# FY 2018 Survey on the International Operations of Japanese Firms <br> - JETRO Overseas Business Survey - 

March 7, 2019
Japan External Trade Organization (JETRO)
Overseas Research Department

## Table of Contents

1. Profile of Respondent Firms ..... 3
2. International Trade ..... 10

- Diminished motivation to expand exports levels off while the ratio of responses with China as the mostimportant export destination increases -3. Overseas Expansion16
- While motivation to expand overseas business remains unchanged overall, an increased interest in China and the US is seen -

4. Effects of Trade Protectionism ..... 25
$\mathbf{- 2 4 \%}$ of firms anticipate negative effects from trade protectionism in the future, $\mathbf{7 0 \%}$ of which are consideringcountermeasures -
5. Utilization of Free Trade Agreements (FTA) ..... 34

- FTA utilization rate in exports rises to 48\%, with expanded usage by SMEs -

6. Utilization of Foreign Personnel ..... 40

- Approximately $\mathbf{6 0 \%}$ of SMEs are employing foreign personnel or are considering hiring them -

7. E-commerce (EC) ..... 47

- Usage of e-commerce in overseas sales expands, approximately $\mathbf{6 0 \%}$ feel they have benefited -

## Survey outline and profile of respondent firms

## Survey Outline

## 1. Survey targets

A total of 10,004 firms (headquarters) with interest in overseas business. The FY2018 survey covered 3,305 JETRO member firms plus 6,699 firms using JETRO services.
*This survey has been conducted annually since FY 2002, directed only at JETRO member firms. This year marked its 17th edition. From FY 2011, JETRO has expanded the number of subject firms.

## 2. Survey topics

I. Your Profile
II. International Trade
III. Overseas Expansion
IV. Effects of Trade Protectionism
V. Utilization of Free Trade Agreements (FTAs)
VI. Utilization of Foreign Personnel
VII. E-Commerce (EC)

## 3. Period

November 19, 2018 to January 4, 2019

## 4. Response

Number of valid replies: 3,385 (of which 1,234 are JETRO member firms) Valid response rate: $33.8 \%$
Definitions of large-scale firms, SMEs, etc.

|  | Manufacturing and other | Wholesale | Retail | Service |
| :---: | :---: | :---: | :---: | :---: |
| Large-scale firms | Firms other than SMEs | Firms other than SMEs | Firms other than SMEs | Firms other than SMEs |
| $\begin{array}{\|l} \hline \text { Large-scale firms } \\ \text { (excluding leading } \\ \text { medium-sized firms) } \\ \hline \end{array}$ | Large-scale firms other than leading medium-sized firms | Large-scale firms other than leading medium-sized firms | Large-scale firms other than leading medium-sized firms | Large-scale firms other than leading medium-sized firms |
| Leading medium-sized firms | More than 300 million but less than 1 billion yen, or more than 300 but less than 3000 employees | More than 100 million but less than 300 million yen, or more than 100 but less than 1000 employees | More than 50 million but less than 300 million yen, or more than 50 but less than 1000 employees | More than 50 million but less than 300 million yen, or more than 100 but less than 1000 employees |
| Small and medium-sized enterprises (SMEs) | 300 million or less, or 300 employees or less | 100 million or less, or 100 employees or less | 50 million or less, or 50 employees or less | 50 million or less, or 100 employees or less |
| SMEs (excluding micro-businesses) | SMEs other than microbusinesses | SMEs other than microbusinesses | SMEs other than microbusinesses | SMEs other than microbusinesses |
| Micro-businesses | 50 million or less, or 20 employees or less | 10 million or less, or 5 employees or less | 10 million or less, or 5 employees or less | 10 million or less, or 5 employees or less |

Note: The larger categories of "large-scale firms" and "SMEs" are based on the Small and Medium-sized Enterprise Basic Act.
The others have been defined by JETRO.

## Profile of respondent firms

|  | No. of firms | Share (\%) |
| :---: | :---: | :---: |
| All respondent firms | 3,385 | 100.0 |
| Manufacturing | 1,864 | 55.1 |
| Food \& beverages | 479 | 14.2 |
| Textiles/clothing | 101 | 3.0 |
| Wood \& woods products/furniture \& building materials/p aper \& pulp | 68 | 2.0 |
| Chemicals | 93 | 2.7 |
| Medical products \& cosmetics | 69 | 2.0 |
| Coal \& petroleum products/plastics/rubber products | 108 | 3.2 |
| Ceramics/earth \& stone | 30 | 0.9 |
| Iron \& steel/non-ferrous metals/metal products | 207 | 6.1 |
| General machinery | 164 | 4.8 |
| Electrical equipment | 96 | 2.8 |
| IT equipment/electronic parts \& devices | 55 | 1.6 |
| Cars/car parts/other transportation machinery | 99 | 2.9 |
| Precision equipment | 78 | 2.3 |
| Other manufacturing | 217 | 6.4 |
| Non-manufacturing | 1,521 | 44.9 |
| Trade and wholesale | 730 | 21.6 |
| Retail | 114 | 3.4 |
| Construction | 101 | 3.0 |
| Transport | 90 | 2.7 |
| Finance \& insurance | 81 | 2.4 |
| Communication, information \& software | 97 | 2.9 |
| Professional services | 60 | 1.8 |
| Other non-manufacturing | 248 | 7.3 |
| Large-scale firms | 615 | 18.2 |
| Large-scale firms (excluding leading medium-sized firms) | 151 | 4.5 |
| Leading medium-sized firms | 464 | 13.7 |
| Small and medium-sized enterprises (SMEs) | 2,770 | 81.8 |
| SMEs (excluding micro-businesses) | 1,138 | 33.6 |
| Micro-businesses | 1,632 | 48.2 |
| Firms with export operations | 2,465 | 72.8 |
| Firms with import operations | 1,823 | 53.9 |
| Firms with overseas bases | 1,528 | 45.1 |
| Domestic firms | 354 | 10.5 |

