As of february 2017

The expressway network of approximately 9,145 km crisscrosses Japan with truck transportation systems using this expressway network to physically distribute products around the country.

< Evolving service areas (SA) on Japan's expressways >  
In general, Japan's SAs offer a variety of amenities such as sales shops of local products, hot springs and rest houses. These days, there are not only commercial complexes including restaurants, shops and highway hotels, but also parks, Ferris wheels, dog runs and an aquarium. SAs are now becoming popular tourist spots.
