Despite our best efforts to provide up to date and accurate information in this brochure, Japan External Trade Organization (JETRO) decline any responsibility for inaccurate, incomplete, or outdated information that may be printed in this pamphlet, and expressly disclaim any liability for errors or omissions in its contents.

JETRO is not liable for any damages which may occur as a result of using this directory.

Message from Chairman and CEO of JETRO

The Japan External Trade Organization (JETRO) is a government-related organization with a global network spanning over 70 regional offices abroad and over 40 offices within Japan. Using this network, JETRO contributes to two-way expansion of trade and investment between Japan and the rest of the world with our ability to connect between business and government, business and business and people and people.

One of our missions is to help small to medium-sized Japanese firms maximize their global export potential. Japanese medical device in particular, which has helped maintain Japan’s position as the country with the highest longevity in the world, has great potential to improve a wide variety of medical issues from those related to aging to life-style diseases which are affecting other countries as well.

In the growth strategy created by the Japanese government, JETRO is placed as a core organization playing a facilitating role in expanding overseas sales channels of Japanese medical device.

Under the auspices of the Ministry of Economy, Trade and Industry of Japan and relevant industrial groups, we have newly created a directory of Japanese companies which aspire to contribute to medical communities around the world, with the goal of further promoting high-quality Japanese products to overseas companies.

We heartily recommend you to contact any of the companies listed in this directory if you are interested in their business or products. You are certain to encounter the safe, usable and high-quality products which you are pursuing. Please do not hesitate to talk to us at JETRO if you have any questions.

It is our hope that this directory will help you to succeed in your future business.

Hiroyuki Ishige

Hiroyuki Ishige
Chairman and CEO
Japan External Trade Organization (JETRO)

What is JETRO?

JETRO, or the Japan External Trade Organization, is a government-related organization that works to promote mutual trade and investment between Japan and the rest of the world. Originally established in 1958 to promote Japanese exports abroad, JETRO’s core focus in the 21st century has shifted toward promoting foreign direct investment into Japan and helping small to medium-sized Japanese firms maximize their global business potential.

Introduction of Medical Excellence JAPAN

Medical Excellence JAPAN (MEJ) is promoting globalization of Japan's medical services as a public and private partnership. Specifically, in cooperation with the Japanese government, we will coordinate the networking among medical institutions, doctors and companies in Japan and governments and medical institutions of partner countries based on the medical issues and needs of partner countries. Furthermore, MEJ supports Japanese hospitals establishing medical institutions in partner countries as their business opportunities to provide advanced medical care in Japan to patients in partner countries.. Comprehensively, we offer long-term supports to provide Japan-style medical services continuously in partner countries.

Outbound activities of Medical Excellence JAPAN

Examples of our supports for establishing Pilot Projects conducted by Japanese Consortiums.

Public-Private Joint Missions and MEJ Seminars

MEJ has dispatched Japanese Public- Private Joint Missions to several countries for promoting Japan-style medical services with medical devices. Also, we have established human-networks with partner countries. Furthermore, we have held Medical seminars as part of the Public- Private joint Missions.

About the company and products

Through the fusion of chemistry and medical science, ASAH KASEI MEDICAL seeks new possibilities in response to people's faith and hope in healthcare entrusted with supporting human life.

Building on our membrane separation and adsorption technologies and standard regardless leveraging the business foundation of the Asahi Kasei Group, we develop innovative medical devices that expand therapeutic possibilities and provide bioprocess engineering solutions that elevate healthcare safety.

We contribute to realizing a world where everyone dealing with disease can confidently access healthcare of a high standard, regardless of nationality or culture. We do this by providing advanced healthcare solutions that will be appreciated by patients and their families as well as medical professionals and researchers.

Global activities

We have a growing global network to meet the needs of patients facing intractable diseases and chronic conditions, as well as medical professionals seeking new therapeutic possibilities and those involved in research and development.

We have the following subsidiaries.
 Asahi Kasei Medical Europe GmbH
 Asahi Kasei Medical (Hangzhou) Co., Ltd.
 Asahi Kasei Medical America Inc.
 Asahi Kasei Medical Trading (KOREA) Co., Ltd.

Blood Purification Equipment :
 Plasauto Σ is a multifunctional system for therapeutic apheresis and CRRT ideal for clinical sites.

Provided with a unique housing to optimize the dialysate flow and using Asahi's high-tech fiber, REXED dialyzers realize an outstanding clearance.

FUJIFILM
Value from Innovation
<http://www.fujifilm.com/>

Address	Midtown West, 7-3, Akasaka 9-chome, Minato-ku, Tokyo 107-0052, Japan				
Number of employees	78,150	Year of establishment	1934	Total sales	JPY 2,491.6billion
Products	[X-Ray(Computed Radiography / Digital Radiography, Digital Mammography, Dry Imager, Film and Screen)], [Endoscopy], [POCT(Point-of-Care Testing Products)], [Ultrasound Systems], [PACS(Picture Archiving and Communication System)]

Contact information	E-mail : gg-100-hc-outbound@fujifilm.com Contact person : Motohiro Naka, Masataka Yajima, Naoya Yamazaki Language: English, Japanese				

About the company and products

Based on photography technology, Fujifilm has been expanding our business to medical systems etc.

[X-Ray]

Leverage advanced image processing technologies, we supply systems that lowering radiation dosages as well as in image quality and compactness.

[Endoscopy]

We supply products that target not only the early detection and treatment but also the reduction of the physical burden.(Laser light source, Transnasal, and Double-balloon endoscopes etc.)

[POCT]

We supply POCT diagnosis systems that examine constituents and measure the amount of virus, with blood or other samples dropped into reagents.

[Ultrasound]

Leveraging the image processing and the producing small sized, robust devices technology, We are working to expand sales in the market of portable ultrasound equipment.