Note: "Domestic firms" are firms that do not conduct business overseas.

## Profile of respondent firms (status of export destinations)

Firms with export operations (total, by industry, by firm size)

|  | Currently exporting | $\begin{gathered} \text { Exports } \\ \text { only } \end{gathered}$ | Not currently exporting | Currently importing | Imports only | $\begin{gathered} \text { No } \\ \text { answer } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Total ( $\mathrm{n}=3,385$ ) | 72.8 | 26.1 | 26.7 | 53.9 | 7.1 | 0.5 |
| Manufacturing ( $\mathrm{n}=1,864$ ) | 85.2 | 30.7 | 14.5 | 59.5 | 5.0 | 0.3 |
| Food \& beverages ( $\mathrm{n}=479$ ) | 84.6 | 54.7 | 15.2 | 33.6 | 3.8 | 0.2 |
| Textiles/clothing (n=101) | 73.3 | 22.8 | 25.7 | 68.3 | 17.8 | 1.0 |
| Wood \& woods products/furniture \& building materials/paper \& pulp ( $\mathrm{n}=68$ ) | 79.4 | 26.5 | 20.6 | 60.3 | 7.4 | 0.0 |
| Chemicals ( $\mathrm{n}=93$ ) | 96.8 | 20.4 | 3.2 | 77.4 | 1.1 | 0.0 |
| Medical products \& cosmetics ( $\mathrm{n}=69$ ) | 94.2 | 47.8 | 5.8 | 50.7 | 4.3 | 0.0 |
| Coal \& petroleum products/plastics/rubber products (n=108) | 86.1 | 21.3 | 12.0 | 66.7 | 1.9 | 1.9 |
| Ceramics/earth \& stone ( $\mathrm{n}=30$ ) | 70.0 | 23.3 | 30.0 | 60.0 | 13.3 | 0.0 |
| Iron \& steel/non-ferrous metals/metal products $(\mathrm{n}=207)$ | 79.7 | 21.3 | 19.8 | 66.7 | 8.2 | 0.5 |
| General machinery ( $\mathrm{n}=164$ ) | 93.3 | 20.7 | 6.7 | 74.4 | 1.8 | 0.0 |
| Electrical equipment ( $\mathrm{n}=96$ ) | 92.7 | 22.9 | 7.3 | 71.9 | 2.1 | 0.0 |
| IT equipment/electronic parts \& devices ( $\mathrm{n}=55$ ) | 89.1 | 10.9 | 10.9 | 80.0 | 1.8 | 0.0 |
| Cars/car parts/other transportation machinery ( $\mathrm{n}=99$ ) | 82.8 | 10.1 | 17.2 | 74.7 | 2.0 | 0.0 |
| Precision equipment ( $\mathrm{n}=78$ ) | 92.3 | 24.4 | 7.7 | 71.8 | 3.8 | 0.0 |
| Other manufacturing ( $\mathrm{n}=217$ ) | 81.1 | 24.4 | 18.9 | 63.6 | 6.9 | 0.0 |
| Non-manufacturing ( $\mathrm{n}=1,521$ ) | 57.7 | 20.4 | 41.6 | 46.9 | 9.7 | 0.7 |
| Trade and wholesale ( $\mathrm{n}=730$ ) | 82.7 | 22.3 | 17.1 | 71.9 | 11.5 | 0.1 |
| Retail (n=114) | 57.9 | 35.1 | 39.5 | 36.8 | 14.0 | 2.6 |
| Construction (n=101) | 34.7 | 20.8 | 65.3 | 26.7 | 12.9 | 0.0 |
| Transport (n=90) | 30.0 | 5.6 | 70.0 | 30.0 | 5.6 | 0.0 |
| Finance \& insurance ( $\mathrm{n}=81$ ) | 4.9 | 1.2 | 93.8 | 4.9 | 1.2 | 1.2 |
| Communication, information \& software ( $\mathrm{n}=97$ ) | 32.0 | 12.4 | 67.0 | 23.7 | 4.1 | 1.0 |
| Professional services ( $\mathrm{n}=60$ ) | 26.7 | 18.3 | 71.7 | 18.3 | 10.0 | 1.7 |
| Other manufacturing ( $\mathrm{n}=248$ ) | 37.9 | 23.4 | 60.5 | 22.2 | 7.7 | 1.6 |
| Large-scale firms ( $\mathrm{n}=615$ ) | 67.5 | 7.8 | 32.2 | 63.9 | 4.2 | 0.3 |
| Large-scale firms (excluding leading medium-sized firms) ( $\mathrm{n}=151$ ) | 69.5 | 7.3 | 30.5 | 68.9 | 6.6 | 0.0 |
| Leading medium-sized firms ( $\mathrm{n}=464$ ) | 66.8 | 8.0 | 32.8 | 62.3 | 3.4 | 0.4 |
| SMEs ( $\mathrm{n}=2,770$ ) | 74.0 | 30.2 | 25.5 | 51.6 | 7.8 | 0.5 |
| SMEs (excluding micro-businesses) ( $\mathrm{n}=1,138)$ | 74.1 | 20.2 | 25.7 | 61.1 | 7.2 | 0.2 |
| Micro-businesses ( $\mathrm{n}=1,632$ ) | 74.0 | 37.1 | 25.3 | 45.0 | 8.2 | 0.7 |

