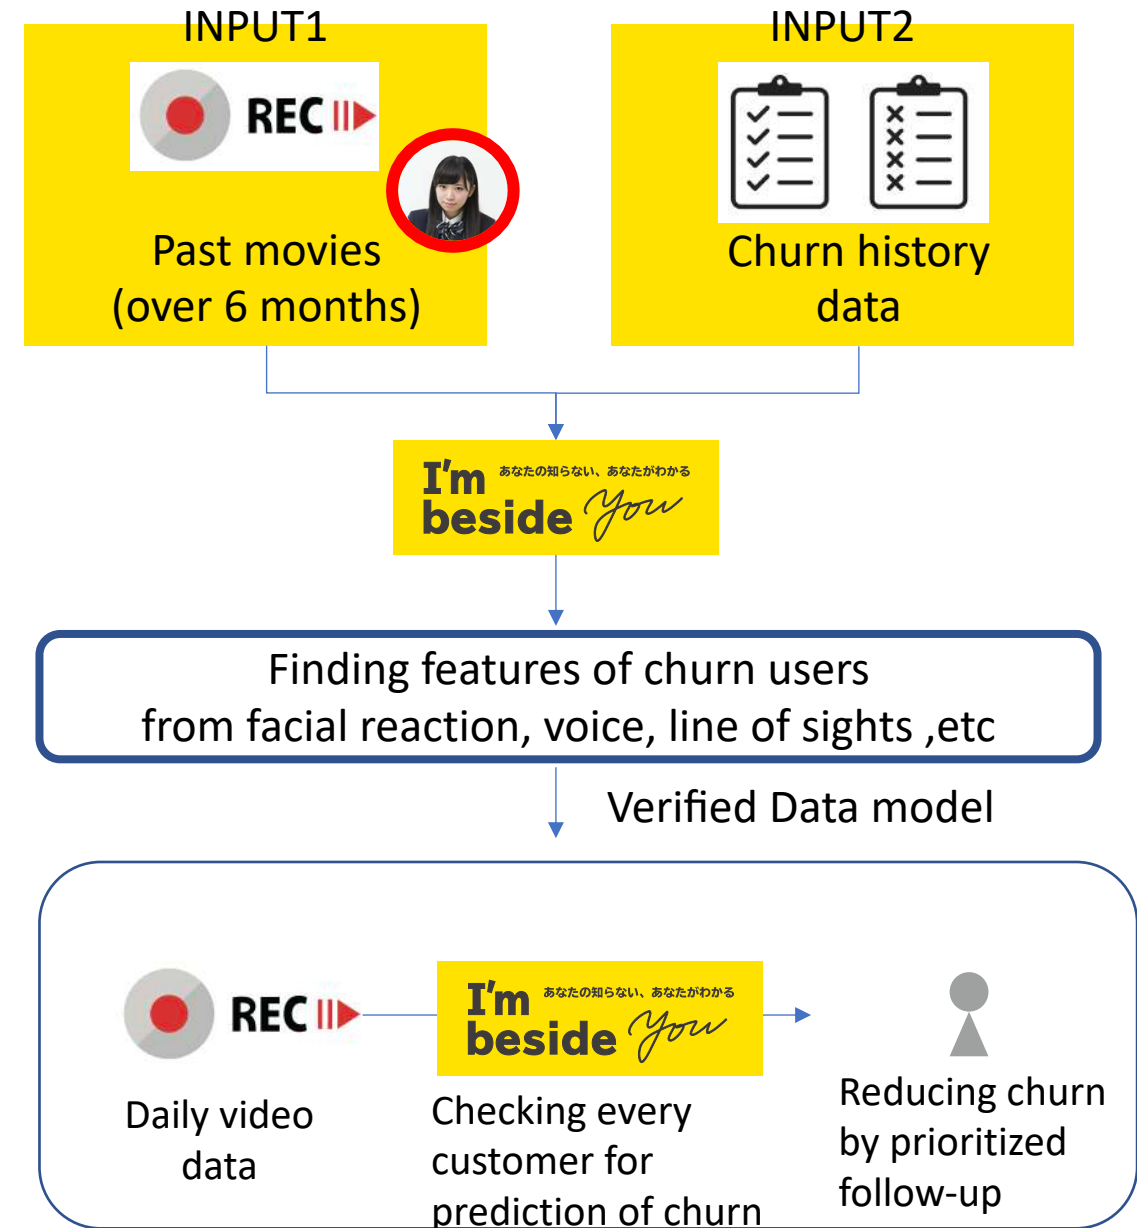

I'm beside you

Use case②

Accurate matching of teachers and students

INPUT1
REC ▶
recoreded videos
(over 6 months)

INPUT2
Characteristics
of
churn users

I'm beside You
あなたの知らない、あなたがわかる

Analyze teachers and student's behavior to derive the best matching pattern

Verified Data model

REC ▶
Video of
Job interview

I'm beside You

Check aptitude

Hiring the best teachers who are better suited to their students

REC ▶
Video of
student's class

I'm beside You

Match with teacher's data

Matching teachers to student characteristics

Use case③

Report on lesson summaries to parents and teachers

INPUT

Video of lessons

Summarize & Reporting

Report to parents

- Digest of lessons by smile/concentration scene

Report to teachers

- change point of students
- highlight video

Good atmosphere with teachers!