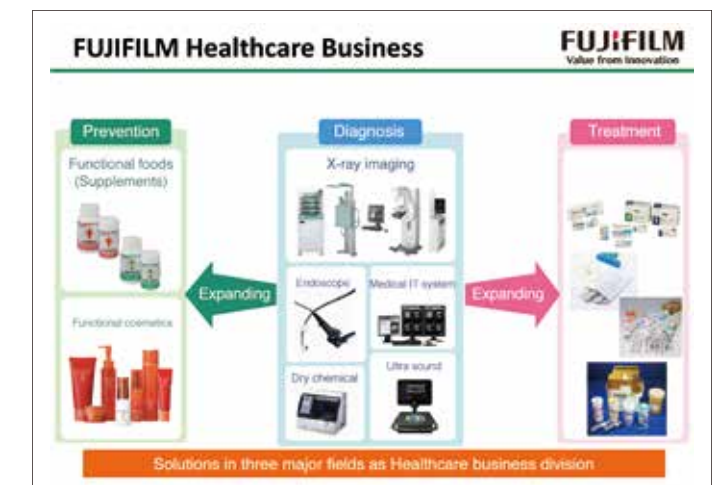

[PACS]

Leveraging proprietary image processing technologies and knowledge of diagnostic imaging, we provide a high-quality image suitable for diagnosis and also realizes high operational stability.

Global activities

The Fujifilm Group has grown into a global entity that maintains 271 consolidated subsidiaries and has consolidated overseas revenue accounting for 59.6%, or ¥1,485.8 billion, of total revenue.

In recent years, the Fujifilm Group has positioned such emerging countries as Brazil, Russia, India, and China (BRICs) as well as Turkey, the Middle East, Latin America, Africa, and Southeast Asia as priority markets.

Building on our pioneering diagnostic imaging technologies, we are expanding into the areas of preventive healthcare and treatment.

Each product for diagnosis, making full use of the unique technology, has been highly regarded worldwide and has won the top share of each field.

Fujikin Incorporated

http://www-ng.fujikin.co.jp/fujikinhp_e/

Portable probe.

Can be carried in a bag.

Hakuzo Medical Corporation

<http://www.hakuzo.co.jp/eng/index.php>

Address		2-4-9, Tokuicho, Chuo-ku, Osaka 540-0025, Japan					
Number of employees		275	Year of establishment		1953	Total sales	JPY 11.9billion
Products		A wide range of medical disposables such as infection control products, kits, gauzes, absorbent cottons, bandages, adhesive tapes, maternity products and silver care products.					
Product categories		 ophthalmic goods and related products	 surgical dressing and hygienic product	 medical apparatus for home use			
Contact information		E-mail : wee@hakuzo.jp TEL : +81-6-6809-4319 Language: English, Japanese					

About the company and products

Started with gauze manufacturing, Hakuzo Medical Corporation currently develop, manufacture and sell pharmaceuticals, quasi-drugs, medical devices, and cosmetics. The company also concentrates its development and sales efforts in infection control products that pack medicine and medical disposables together, kit products that comprise of different sort of medical disposables, obstetrics and gynecology related products, and bandage for hemostasis. We expand our operation not only domestically but also internationally, with focus on Asia.

One of the major infection control products, Push Swab Series packs the swab stick and the disinfectant separately. This is a very user-friendly product where the user only needs to push, soak, and take out to start using. Based on the single use concept, this product has contributed greatly to the decrease of contamination risks, and at the same time improves the efficiency in medical and nursing workplace, minimizes medical supply waste.

Push Swab Series packs the swab stick and the disinfectant separately. This is a very user-friendly product where the user only needs to push, soak, and take out to start using.

Global activities

We started to develop the Asian market with the support from some public institutions (JETRO, MEJ, etc.) by placing globalization as part of the company's strategic policy. We are currently exporting to China, Taiwan, Singapore, Malaysia, Thailand, Australia, Indonesia etc. We have set up a Representative office in Bangkok to help with our further overseas expansion. We are also planning to set up a plant in South East Asia.

Eleban Prestat is hemostatic product which can stop bleeding effectively for dialysis patients.

KONICA MINOLTA,INC

<http://konicaminolta.com>

Address	2-7-2 Marunouchi, Chiyoda-ku, Tokyo, Japan				
Number of employees	43,332	Year of establishment	1936	Total sales	JPY 1,031billion
Products	Cassette-Type Digital X-ray Imaging Systems , Diagnostic Ultrasound Systems				
Product categories	diagnostic imaging system related device and tool for diagnostic X-ray equipment measuring and monitoring system for biophenomena				
Contact information	E-mail : hc_query@konicaminolta.com Contact person : Noriharu Maruyama TEL : +81-42-589-1674 Language: English, Japanese				

About the company and products

About the company and products

Since our foundation in 1951, our mission is to improve the quality of life with advanced technology.

As a leading manufacturer of medical electronic equipment, Nihon Kohden provided a number of state of the art medical electronic equipment for clinical practice in the world.

We are expanding our activities into emergency care, home care and health promotion.

With the time, the structure of diseases in the society has changed and Japan enters into an aging society.

We respond to such changes and contribute to the world by fighting disease and improving health with advanced technology.

Global activities

Nihon Kohden products are used in more than 120 countries.

Since its founding in 1951, Nihon Kohden has continued to provide a wide range of medical electronic equipment, including EEG, EMG/EP measuring systems, electrocardiographs, bedside monitors, defibrillators and hematology analyzers. In particular Nihon Kohden has a high market share in EEG. Demand for medical equipment varies by country and region so the Company makes the most appropriate strategy for each region.

“Supporting the community with cutting edge sensing technology and innovative product line-up”

Nihon Trim Co., Ltd.

<http://www.nihon-trim.co.jp/english/index.html>

Address	22nd Floor, Herbis ENT Office Tower, 2-2-22, Umeda, Kita, Osaka, Japan				
Number of employees	435	Year of establishment	1982	Total sales	JPY 15.2billion
Products	Electrolyzed Hydrogen Water Apparatus				
Product categories	medical apparatus for home use				
Contact information	E-mail : taichi.goya@nihon-trim.co.jp Contact person : Taichi Goya TEL : +81-6-6456-4633 Language : English, Japanese				

About the company and products

Our Electrolyzed Hydrogen Water Apparatus is a controlled medical device. Its curative effect on gastrointestinal symptoms (i.e. diarrhea, constipation, etc) is acknowledged by Japanese Ministry of Health and Welfare. In 2015, we have achieved 64.5% of the market share in Japan.