Note: 1) $\mathrm{n}=$ the total number of respondent firms. 2) Exports/Imports include indirect exporting/importing through other firms. 3) "Exports Only" refers to firms with export operations excluding firms currently importing. 4) "Not currently exporting" refers to firms other than firms with export operations and firms with no answer. 5) "Imports Only" refers to firms with import operations excluding firms currently exporting.

Export destinations of exporting firms

## Profile of respondent firms (status of overseas bases)

Firms with overseas bases (total, by industry, by firm size)

|  |  | With overseas bases | Without overseas bases | No answer |
| :---: | :---: | :---: | :---: | :---: |
| Total ( $\mathrm{n}=3,385$ ) |  | 45.1 | 54.4 | 0.5 |
|  | Manufacturing ( $\mathrm{n}=1,864$ ) | 46.1 | 53.6 | 0.3 |
|  | Food \& beverages ( $\mathrm{n}=479$ ) | 22.5 | 77.2 | 0.2 |
|  | Textiles/clothing ( $\mathrm{n}=101$ ) | 43.6 | 55.4 | 1.0 |
|  | Wood \& woods products/furniture \& building materials/paper \& pulp ( $\mathrm{n}=68$ ) | 36.8 | 63.2 | 0.0 |
|  | Chemicals ( $\mathrm{n}=93$ ) | 67.7 | 32.3 | 0.0 |
|  | Medical products \& cosmetics ( $\mathrm{n}=69$ ) | 36.2 | 63.8 | 0.0 |
|  | Coal \& petroleum products/plastics/rubber products ( $\mathrm{n}=108$ ) | 59.3 | 38.9 | 1.9 |
|  | Ceramics/earth \& stone ( $\mathrm{n}=30$ ) | 40.0 | 60.0 | 0.0 |
|  | Iron \& steel/non-ferrous metals/metal products ( $\mathrm{n}=207$ ) | 49.8 | 49.8 | 0.5 |
|  | General machinery ( $\mathrm{n}=164$ ) | 56.7 | 43.3 | 0.0 |
|  | Electrical equipment ( $\mathrm{n}=96$ ) | 65.6 | 34.4 | 0.0 |
|  | IT equipment/electronic parts \& devices ( $\mathrm{n}=55$ ) | 67.3 | 32.7 | 0.0 |
|  | Cars/car parts/other transportation machinery ( $\mathrm{n}=99$ ) | 77.8 | 22.2 | 0.0 |
|  | Precis ion equipment ( $\mathrm{n}=78$ ) | 57.7 | 42.3 | 0.0 |
|  | Other manufacturing ( $\mathrm{n}=217$ ) | 46.1 | 53.9 | 0.0 |
|  | Non-manufacturing ( $\mathrm{n}=1,521$ ) | 44.0 | 55.3 | 0.7 |
|  | Trade and wholesale ( $\mathrm{n}=730$ ) | 44.5 | 55.3 | 0.1 |
|  | Retail ( $\mathrm{n}=114$ ) | 30.7 | 66.7 | 2.6 |
|  | Construction ( $\mathrm{n}=101$ ) | 47.5 | 52.5 | 0.0 |
|  | Transport ( $\mathrm{n}=90$ ) | 66.7 | 33.3 | 0.0 |
|  | Finance \& insurance ( $\mathrm{n}=81$ ) | 46.9 | 51.9 | 1.2 |
|  | Communication, information \& software ( $\mathrm{n}=97$ ) | 43.3 | 55.7 | 1.0 |
|  | Professional services ( $\mathrm{n}=60$ ) | 43.3 | 55.0 | 1.7 |
|  | Other manufacturing ( $\mathrm{n}=248$ ) | 38.3 | 60.1 | 1.6 |
|  | Large-scale firms ( $\mathrm{n}=615$ ) | 83.1 | 16.6 | 0.3 |
|  | Large-scale firms (excluding leading medium-sized firms) ( $\mathrm{n}=151$ ) | 92.1 | 7.9 | 0.0 |
|  | Leading medium-sized firms ( $\mathrm{n}=464$ ) | 80.2 | 19.4 | 0.4 |
|  | SMEs ( $\mathrm{n}=2,770$ ) | 36.7 | 62.8 | 0.5 |
|  | SMEs (excluding micro-businesses) ( $\mathrm{n}=1,138$ ) | 50.2 | 49.6 | 0.2 |
|  | Micro-businesses ( $\mathrm{n}=1,632$ ) | 27.3 | 71.9 | 0.7 |

