

Elekta K.K. (Sweden)

IoT (Medicine)

- ◆ A leading global company in radiotherapy headquartered in Stockholm, which provides advanced cloud solutions for radiotherapy devices and medical data management.
- ◆ The company conducted feasibility studies on commercialization of a service which enables the analyzing of data on system operating rates and details of diseases on a high speed cloud server and multiple data centers, while maintaining high security.
- ◆ With the introduction of this technology, it will be possible to improve the work efficiency of radiotherapy and conduct radiotherapy planning at a high system security level at hospitals. It is also expected to promote cooperation between hospitals in the future when the data management will be done smoothly at data centers, something which is currently dealt with individually by each hospital.

The Elekta logo consists of a stylized teal circle with three dots of varying sizes inside it, followed by the word "Elekta" in a bold, teal, sans-serif font.