Electrolyzed Hydrogen Water (EHW) is purified, alkaline water which contains hydrogen. In recent years, a growing number of research has demonstrated hydrogen's anti-oxidative abilities in human body cells. In the coming years, we will not only develop our comprehensive research on EHW's curative effect on gastrointestinal symptoms, but also elucidate other effects and functions of EHW. The core technology of our device has been applied to agriculture and stock raising, contributing to sound growth of vegetables and livestock. It is also applied to haemodialysis treatment, reducing physical burdens on dialysis patients. Each one of those fields can create a new business model.

Under-the-sink type. The stylish faucet is made by Grohe. Can produce fresh electrolyzed water. Filter included.

Global activities

Sales overseas began in recent years. We have subsidiaries in Guangzhou (China), Indonesia, Taiwan, and South Korea, and partners in other countries.

Our main product: Trim Ion Hyper. Easily attached to the faucet. Can produce fresh electrolyzed water. Filter included.

PSP Corporation.

PSP Corporation

<http://www.psp.jp.com/>

Address	4-16-13, Nishiazabu, Minato-ku, Tokyo, Japan		
Number of employees	290	Year of establishment	1989
Products	PACS, Reporting System, RIS		
Product categories	 diagnostic imaging system		
Contact information	E-mail : kaigai@psp.co.jp Contact person : Overseas Marketing Division TEL : +81-3-5485-1028 Language : English, Japanese		

About the company and products

PSP is a developer of medical systems. We have provided a wide range of systems for radiology departments such as PACS, Radiology Report, and Radiology Information System that follow international standards. These are a great help to radiologists and technicians for examination, diagnosis, and treatment. PSP stands for Public and social systems Solution Provider. Our concept is to provide advanced healthcare systems and ideas to achieve more comfortable life and help society. Therefore we constantly strive to deliver our superior, highly reliable, cutting edge, medical systems around the world.

PSP has worked with radiologists and studied their workflows for years to develop high-quality products that correspond to real clinical needs. From our experience, we have come to believe that their daily routines should be simple and speedy to meet their tight schedules. With this in mind, we design our systems to be more user-friendly and easier-to-use to facilitate their workflows.

Global activities

We have representative offices in Thailand, Singapore, and Nepal. We have distributors in Thailand, Singapore, Malaysia, Indonesia, Myanmar, Sri Lanka, Bangladesh, Mongolia, and soon in Vietnam to explore our overseas opportunities and provide our products in these markets. PSP Corporation. obtained FDA 510(k) approval for our PACS: EV Insite System and has been assessed and certified as meeting the requirements of ISO 13485.

Products	Diagnostic instruments, reagents and related software				
Product categories	● in vitro clinical test equipment				
Contact information	https://www.sysmex.com/Pages/default.aspx				

About the company and products

The diagnostics field involves instruments, reagents, and software for analyzing samples of blood, urine, and cells. Our instruments for hematology and coagulation tests enjoy a high reputation with customers, who place us as the number one brand in each market segment. By combining quality instruments with a broad range of other products and services, such as reagents, software, instrument maintenance services, and academic support, we are offering solutions that increase the efficiency and quality of laboratory operations.

In addition to expanding its operations in existing in vitro diagnostics (IVD) domains, Sysmex is taking initiatives in promoting personalized medicine in regard to respond the individual characteristics and primary care testing close to the patients. In the area of personalized medicine, Sysmex is developing companion diagnostic drugs related to drug regimens and new testing technologies for analyzing disease-derived cells, genes, proteins and other elements present in blood and bodily fluids (liquid biopsy).

Hematology instruments XN-Series and Sysmex's business process

Global activities

Through more than 40 sales and support bases around the world, Sysmex has established a regional sales and support network which is optimized for each market. As a comprehensive diagnostics supplier, we have created an integrated business which encompasses R&D, manufacturing, sales, and after-sales support to provide products and services to our customers in over 190 countries throughout the world.

Teijin Nakashima Medical Co., Ltd.

<http://www.teijin-nakashima.co.jp/en/>

Address	688-1, Joto-Kitagata, Higashi-ku, Okayama 709-0625, Japan		
Number of employees	217	Year of establishment	September 3, 2008
Products	artificial joint, bone fixation system, surgical instrument		
Product categories	 artificial internal organ apparatus and assist device  steel product for medical use		
Contact information	E-mail : h.ishizaka@teijin-nakashima.co.jp Language : English, Japanese		

About the company and products

We have entered into the medical device market in 1987, with applying the metal processing technology of Nakashima Propeller, a leading company of the marine-propeller field, and dealt with development, manufacturing and sales of Japanese-made joint prostheses.

And then, in April 2015, we marked a new step as Teijin Nakashima Medical Co., Ltd., accepting an investment from Teijin Limited, which has developed its business in the fields of pharmaceutical and home healthcare.

We will further develop the business by integrating Nakashima's core competencies in high-level metalworking and joint prostheses with Teijin's expertise in materials technology, primarily polymeric chemistry, and healthcare-related development and sales capabilities.

In order to contribute everyone's health to achieve the active and good life, Teijin Nakashima Medical is aiming to become a major manufacturer of Japanese-made joint prostheses while laying the groundwork for global expansion.

Product categories	operating equipment and supplies		
Contact information	E-mail : wakimoto-i@tokaimedpro.co.jp		

About the company and products

Tokai Medical Products, Inc was founded by Mr. Nobumasa Tsutsui, Entrepreneur Award winner. Tokai is an R&D oriented company active in the medical device field. Since its founding, Tokai's driving force has been to "save as many lives as possible" and its mission has been to reflect the opinions of research and development workers in the medical field from the patient's point of view. Our goal is to serve those who are suffering from illness and disease by dedicating all of our efforts to the development of high tech medical devices, including IAB catheter, micro catheter and embolic protection device.