[^0]2) Agencies are not included in overseas bases.

## Country and region of overseas bases

## Most firms answered that their proportion of overseas sales was 1 to $20 \%$

Out of firms performing exports or expanding overseas, the proportion answering that their overseas sales accounted for 1 to $20 \%$ of their overall sales was the highest, at $58.2 \%$.The average proportion of overseas sales was $18.7 \%$. By industry, this exceeded $30 \%$ of overall sales for IT equipment/electronic parts \& devices (35.6\%), cars/car parts/other transportation machinery (33.4\%), and precision equipment ( $30.6 \%$ ).

## Proportion of overseas sales for FY 2017 (total, by industry, firm size)

|  |  | Percentage of overseas sales |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $\begin{array}{\|c\|} \hline \text { Less than } \\ 1 \% \\ \hline \end{array}$ | 1-20\% | 21-60\% | $\begin{gathered} 61- \\ 100 \% \\ \hline \end{gathered}$ |
| Total | ( $\mathrm{n}=2,481$ ) | 14.1 | 58.2 | 19.7 | 7.9 |

Nearly $30 \%$ of firms doing business targeted at international visitors to Japan, $60 \%$ plan to expand this business

When asked about business targeting international visitors to Japan (see notes), $28.9 \%$ of firms answered they were already active in this field. In response to being asked about their efforts regarding this in the near future (next 3 years or so) $59.2 \%$ answered that they planed to expand their business (a figure combining firms who "Plan to expand further" $(20.8 \%)$ and "Intend to begin new business" $(38.4 \%)$ ). Note: Limited to sales/services being offered in Japan

## Approx. 30\% are collaborating with overseas firms/universities/research institutes

When aiming to create new businesses, business models, or products/services, the percentage of firms answering they "utilize resources in own firms (technologies, human resources etc.)" is the largest (79.4\%). The response rate of firms answering that they would collaborate with domestic firms/universities/research institutes is $49.6 \%$, compared to $27.3 \%$ for overseas locations. In terms of countries/regions that were being targeted for collaboration, China received the highest percentage of answers at $36.3 \%$ This was followed by the US, Taiwan, and Vietnam.

firms (excluding startups)" and "collaborate with overseas university/research institute". 2) The
table only shows countries/regions where the number of respondent large-scale, small and mediumsized, manufacturing and non-manufacturing firms is 10 or more.

## More than half considered personnel and local business partners to be challenges

When asked about challenges relating to overseas business (exports/overseas expansion) the majority answered "employees that can deal with overseas business" ( $54.5 \%$ ). The percentage for "local business partners" ( $54.2 \%$ ) had increased compared to previous surveys. By firm size, the majority of large-scale firms answered that "employees that can deal with overseas business" was their biggest challenge ( $67.3 \%$ ) with small and medium-sized enterprises answering "local business partners" ( $54.9 \%$ ).

Note: 1) $n=$ the total number of respondent firm.
2) There was no selection for "level of awareness of product/brand" in the FY 2013 survey.

## 2. International trade

- Diminished motivation to expand exports levels off while the ratio of responses with China as the most important export destination increases -

## Diminished motivation to expand exports levels off

Regarding export policies over the next three years or so, $81.2 \%$ of firms answered that they would expand exports. (This figure combines firms "planning to further expand exports" [70.5\%] as well as those "intending to begin exports" [10.6\%]). The proportion of firms that are willing to expand exports continued to decline from the peak of FY2015 (84.9\%), dropping below $80 \%$ in FY2017 (79.4\%), but leveling off in FY2018. However, amongst the respondents there were firms who commented that they wanted to prioritize their domestic business or lacked the personnel necessary for export expansion, so the response rate did not reach the peak seen in FY 2015.

## Response rate with China as export target destination in the future increases

The largest number of firms are planning to expand exports or begin exports to China ( $58.4 \%$ ), followed by the US ( $42.3 \%$ ) and Thailand ( $41.2 \%$ ). The percentage of firms choosing China as export target countries and regions increased compared to the previous survey (FY 2016). Per sectors, the percentage of manufacturing firms choosing China, Taiwan, and Western Europe increased . Compared with FY 2016, the percentage of non-manufacturing firms choosing China and Vietnam increased, and Vietnam rose to second place from third place.

