# **JETRO**

(1)Aomori Aomori offers one of the world's most diversified energy development and supply bases.

### Okayama

The clustering of the ultra precise manufacturing technology companies such as automobile, agricultural machinery and shipbuilding industries.

Ultraprecise manufacturing technology utilizing the knowledge accumulated in the fields of automobile manufacturing, agricultural machinery manufacturing and shipbuilding.

### Osaka city

Companies playing leading roles in environmental and new energy industries are concentrated mainly in the Osaka and Kansai region, particularly in the Osaka Bay area.

### Sakai city

Leading companies with excellent environmental technologies are transferring to Sakai's coastal area.

### Osaka

Companies in environmental and new energy industries are accumulating in the Osaka Bay area.

### Hiroshima

There has been dynamic creation of new industries through the concentration of environmental industries accompanying the development of heavy and cuttingedge industries.

### Kitakyushu city

Environmental energy industries are clustered here, which has overcome environmental pollution and has been chosen as an environmental model city.

### Saga

Promote the concentration of related industries that spread renewable energies, introduce electric automobiles, and develop the infrastructure.

Establishment of a hub of industryacademia-government collaborations specialized in functional health food development

### Kumamoto

Center of Silicon Island, semiconductor

### ⊘Hyogo

Healthcare and pharmaceutical-related companies and R&D centers are located at Kobe Medical Industrial City, there are also many new energy-relalated projects.

### (5)Kyoto

As the birthplace of the Kyoto Protocol to the United Nations Framework Convention on Climate Change, Kyoto's business, university and government communities are banding together to address environmental and energy-conservation issues.

### Nagahama city

Located immediately next to the Nagahama Institute of Bio-Science and Technology, the Nagahama Science Park provides an ideal environment for collaborative research.

### Shiga

A major industrial complex of the manufacturers of solar cell and lithium-ion batteries

### Nara

Creating an environment suitable for location of creative companies in the energy / environmental technology sector

## An industrial prefecture that is home

to major companies in basic material sectors (pulp, non-ferrous metals, chemicals, high-function fibers)

### Saijo city

Ehime

Developing the "City of Agricultural Innovation for Saijo" project and working

## 

Advanced smelting technologies are applied to the environment and recycling, to promote industries in harmony with the environment.

### Niigata city

<Niigata Port aiming to become a hub port along the Sea of Japan> ·Promoting use of Niigata Port as an international hub port Accumulating industries to the areas around the port

### ③Iwate

A large number of major semiconductor manufacturers and the companies in cooperation with these companies and trade partners are establishing facilities in the prefecture.

### Koriyama city

Fukushima Renewable Energy Institute, AIST was established and there are collaborations with many companies on renewable energy.

### Fukushima

It is working on the development of the state of the art technology helped by academy, industry and government collaboration, such as National Institute of Advanced Industrial Science and Technology(AIST)

Fukushima is working on the concentration of robot industry which has potential in disaster response, medical care, agriculture and physical distribution.

### (5)Gunma

Aggregation of "environment and energy related industries" creating environmental technologies and products related to energy saving ,new energy and the like.

### Sagamihara city

A succession of major companies excelling in the fuel cell and aerospace sectors have moved into Sagamihara city.

### Kawasaki city

Aiming to make an international contribution through the relocation of advanced and diverse environmental technologies and know-how

### Hamamatsu city

A center for transport equipment companies (automobiles, boatbuilding, aerospace, manufacturing/processing/breakthrough technology, etc.)

### Shizuoka city

Food, pharmaceutical and chemical companies have agglomerated. Research in the food science business is booming.

## INVEST JAPAN

related companies have located full-set industrial structure operations at Semicon Forest Kumamoto.

Kumamoto citv A cluster of semiconductor related industries due to its rich supply of groundwater.

on creating new industries that can utilize the city's resources through public and private cooperation

### Matsuyama city

The clustering of solar-related companies is advancing, and the city is working on further clustering of environment-related companies.

Toyota city

Aichi possesses a concentration of

automotive-related companies which is

next-generation automotive and

among the largest in the world.

Aichi

Toyota city defines the environment/energy fields as the key industry and provides the preferential system with doubled amount of incentives

### Tahara city

automotive-related industries clusters

### <sup>(4)</sup>Nagano

Nagano Prefecture boasts one of Japan's largest clusters of companies engaged in basic manufacturing technology, such as parts with advanced functions and advanced processing.

### Miyazaki

Growth of the next generation is promising.

### <sup>6</sup>Mie

the prefecture has developed medical valley initiatives since 2002 and is currently designated as a Special Zone for Mie Life Innovation by the government to promote medical and welfare industries in the prefecture.