Global activities

Tokai Carnelian, the best-selling micro catheter in Japan is now available in Europe, Asia and Latin America. World's smallest pediatric balloon is widely adopted in South East Asia while a unique curved PTA balloon is available in Taiwan and Korea. Japan's top-selling embolic protection balloon has been exported to Korea since 2011. A novel REBOA catheter will soon be launched worldwide. Tokai Medical Products Philippines, the first overseas factory started operation in 2015.

Products	Anti-decubitus air mattress system		
Product categories	● medical apparatus for home use		
Contact information	E-mail : info@airsupport-japan.com Contact person : Mio TAKAI TEL : +81-58-328-3131 Language : English, Japanese		

About the company and products

AIR SUPPORT developed a new anti-decubitus air mattress system based on the theme of "pressure redistribution" and "risk reduction". The air cells fit to the body line, and their shape and allocation realize the ideal distribution of body pressure. Also the newly developed "Ab cell" is installed around the sacrum, the location most at risk for bedsores. As the 3-layer Ab cell absorbs locally applied pressure, it prevents the body from sinking into the mattress or bottoming out.

Air mattress with a control unit which adjusts the inner pressure to match the body weight of the patient.

**New development
Ab-AIRCELL**

The newly 3-layer " Ab cell" absorbs the pressure around sacrum, as it prevents bottoming out.

About the company and products

Air Water has expanded business fields through own unique approach since its inception in 1929. We started business with industrial gases that are indispensable to manufacturing and with medical gases that are vital to hospitals and other places where lives are being saved, and then, expanded to chemicals, agriculture and food products, etc. Currently, Air Water Group has a number of employees and group companies. Also, our medical business field also has many group companies. We can provide stable supply of medical gases through supply networks around Japan and offer one-stop solutions for all types of services associated with hospital operation, including medical treatment devices, hospital facility construction, SPD (Supply, Processing and Distribution), contract sterilization and others to support medical staffs and patients. We can support the medical fields around the world by providing various solution services of each medical group company.

We provide needles created with technology and manufacturing culture of Japan to deliver safe and secure needles to more than 80 countries.

Global activities

We have focused on the domestic market in the medical field so far. We will expand medical business that has conducted in Japan to overseas from now on. Currently, our medical business field has 8 business locations (USA, China, Taiwan, Thailand, Vietnam, Malaysia, Singapore and Indonesia). In future, we will expand the business in the area above, especially focusing on South East Asia.

Full HD Camera for surgical field is the smallest and lightest, it captures a high-definition and beautiful video images with a deep depth of field.

About the company and products

We were able to launch this product into both Class 2 medical device manufacturing and marketing approval and Medical device manufacturing, We developed foot sole inspection equipment by making full use of mechatronics technology. Sole testers were developed to be used for diagnosis of diabetes and screening of fall risks, and at the same time we developed sole testers with a weight scale function, and finger-held testers for personal use at home with the cooperation of National Institute of Advanced Industrial Science and Technology, Showa University, Kobe University, Kyushu Institute of Technology, Tokyo healthcare University. Its features are (1) it can capture the state of health quantitatively, (2) because it is a stimulus due to extremely slight movement against the skin of the sole, it is painless and not invasive, it is safe without the fear of infection. As a completed form, we will operate as a cloud system (health management system) and realize "visualization of health".

Global activities

In addition to collecting information on Malaysia, Indonesia, Russia, India and Kenya, we are also working on commercialization with the cooperation of a strong Asia Net, Inc. who specializes in business in Asia, Middle East, and Africa. Especially in Kenya diabetes, a lifestyle disease, is becoming a social problem, and so we are trying to negotiate its commercialization with the local government. We are considering the collaboration with an inexpensive small electrocardiograph.

Sole Tester of Home; a sole tester able to operate with ones smart phone, with the addition of a weight scale function

Medical Sole Tester; Equipment to measure original tactile stimulus (misalignment of skin surface) easily and sensitively

About the company and products

Supersonic wave treatment device, EYE POWER solves your troubles of eyesight. This is a medical device that was researched & developed by ophthalmologists. It micro-massages your eyes, effectively releases the stiff ciliary muscle with its supersonic energy and improves the blood circulation, so that your decreased eyesight can be recovered.

- Relieves you from suffering eyestrain, decreased eyesight or VDT syndrome.
- Soft vertical wave vibration of 24000 times a second.
- Only putting on your eyelids 10 minutes a time, once a day will do.
- Built-in timer automatically informs you of the completion in 10min.

EYE-SUPPORT GLASSES is your best choice for improving ocular muscles. When watching TV, using computers, all you have to do is just to wear these glasses so that they may smoothen the movement of your ciliary muscles and prevent your vision impaired. Obtained patents in Japan, EU, U.S.A., Korea and Taiwan.

Global activities

We have personal customers such as ophthalmologists in several countries in Asia. We are now inviting sales agents globally.

EYE POWER , the supersonic wave treatment device, truly works for recovering or relieving your eyestrain or decreased eyesight. Simple, easy & safe !

EYE-SUPPORT GLASSES, reduces the burden of your eyes. Black part absorbs 100% of light and holds down a visible ray to 5%.

About the company and products

DGSHAPE Corporation was formed in 2016 by Roland DG Corporation, a global leading manufacturer of digital devices founded in 1981 and listed on the Tokyo Stock Exchange, as a wholly-owned subsidiary to develop and market the company's innovative 3D products. The DWX series dental milling machines and the DWP dental 3D printers contribute to improving the workflow efficiencies of fabricating high-quality dental prosthesis. For the medical industry, the MPX photo impact printers and the MR-1 barcode scanner offer the most versatile marking and scanning solution for medical parts marking and unique device identification medical equipment compliance. DGSHAPE Corporation is the only international brand, which has milling, 3D printing and photo impact printing, and that make DGSHAPE a unique and innovative brand.

The DWP-80S 3D printer and the DWX-52DC 5-axis milling machine improve the workflow efficiencies of dental prosthesis fabrication.

DWP-80S DWX-52DC

Global activities

Manufactured by the proprietary digital factory in Japan, the DGSHAPE products are distributed in over 200 countries and regions. Thanks to the true global network, which has been established since 1981, the company is known for its customer-oriented service and support through its 16 group companies and partners worldwide. DGSHAPE Corporation is committed to provide the highest customer satisfaction wherever it is needed.