Export target countries and regions in the future (total, time series)

Note: 1) $\mathrm{n}=$ number of firms answering "planning to expand exports" or "intending to begin exports". 2) Only top 10 countries and regions that gained higher percentages concerning the question on "export target countries and regions in the future" in the FY2018 survey are dsplayed.

Large increase in response rate with China as the most important export destination in the future
With regard to the most important export destinations among target countries and regions, $28.1 \%$ of firms planning to expand exports in the future selected China This is followed by the United States (14.7\%) and Vietnam (8.0\%). Compared with the previous survey in FY2016, the proportion for China has greatly increased from $19.8 \%$. Looking at the reasons why China was selected as the most important export destination, $92.2 \%$ answered that it was due to increased demand, far exceeding other reasons.

## Increase in proportion of firms who see Chinese firms as rivals

When examining rival firms at the top ranking export destinations, there has been a sharp increase in the number of firms who are focused on Chinese rivals compared to the previous survey (FY2012). When asked about the competitiveness of rival firms at their largest export destination, the number that answered "price/cost competitiveness" for Chinese rivals and those that answered "powerful brand name" for US and European firms was comparatively high.

Competitiveness of rival firms at largest export destination (by firm nationality)

|  |  | No. of firms | Price/Cost competitiveness | Distribution network (Agency network etc.) | Powerful brand name | Product lineups | Quality | Ties/linkages with local governments | Human resources | A swift decisionmaking process in management | Other | Not particularly |

## 3. Overseas expansion

- While motivation to expand overseas business remains unchanged overall, an increased interest in China and the US is seen -

## Motivation to expand overseas business remains unchanged

Regarding overseas business (direct investment) expansion policies over the next three years or so, the ratio of firms "planning to expand overseas business" came to $57.1 \%$, remaining the same as the previous year. (This figure combines firms "planning to further expand overseas business" [32.9\%] and those "intending to begin overseas business" [24.2\%]). By firm size, the proportion of largescale firms who answered "planning to expand overseas business" was $63.3 \%$, an increase from $61.6 \%$ in the previous year. On the other hand, small and medium-sized enterprises answered $55.7 \%$, approximately the same as for the previous year (56.1\%). Regarding factors for motivation to expand remaining the same, many respondents pointed out a shortage of human resources. At the same time, a notable portion of firms answered that they are relying on exports to meet overseas demand.

Future overseas expansion policy (total)

## Future overseas expansion policy (SMEs)

Note: 1) n = the total number of respondent firms, excluding firms answering "no answer" 2)The answer "planning to expand overseas business" for FY 2012 and 2011 is the proportion of firms who responded "plan to newly invest overseas or expand existing business".

## Domestic business expansion remains high

In terms of domestic business expansion policies for future (next 3 years or so), the proportion of firms who responded "Expand operations" was $60.7 \%$, maintaining the same level as the previous year $(61.4 \%)$. By firm size, the proportion of large-scale firms who answered "Expand operations" was $59.6 \%$, an increase from $57.1 \%$ in the previous year. Small and medium-sized enterprises answered $60.9 \%$, exceeding $60 \%$ as in the previous year ( $62.4 \%$ ). When asked about their reasons for domestic expansion, many answered that it was a response to increased demand for their firms' products or services, as well as increased inbound tourism demand.

Future domestic business expansion (total)

Future domestic business expansion (SMEs)

## High motivation for overseas expansion for medical products \& cosmetics

The industry with the highest motivation to expand overseas continues to be medical products \& cosmetics, at $71.2 \%$. Firms commented on increased demand for Japanese-produced cosmetics and expectations regarding future overseas market growth as their reasons for this motivation. When compared to the previous year, there was also increased motivation for expansion from a variety of manufacturing industries including general machinery and electrical equipment.

 have overseas bases and are planning to expand them further in the future and those reporting that they currently have no overseas bases but intend to begin overseas business in the future.

## Motivation to expand business in China increases, Vietnam maintains 2nd place

Regarding the countries and regions where firms aim to expand business overseas, China's ratio rose to $55.4 \%$, compared with $49.4 \%$ the previous year, out of firms who answered "currently have an overseas base and planning to further expand operations". This is the first rise in China as an answer since data began being collected in FY2011. Vietnam saw a decrease from $37.5 \%$ to $35.5 \%$ compared to the previous year, but still maintained its ranking as 2 nd place.

## Motivation to expand business in the US shows growth

Regarding the countries and regions where firms aim to expand business overseas, the US, for which there was a reduced desire to expand business the previous year, motivation to expand increased, particularly in the manufacturing industry, rising from the previous year $(29.0 \%$ ) to $32.3 \%$. Firms commented on the market size, as well as the need to respond to demand from client companies, including Japanese corporations. In China, which also saw an increase, reasons included the market size and growth potential. There were high expectations for Asia as a location for business expansion. However, the gradual decrease in desire amongst the ASEAN6 countries continued. Although Vietnam had stood out for its increases in previous years, there was a slight decline this year. In emerging markets other than Asia, there was a continued decrease in motivation for expansion in Mexico in both manufacturing and non-manufacturing industries.

