

Analog Devices, Inc. (USA)

- ◆ An American multinational enterprise which produces semiconductor devices. It has experience being involved in the “Internet of Tomato project in New England” in the US.
- ◆ The company conducted experimental studies at a high-quality strawberry farm in Ibaraki Prefecture to construct a wireless platform for automation of agricultural processes. With this platform, environmental data (temperature, humidity, luminance, carbon dioxide concentration, etc.) is collected and displayed on a smartphone or tablet to estimate production and improve quality.
- ◆ With this technology, manual work to acquire cultivation information will be unnecessary in the future and the efficiency of farm work will be improved. It is expected to increase yields and invigorate domestic Japanese agriculture.

IoT (Agriculture)