The MPX-95 impact printer and the MR-1 scanner are designed for medical parts marking and unique device identification compliance.

<https://www.onis-app.com/en/>

Address	M2 Ginga, 5-8-31 Kinuta, Setagaya-ku, Tokyo, Japan

Product categories	● diagnostic imaging system ● related device and tool for diagnostic X-ray equipment		
Contact information	E-mail : tomoko.kato@dgcore.co.jp Contact person : Tomoko Kato(Regional Manager) TEL : (Chicago) +1(630)998-3363 (Tokyo) +81-3-5727-1064 Language : English, Japanese		

About the company and products

We, DigitalCore Corporation, is a manufacturer of PACS server and viewer software. Our current main product is "ONIS" version 3. ONIS3 can enable connections between PACS through DICOM communication regardless of PACS vendor. Since the year we release the first edition of ONIS, ONIS series has been downloaded by users all over the world. ONIS series has developed its functions throughout the years with the help of user experience. Finally ONIS has equipped itself with functions suitable for the internet era which we summarize as "PACS Bridge".

Global activities

Another notable feature of ONIS3 is that it realizes hi-speed communications within DICOM standards. This allows you to view medical images without stresses under lines with slow communication speed. ONIS can help medical personnel in the aspect of the building next-generation environment for reading medical images with many advanced features like "smart download", "viewer to MPEG4 for medical-use", and so on. With advanced features such as "smart download" "MPEG4 viewer for medical use" etc., ONIS can facilitate the constructing of the next-generation environment for reading medical images.

About the company and products

Over 100 years since the foundation in the year 1916, we have been developing numerous physiotherapy products. Our top quality products have been widely acclaimed in Japan and used in big sports events worldwide. We are never satisfied with the current situation. Cooperating with both the international and national research institutes, we will continue to improve and develop new products to create a healthier society. Our office will move in March 2018, so the address and phone number written on this directory will be changed.

To deliver high quality products, we are certified for ISO 13485 and the environmental management system policy ISO 14001. We have also passed the strict quality standards and specification such as CE marking, FDA and UL.

We have various physiotherapy products such as Electrotherapy, Ultrasound, Laser, Radio Frequency, Shockwave, Shortwave, Traction and so on.

Electroacupuncture products are also in our product range.

Global activities

We have dealt with over 400 local agents of more than 100 countries. We normally sold our products through local agents. However, we now have our local office in Shanghai and Hanoi, and will make factory in Vietnam within 2017. These facts show that we will accelerate overseas expansion more in the future.

About the company and products

Since its founding in 1916 in the ancient capital of Japan, Kyoto, MORITA has steadily grown as a specialist in dental health care, responding to the changing health care needs of our society. Having entered the 21st century, the health care industry is facing a wide variety of issues arising from an increasingly globalized, information-oriented and aging society.

We always put people at the center of our endeavors. The functionality of our equipment makes treatment easy and natural for the dentist and their assistant, and makes it more comfortable for the patient. Furthermore, we create a sound communication system for the patient and dentist. Taking advantage of the latest technology and of skills and knowledge that have been perfected by years of expertise, we create products that are kind and gentle to both the body and the mind.

About the company and products

Based on the founding spirit of "For People's Precious Life", JMS has been engaged in the development, manufacture, and sales of medical devices based on the viewpoints of both patients and medical professionals. Through these efforts, JMS has made the medical frontline safer and more efficient, contributing to improved medical care and better quality of life.

By leveraging globally optimal production locations, JMS strives to deliver consistent quality and reduce production costs of medical devices that have been highly rated, thereby gaining user's confidence. Furthermore, JMS has entered new fields, such as home health care and regenerative medicine.

Global activities

We manufacture products for domestic/overseas sales at production bases all over the world, and revitalizing medical care and economy in each region. We have a total of five production bases.

We supply products to more than 90 countries and regions including the Western countries, Asia, the Middle East, Latin America, and Africa. We also collect information from each area and provide feedback to the international business headquarters in Japan.

Infusion and Transfusion Therapy : Support for the safety of medical care with infusion products and enteral nutrition-related products

Hemodialysis and Peritoneal Dialysis : Total support for dialysis

Contact information	E-mail : kbm@kawamoto-sangyo.co.jp Contact person : Mr. Dai Hiratsuka TEL : +81-6-6943-8991 Language : English, Japanese				

About the company and products

Kawamoto Corporation is a leading manufacturer and seller of medical and sanitary material in Japan established more than a hundred years ago. We have supplied good quality products to both domestic and overseas for a long time. Currently we are focusing on the sales of products with excellent features such as Endoractor and Bemsheets.

Endoractor receive a good evaluation from many surgeons. Endoractor maintains an ideal surgical field by isolating the internal organs during laparoscopic surgery with the patient in the nearly horizontal position. This greatly reduces the physical risk to the patient during surgery. Bemsheets have about 50% market share in Japan. Bemsheets have two types of thick and thin and it enables neurosurgeons to use property depending on surgical cases. XR have high water absorbency to reduce the risk of damage to brain tissue. XD have flexibility to offer excellent utility and will not obstruct the view in a narrow operating field.

[ENDORACTOR] A new ideal sponge to retract the organs for laparoscopic surgery. Allows surgeons to do surgeries on patients lying flat to reduce risk.

Global activities

[Main Market] Middle East, EU, Asia, Africa, South America

Please feel free to contact us regardless of any area if you have any inquiry.

Thicker Pad BEMSHEETS™ XR

Thinner Pad BEMSHEETS™ XD

[BEMSHEETS XR/XD] Bemsheets is a neurosurgical sponge to protect the brain tissue for Neurosurgery. Excellent flexibility and high water absorbency.

Contact information	E-mail : k.katsube@x-raykinki.co.jp			

About the company and products

Our company is a well-established manufacturer having achieved remarkable results with X-ray-related apparatus developed on our own. Main plant and technical center in Kyoto play a pivotal role in all stages, from the development of cutting-edge technologies to product planning, design and manufacturing.