## Countries/regions for overseas expansion

Note: 1) Parameters for FY 2011 and 2012 are firms that answered they "plan to newly invest overseas or expand existing business" minus the firms that didn't answer about the functions they would expand. Parameters from 2013 onwards are the firms that answered "currently have an overseas base and planning to further expand operations" minus those that didn't answer about expansion functions. 2) ASEAN6 firms that answered any of the following 6 countries: Singapore, Thailand, Malaysia, Indonesia, Philippines, Vietnam. From FY 2017 onwards, "Western Europe" applies to firms that selected the UK or Western Europe (excluding UK) There was no selection for South Africa in 2013's survey. 3) Proportion of number of firms who plan to expand one or more of their functions in each country/region. Still counted as one firm even when expanding multiple functions in one country/region.

## Countries/regions for overseas expansion (by industry)

## China in top place for many industries, US rises to second place for manufacturing

Regarding business expansion by industry, many industries listed China as the region that they most wanted to expand into. Motivation in China increased over the previous year, mainly in manufacturing sectors such as precision equipment and textiles/clothing. In the US, there was increased motivation to expand businesses in precision equipment and medical products $\&$ cosmetics sectors, with the position rising from 3rd to 2 nd for manufacturing.

 firms). 5.Yellow highlighted cells are countries/regions that have seen an increase of $10 \%$ points or more since FY 2017.

## 4. Effects of trade protectionism

- 24\% of firms anticipate negative effects, $70 \%$ of which are considering countermeasures -

## $24 \%$ of firms anticipate negative effects from trade protectionism

At the time of the survey, $43.1 \%$ of firms indicated there was "no impact" on their business regarding trade protectionism since 2017. This was followed by those which did not know (28.0\%) and those expecting an overall negative impact ( $15.2 \%$ ). Regarding the outlook for the future (about two to three years), while "no impact" has decreased to $15.9 \%$, "unknown" has increased to $42.0 \%$ and "overall negative impact" increased to $24.4 \%$.
Compared to SMEs, the response rates for "overall negative impact" are higher for large-scale firms for both periods ( $23.7 \%$ at the time of the survey, and $34.5 \%$ for the future).
 in next 2 to 3 years (Large-scale firms)

Effects of trade protectionism: At time of survey and in next 2 to 3 years (total)

Effects of trade protectionism: At time of survey and in next 2 to 3 years (SMEs)

Note: $\mathrm{n}=$ total number of respondent firms (Total: 3,385, Large-scale firms; 615, SMEs: 2,770).
The "trade protectionism" in this survey indicates policies and measures since 2017, which include US Section 301 sanctions against China and Section 232 tariffs on steel and aluminum, as well as retaliatory measures being taken against the US by other countries (China, EU, Canada, Mexico, Russia, Turkey, etc.) and other policies and measures that have been put in place or are under consideration at the time of this survey.

## Transportation machinery highest for negative effects at around 40\%

At the time of the survey, industries for which there was a high percentage for "overall negative impact" included cars/car parts/other transportation machinery, electrical equipment, IT equipment/electronic parts \& devices, iron \& steel/non-ferrous metals/metal products, coal \& petroleum products/plastic/rubber products, chemicals, transport etc. There was also a high proportion of answers relating to future negative impact for the general machinery and precision equipment industries. In particular, the number of answers from firms in the cars/car parts/other transportation machinery for negative effects at the time of the survey and in the future ( $38.4 \%$ and $42.4 \%$ respectively) far exceed the number of answers for "no impact" or "unknown".

Effects of trade protectionism: At time of survey (by industry)

Note: 1) $\mathrm{n}=$ total number of respondent firms. 2) Highlighted cells are the top 5 highest answering industries for each item. Bolded digits are the items with the highest answer rate for each industry.

Nearly half of negatively affected firms concerned about
"Economic downturn at their sales destinations"
When firms that responded that they were seeing "negative effects" (answered "overall negative impact" or "equally positive and negative impact") were asked about the content of these effects at the time of the survey, $36.3 \%$ responded "cooling down in consumption/economic downturn in sales markets caused sales decrease." The proportion of answers increased to $47.9 \%$ when asked about these effects in the future. In terms of more direct effects, at the time of the survey the proportion of firms answering "own company's products became a target for increased tariffs etc., leading to reductions in price competitiveness", "suppliers' products became a target for increased tariffs etc., leading to an increase in procurement costs", or "buyers' products became a target for increased tariffs etc., leading to a decrease in orders" was $26 \%$ for each, with this increasing to 30 - $34 \%$ for future effects. Large-scale firms were seeing stronger, more direct effects compared to SMEs.

Content of negative effects of trade protectionism (by firm size, per-point in time)

Note: $\mathrm{n}=$ firms that answered "overall negative impact" or "equally positive and negative impact" in response to the effects of trade protectionism.