Looking back in Short term, good for self improvement

I'm beside you
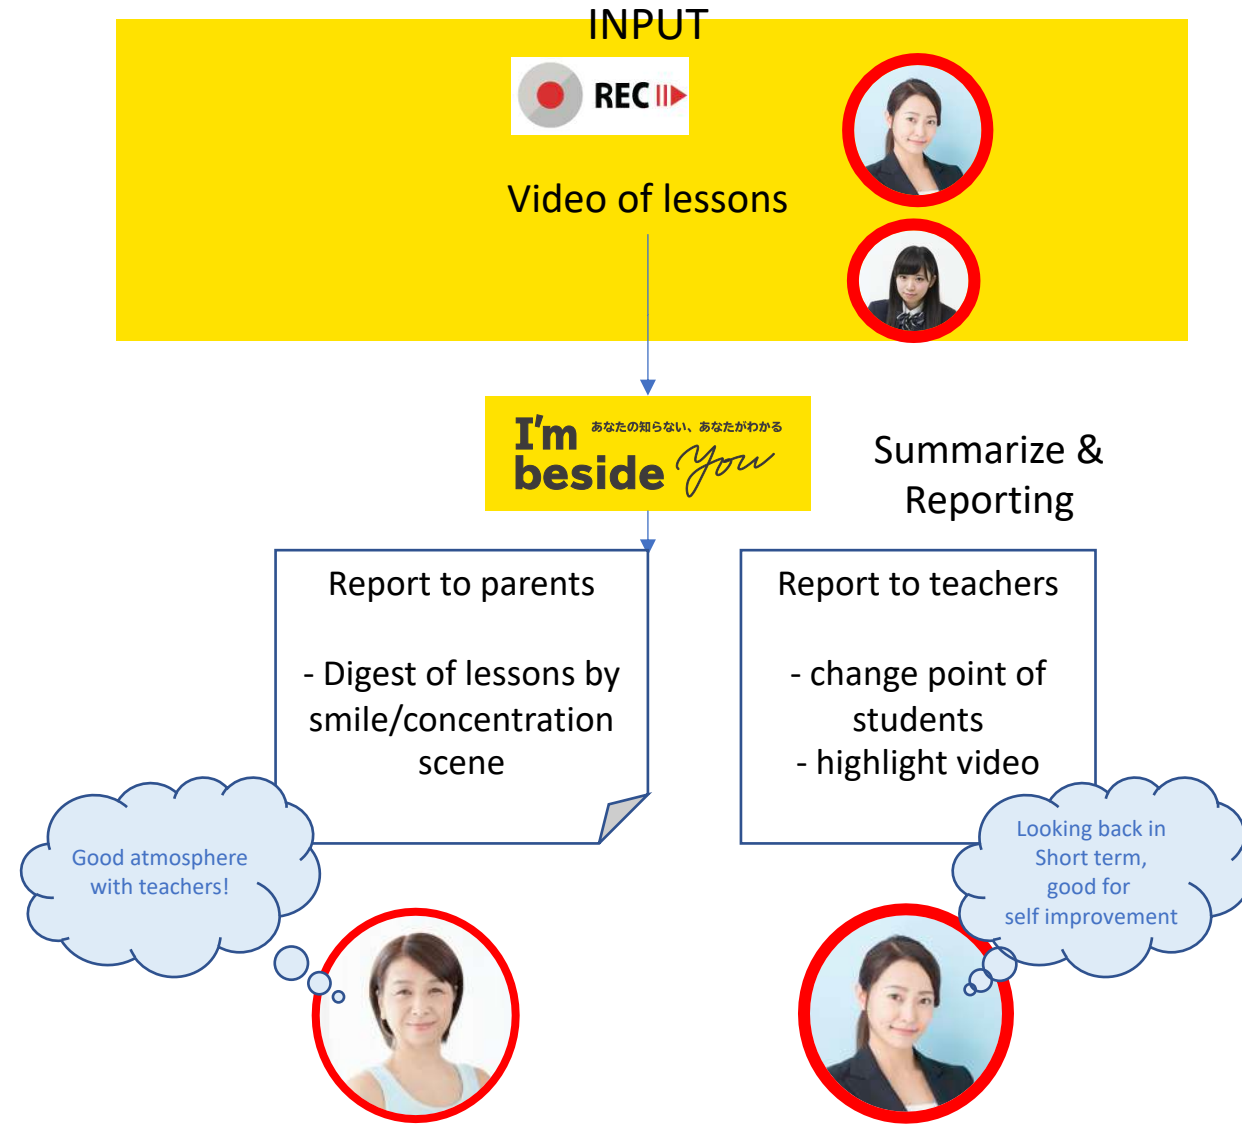

KEY POINT

Not "name identification",
"face identification"

Accumulate key face data for all types of online communication

··· any kind of video services

Make communication visible with no extra input of customer information, employee information, MTG minutes, etc.

Use cases - confirmed in the interviews

Education

- Identify students who are likely to drop (or cancel)
- Match students with compatible teachers
- Visualization of the target students' areas of interest

Sales

- Look back on your own sales habits and shorten the training period
- Improvement of order rate by client key person analysis

Employee satisfaction

- Analysis of understanding of organizational strategy
- Raising the field strength of high-performing teams by sharing communication best practices
- Advance detection of harassment

Marriage Activities

- Unique diagnosis of a good partner
- Retention and new customer increase by improving the number of matching

Online healthcare

- Improvement of support for elderly and child consultation

Virtual community

- Increasing referrals and preventing churn by increasing satisfaction

Traction