Core technology is represented by X-ray generators. As strength, we have complete in-house control over the design and manufacture of all products, together with our characteristic technologies, including downsize, high-voltage and high-resolution and so on. We are one of the few manufacturers possessing the technology to deliver in-house development, design and manufacturing of X-ray generator suppliers. Our generator is integrated into medical and NDT apparatus.

Target markets are primarily medical and industrial fields, where we deliver OEM and customized products. We apply in-house generators for these products, placing us in unique position among X-ray generator manufacturers.

Global activities

We are interested in ASEAN as a business partner.

Products	magnetic supportable device		
Product categories	● medical apparatus for home use		
Contact information	E-mail : t-komuro@nac.gr.jp Contact person : Takeshi Komuro TEL : +81-3-3702-8711		

About the company and products

We are a long-established manufacturer of designated controlled medical devices that is magnetic therapy equipment and electric potential treatment equipment. And also we are sticking to make in Japan from 40 years ago.

This is magnetic supporter to be attached to foot arch. It promotes blood circulation by the magnetic power. You can wear shoes and walk because it is thin and soft. You can use it even while you are in bed so you can do 24 hour foot care (please avoid using while bathing). You can use it in any scene such as sports, work, everyday life etc.

Magnetic force acts widely due to the unique magnet arrangement, N pole S pole alternating arrangement. Four permanent magnets with one foot and approximately 170 protrusions stimulate the soles of the feet to promote blood circulation. If you want to promote foot blood circulation smoothly, we recommend you to use this product.

About the company and products

Since our establishment in 1971, we have endeavored to be a company that brings "invisible to visible" "visible to recognition" and build the relevant "eye instruments." To this end, NIDEK has expanded our business within our three core fields : Ophthalmology and Optometry, Lens Edging and Coating. Moving from our original purpose of providing medical equipment for the prevention and early detection of disease, along with the related surgical equipment and products that reduce the burden on both patient and physician, NIDEK is adding to our focus the possibilities in the healthcare fields of regenerative and anti-aging (life-extension) treatments. NIDEK aims to continue being a leading company both in eye and health care and strive to provide our customers with excellent resources for a healthy and delightful life.

Products	SSP Therapy Unit, Inter Ferential Current (IFC) Therapy Unit, Traction Unit, Microwave Therapy Unit, Water Massage Therapy Unit		
Product categories	● therapeutic and surgical equipment		
Contact information	E-mail : boueki@nihonmedix.co.jp		

About the company and products

Nihon Medix Co., Ltd. was established in Japan in 1976 as a manufacturer of electrical therapeutic instruments, since which time it has offered high-quality medical instruments as a leading company of electrical therapeutic instruments in Japan.

Our overseas business was initiated over 30 years ago; commencing with the import of rehabilitation and physical therapy equipment. Currently, we export our products, mainly physical therapy equipment, to more than 20 countries, which have, in turn, particularly acclaimed and studied the potential of our SSP therapeutic instruments to reduce pain.

Silver Spike Point (SSP) therapy stimulates the acupressure points by placing SSP electrodes and electrifying low-frequency waves.

A product of a process seeking better therapeutic effects and ease of use.

About the company and products

Nippon Sigmoid Co., Ltd. is a leading company of orthopedic treatment, rehabilitation and diagnostic devices in Japan which was established in 1973. Following 3 medical devices are available.

a) Cold Therapy Device "Icing System CE4000"
Mostly applied to postoperative use in orthopedics to reduce swelling, bleeding, and pain. Precise temperature control (0-13°C) and continuous cooling by liquid circulation system minimize the swelling and bleeding amount.

b) Ultrasound Bone Healing System "Accellus mini"
Accellus mini is a world 1st and only wireless LIPUS device which can provide fractured patients to get 40% less treatment period. Non-invasive treatment for patients who have fresh, non-union, and delayed-union fractures.

c) Pocket-sized Ultrasound Imaging Device "miruco"
miruco is a simple designed ultrasound imaging device its battery lasts 3 hours with 7 inch display and its weight is only 460g.

Global activities

We have 3 subsidiaries (in the U.S, France, and China) for sales and distribution. Our initial prioritized region for medical device distribution is the Asian market, but not limited to any other market. Currently, we are on the process of applying for the product registration in some Asian countries. Icing System CE4000 and Accellus mini have been under CE marking process and expected to obtain it shortly.

"miruco", the pocket-sized ultrasound imaging device designed especially for everyday Point of Care diagnosis.

"Accellus mini", the world's 1st & only wireless LIPUS device for fracture healing.
"CE4000", the postoperative cold therapy device.

Innovating nursing care at night with new Organic LED light !

Organic LED Medical Care Light

Creating safer and more comforting delivery of care through innovative application of world's new technology

- Enables accurate examination of patient's facial color
- Allows glare-free, comforting light for patient monitoring without disrupting their sleep/rest
- Reduces risk of accidents with lights in dim work environment
- Provides easier physical movements with hands-free design
- Outstanding characteristics of 2 way color Organic LED

Small !
Size 7 x 6 cm

Creating safer & more comforting deliver of care in dim work environment

Scientific evidence of wavelength distribution for developed organic LED lighting panels

Consistent and even spectral distribution across different colors

Made in JAPAN

Takahata Electronics Corporation Ltd.,
1188 Kubota, Kubota-machi, Yonezawa-city,
Yamagata-pref. 999-2173, JAPAN

Not only using it by clipping on cloths etc., this light can stand by itself. Easy charging by USB.

Enables accurate examination of patient's facial color by glare-free, comforting OLED light for monitoring without disrupting their sleep or rest.

Global activities

Exhibited OLED Medical Care Light in REHACARE2016 held in Dusseldorf. Now under the process of selling this product in European market.