## More than $40 \%$ of transportation machinery manufacturers see negative effects

on products of own company/suppliers/buyers
Examining the negative effects of trade protectionism by industry reveals that approximately $60 \%$ of cars/car parts/other transportation machinery firms answered "own company's products became a target for increased tariffs etc., leading to reductions in price competitiveness" both at the time of the survey and into the future. Approximately $40 \%$ answered "suppliers' products became a target for increased tariffs etc., leading to an increase in procurement costs" with another $40-$ $50 \%$ answering that "buyers' products became a target for increased tariffs etc., leading to a decrease in orders". This reveals that this industry is seeing particularly direct effects compared to others. The answer rate for "cooling down in consumption/economic downturn in sales markets caused sales decrease" was high for industries such as medical products \& cosmetics, chemicals, and precision equipment both at the time of the survey and into the future. Approximately 60 to $70 \%$ of these industries answered that these decreases would be particularly noticeable in the future.

Note: 1) n = firms that answered "overall negative impact" or "equally positive and negative impact" in response to the effects of trade protectionism. 2) See the graph on the previous page for the official answer category names. 3) Highlighted cells are the top 5 highest answering industries for each item. Bolded digits are the items with the highest answer rate for each industry. 4) Answer ratios are not displayed for answers that less than 10 firms responded to (diagonal line).

## $70 \%$ of firms that will see overall negative impact

 are considering some form of countermeasures in the futureAmong all respondents, $24 \%$ have already implemented some form of countermeasures against trade protectionism, while $38.7 \%$ are considering them in the future (see notes). In particular, for firms that answered "overall negative impact," $56.7 \%$ have already implemented countermeasures in some form while $70.1 \%$ are considering them in the future. Looking at countermeasures being considered in the future, more than $20 \%$ answered "Strengthening information gathering" ( $30.1 \%$ ) and "Improving in productivity or efficiency" (26.5\%).
Note: The proportion of answers for "implementing some form of countermeasures" was calculated by subtracting "not implementing/planning any countermeasures" (No countermeasures) and "no answer" from $100 \%$.

## Countermeasures for trade protectionism: By effects of trade protectionism (total, per-point in time)

Note: 1) $\mathrm{n}=$ firms that provided answers for the effects of trade protectionism for each point in time. 2) "changing areas of production" does not apply for non-manufacturing industries, so this proportion of answers only includes manufacturing industries. 3) The proportion of answers for "implementing some form of countermeasures" was calculated by subtracting "no countermeasures" and "no answer" from $100 \%$.
*The official names of the countermeasures in the above graph were as follows:
No countermeasures: Not implementing/planning any countermeasures"
Strengthening information gathering: Strengthening information gathering structure Improving productivity or efficiency: Working to absorb costs through improvements in productivity or efficiency
Increasing price of products: Increasing price of own company's products/services

## More than $40 \%$ of transportation machinery and textiles/clothing firms responded via improvements in productivity/efficiency

Amongst firms that answered that trade protectionism has a "negative impact" ("overall negative impact" or "equally positive and negative impact") the proportion of those that had already implemented some form of countermeasures at the time of the survey was highest in order of medical products \& cosmetics, cars/car parts/other transportation machinery, coal \& petroleum products/plastic/rubber products, textiles/clothing, and retail. The primary countermeasures being implemented by these industries include "strengthening information gathering" (approximately $40 \%$ of retail and medical products \& cosmetics firms), "improving productivity or efficiency" (more than $40 \%$ of transportation machinery and textiles/clothing firms), and "changing areas of production" (approximately $30 \%$ of coal/petroleum/plastic/rubber product firms).

Countermeasures for trade protectionism: Already implemented (by firm size, industry, firms with negative $\geqq$ positive impacts)

|  | Number of firms | Changing areas of production (Manufacturing only) | Changing areas of procurement | Changing sales areas | Increasing price of products | Revising content of products | Improving productivity or efficiency | Lobbying | Strengthening information gathering | Other | No countermeasures | No answer | (Reference) Implementing some form of countermeasures |

## More than $30 \%$ of negatively affected transport machinery firms will consider changing areas of production

Amongst firms that answered that trade protectionism would have "negative effects" ("overall negative impact" or "equally positive and negative impact") the percentage of those that are considering future countermeasures was highest in order of ceramics/earth \& stone, cars/car parts/other transportation machinery, electrical equipment, IT equipment/electronic parts \& devices, and textiles/clothing. The percentage of firms answering "changing areas of production", "changing areas of procurement", and "improving productivity or efficiency" was highest for the transportation machinery industry ( $34.8 \%$, $23.9 \%$, and $50.0 \%$ respectively) with "increasing price of products" being highest for the textiles/clothing industry ( $44.4 \%$ ). "changing sales areas" and "revising content of products" was highest for retail sector, at $30.4 \%$ and $43.5 \%$ respectively.