Specifications

- Light Source: Organic LED (Color Tunable Model)
- Brightness: 1500cd/m2 (highest, 3 strength levels)
- Color Temperature: 2800K/4200K
- Color Rendering: Ra90 (at 4200K) R* be referred to the Radar-chart
- Battery: Installed Li-ion Battery, 3.7V (replacement sold separately)
- Charge method: Using USB power cable
- Charge power: 8 hours (maximum brightness), 12 hours (standard), 24 hours (minimum)
- Charging Time: approx. 4 hours (for full charge)
- Dimensions: 72x61x15(mm) (plus clip-on holder)
- Weight: 67g (including clip)
- Switches: 3 (Power/Volume, Color change, Second LED)

Provides easier physical movements with hands-free design through clipping on cloth

Effect of organic LED light in mental aspect *

- Longer consultation time of mental patients with psychiatrists
- Creation of relaxing environment (by Yamagata University)
- Parasympathetic activation

* Quantitative results were shown in mental hospitals in Japan

Application field

With added assistance features for dim environment, high-quality OLED Medical Care Light is great for

- Delivery of care at nursing and hospital facilities
- Home-based nursing care
- Other household activities

Outstanding characteristics of color tunable organic LED

The product utilizes the newest OLED panels with color tunable function, which was specially developed for the nursing care application, providing very high color reproducibility. Radar-chart demonstrates that the reproducibility of OLED light is close to that of sunlight. Especially, for R9(Red), R13(Face color of Western), R15(Face color of Eastern), the color reproducibility is around 90% exhibiting accurate examination of patient's facial color in dim environment.

Color can be changed by switch immediately. 2800K color is for routine use without disturbing sleep. 4200K color is for accurate examination. R4 4200K color was selected based on already demonstrated and utilized light at the surgical operation as the best color reproducibility.

* All technical information of this paper are provided by the Pioneer OLED Device Corp.

Takahata Electronics Corporation Ltd.,
1188 Kubota, Kubota-machi, Yonezawa-city,
Yamagata-pref. 999-2173, JAPAN

Utilizes the newest OLED panels with color tunable function for nursing care, in order to find the symptom of abnormal change for each patient.

About the company and products

TANITA is the pioneer company of bio electrical impedance analysis devices to monitor body composition. We hold No.1 share in the industry in Japan. We provide our professional products for hospitals, fitness gyms, research institutes and also our consumer products for retailers. Furthermore we developed health management service based on a cloud IT system connected to measurement devices such as active meters or body composition monitors.

Global activities

TANITA sells its products in more than 120 countries located in North and South America, EU, Africa, Middle East, China and South East Asia. We have five subsidiaries in U.S.A, Netherlands, China, Hong Kong and India.

It contains PC software and touchscreen system, so it's easy to use without any expertise. Using 6 frequencies realizes strict accuracy.

It can make a segmental measurement with its 8 electrodes even at your home. So you can know which of your body parts you should train.

About the company and products

HD Medical Video Recorder UR-4MD
UR-4MD is the HD medical video recorder designed for quick set up and ease of use, yet includes a robust list of features and capabilities. With auto sensing video connections and automatic video resolution detection, set up is quick and easy. The front control panel allows users to intuitively record videos and photos in Full HD. A built in hard drive is included for reliable recording, data back-up and users can also simultaneously record to USB memory and hard drives to archive, share and playback on other devices and locations. UR-4MD is also Network capable.

About TEAC

Since 1953, TEAC has been well known for video, image and sound recording technologies, and now introduces medical imaging recorders. With the growth of minimally invasive and endoscopic surgery, having very reliable and high quality solutions for the recording and playback of medical videos and images that are used to explain, educate, and share has never been more critical.

Global activities

TEAC Medical Video Recorder is being supplied to the each region through TEAC Japan and subsidiaries.

About the company and products

Techno Medica is a world leader of automatic test tube preparation system in Japan.

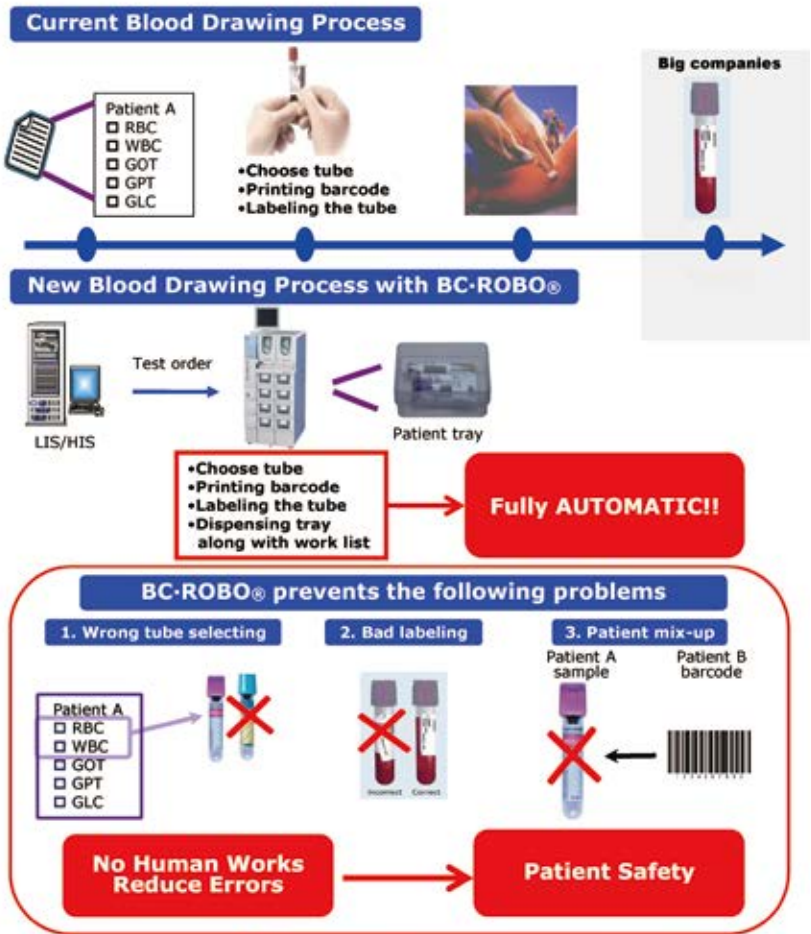

BC ROBO is designed to completely automate tube preparation jobs such as selecting blood collection tubes and applying barcode label on them. It prevents human errors such as patient mix-up and wrong tube selection and also frees phlebotomists from the high workload of tube preparation jobs. Its high throughput makes a great contribution on reducing patient waiting time and Turn-around-time, which eventually leads to better patient service.

Techno Medica is also one of the leading manufacturers of blood gas analyzer. The latest model GASTAT-700 Model provide a solution in critical care with its wide range of test parameters and high quality performance. Handheld model GASTAT-navi is recognized as strongly supportive tools in Point of Care scene in the worldwide market.

Global activities

We are interested to distribute in US, South America, EU, MENA countries which are missing part of our business.

Product categories	● medical apparatus for home use				
Contact information	E-mail : heat-patch@hosho.ne.jp Contact person : Kenta Yoshinari TEL : +81-3-3274-2435 Language : English, Japanese				

About the company and products

We are an original equipment manufacturer of Heat Therapy Patch. We were established in 1955 and have been engaged in this business for more than 25 years. Heat Therapy Patch is a product which you can have pain relief when you apply it to your skin. It activates by contact with air and generates heat by making use of the oxidization process of iron powder. The heat improves your blood flow and it makes you feel pain relief from sore muscles and joints. Our product is odorless and drug-free so it can be used without feeling uncomfortable. It's very easy to use. All you need to do is to open the outer pouch, take off the protective film, and then apply the patch directly to your skin. In about 5 minutes you can feel the heat and it continues for 5 to 8 hours with stable temperature. Since our factory is certified for ISO13485, we strictly control the quality of products so users can use it safely with confidence. Please feel free to contact us if you have any inquiry.

Heat Therapy Patches with regular, mini, and large size. We have been supplying our product in these shapes for more than 25 years.

Global activities

We are supplying our product to some countries in EU, North America and Oceania. We are interested in the countries in Northern Europe and CIS because we have not supplied to these countries yet. Our main target area is in developed countries but we also seek to have a chance in developing countries. The market for our product is expanding from the former countries to the latter of them. We believe there is a good potential for our product in many countries.

Heat Therapy Patches with the shapes of Jelly bean and Wing. If you're interested in another shape please feel free to contact us.

About the company and products

Yoshida was founded by Uhachi Yamanaka in Tokyo, Japan in 1906. At present, Yoshida is one of the oldest general dental equipment manufacturing companies in Japan. Our strength is "Creativity" as simply put. Once we come up with the new design, immediately we can incorporate the design into the product. Our strategy is simply, "we deliver" . Although we are a long established company, we have the vitality of a new venture, full of drive and motivation. We design and create! We have the technology to develop and produce our dental chairs, handpieces, X-ray equipment, CT, laser, MRI and more. And we hold No1. Market share for particular brands in Japan. Now, we need the right global partner to create health and happiness together. Let's find new value together.

EYECIA II

EYECIA II is the quietest, most comfortable chair we've ever designed. So even the most fearful patients can sit back and relax - and doctors can provide superior care.

About the company and products

For nearly 70 years, Topcon has specialized in eye care, improving human eye health through innovations in examination, diagnosis, and treatment.

Today, as a result of both rapid population growth and aging, we are seeing increased cases of major eye illness, skyrocketing medical costs, and a shortage of physicians. Aiming to resolve these problems, Topcon has applied ICT (Information Communication Technology) to eye care screening and prognosis management in order to promote early detection, early treatment, and remote diagnosis, thereby reducing overall medical costs. By expanding to prognostic management, Topcon is working to create new value for the future, contributing to the formation of an enriched society that will enable people to enjoy a high quality of life.

TOPCON Head Quarter in Tokyo, Japan

Global activities

Topcon has developed a global network of production, development, and sales locations. Furthermore, with a group workforce consisting of 65% non-Japanese employees and 90% non-Japanese company presidents at our overseas consolidated subsidiaries, we have established a system that enables us to select optimal regions for production and sales. This system helped us achieve a high overseas sales ratio of 79% in FY 2015.

About the company and products

Since our founding in 1927, we have been a part of the medical industry for more than 80 years, specializing in operation lamp manufacturing. We pride ourselves in working to "promote health and happiness in people's lives," using that philosophy as motivation to always present our customers with safe, cutting-edge products.

LED lighting is rapidly becoming popular in recent years. Characteristics of LED lighting are high illuminance and long life. On the other hand, other characteristics such as glare, eye strain are problems.

However, thanks to our latest innovative technology, our LED lighting is close to natural sunlight, and it became possible to provide eye protection (minimum eye strain) and recognize a difference of body organs during operation easily.

We always look ahead to the future and take much time and energy for researching and developing our new products. We commit to provide our customers the highest quality products.

Delivering optimal light even to deeper areas and soft design that puts patients at ease.

Standard model with a light-weight, thin design, equipped with Medical LEDs.

About the company and products

Yasui Co., Ltd. was founded in 1930 as manufacturing company. With over 80 years of history, we have expanded our business into printing, expanded polystyrene manufacturing, injection mold manufacturing and medical device manufacturing businesses by adapting to development of Japanese economy and changes in social environment. Especially in medical device field, nearly 50 years we have supplied plastic molded parts of medical devices i.e. dialyzer housing and others manufactured under clean room control and quality control of ISO 9001 and 13485 to medical device manufacturers. Recently we have focused to make original medical device products from design to manufacture. Koplight® combines a transparent resin molded blade produced with our injection molding technology and a highly illuminated compact LED illuminator. It is lighter in weight than the existing metallic retractors, nonconductive and enhances visibility of the dark operative field.

Cordless LED plastic retractor illuminates anywhere in the dark operative field.

Global activities

We exhibited Koplight® at MEDICA 2016 in Germany. Koplight® was highly evaluated and response we received was very positive. Koplight® is a medical device that can be used anywhere regardless of the types of operation, medical departments, medical facilities, and regions if batteries are available. We aim to actively expand distribution to overseas markets in the near future. ISO 13485 certification was obtained in May 2014 and CE mark is to be obtained within 2017.

Clear and high-flexural plastic LED retractor