Countermeasures for trade protectionism: Considering implementing in next 2 to $\mathbf{3}$ years (by firm size, industry, firms with negative $\geqq$ positive impacts)

|  | Number of firms | Changing areas of production (Manufacturing only) | Changing areas of procurement | Changing sales areas | Increasing price of products | Revising content of products | Improving productivity or efficiency | Lobbying | Strengthening information gathering | Other | No countermeasures | $\begin{gathered} \text { No } \\ \text { answer } \end{gathered}$ | (Reference) <br> Implementing some form of countermeasures |

 calculated by subtracting "no countermeasures" and "no answer" from $100 \%$.

## Trend of decreased production/procurement in China, with increases in ASEAN countries

When firms that answered that they would respond to trade protectionism by "making (partial) changes to areas of production/procurement/sales" were asked where they would make increases/decreases, nearly $30 \%$ replied that they have already decreased procurement from or production in China. Overall the percentage of answers relating to decreases was highest for China. On the other hand, the percentage of answers regarding increases in ASEAN countries (Thailand and Vietnam in particular) was remarkable. However, the percentage of firms that answered they would make increases in China was also high, with those answering that increases and decreases in sales were around the same (at the time of the survey) or trending upwards (in the future). After ASEAN countries, China also had the second highest percentage of answers for future increases in production/procurement/sales (top position when compared to individual ASEAN countries).

## 2) Changes in procurement of other firms products

Countries/regions where production/procurement/ sales are changed in response to trade protectionism

1) Changes in production of own products (manufacturing only)

Note: 1) n = firms that answered they have made (partial) changes to areas of production, procurement, and sales as a response to trade protectionism, or are considering future changes. 2) The figures for each country/region = number of firms that said that they would increase/decrease production, procurement and sales in the country/region / n * 100(\%). 3) ASEAN is firms that selected any of the ASEAN member countries.

## 5. Utilization of Free Trade Agreements (FTA)

- FTA Utilization rate in exports rises to 48\%, with expanded usage by SMEs-

## FTA utilization rate climbs up to $48.2 \%$ for exports

Among firms exporting to FTA-partner countries of Japan, $48.2 \%$ were using FTAs when exporting to these countries, up $3.3 \%$ from the previous year. The rate for SMEs was $43.8 \%$, an increase of $4.6 \%$ from the previous year. By industry, the rate was highest among cars/car parts/other transportation machinery firms at $66.7 \%$, the trend seen in this survey the previous year.

Utilization rates for Japan's FTAs (total, time series)

Note: $\mathrm{n}=$ firms that export to one or more Japan's FTA-partner countries/regions (Thailand, Malaysia, Indonesia, Philippines, Vietnam, Other ASEAN, India, Mexico, Chile, Peru, Switzerland, Australia, Mongolia). This does not include firms who did not answer whether they were using a FTA or whose answers were unclear.

Status of use of FTAs by industry (total, by industry)

| (\%) |  |  |  |  |  |

## Utilization rate over $30 \%$ with 9 FTA-partner countries

By Japan's FTA-partner country/region, the utilization rate was particularly high for Chile, Thailand, Indonesia, Vietnam, and India. The rate also exceeded $30 \%$ in Mexico, Malaysia, Peru, and the Philippines, which made the number of partner countries with the rate of more than $30 \%$ was 9 (the number was 7 in the previous year). In the EU, with which the Japan-EU EPA came into effect on February 1, almost half, $47.6 \%$, of the firms exporting to the region answered "considering using" at the time of the survey.

Utilization rates of FTA by partner country/region (total)

Note: 1) $n=$ firms that export to the subject country/region. This does not include firms who did not answer the FTA status
2) FTA-partner countries/regions are listed from the left, in order of FTA utilization rate in exports

## FTA utilization rates in major export countries rise

The FTA utilization rate rose more than 2 percentage points over the previous year in the 9 FTA partner countries, to which many Japanese firms are exporting, including Thailand, Vietnam, Indonesia, Malaysia, Philippines, India, Australia, etc. Substantial increases were seen in India ( $+9.2 \%$ ) and Vietnam $(+7.4 \%)$. The rates significantly increased in the coal \& petroleum products/plastic products/rubber products $(38.5 \% \rightarrow 60.0 \%)$ and trade/wholesale $(27.0 \% \rightarrow 39.5 \%)$ industries in India, while the rise of rates in Vietnam was observed in the chemicals $(42.1 \% \rightarrow 59.5 \%)$ and medical products \& cosmetics $(28.0 \% \rightarrow 56.5 \%)$.

2) FTA-partner countries/regions are listed from the left, in order of FTA utilization rate in exports

## More than $60 \%$ of firms using FTAs raise issues on rules of origin

Asked about issues they face in the use of FTAs, $60.6 \%$ of firms that have used FTAs in export answered "burdens to satisfy rules of origin". The rate increased by $12.3 \%$ compared to the same question in FY 2013. This was followed by "labor and time cost to obtain the certificate of origin for each export" at $51.4 \%$. The rates of these two answers were greater than $50 \%$ in almost all industries.

(Multiple answers, \%)

[^6]
## Expectations and concerns on self-certification of origin

On the self-certification system for the origin certification procedures, which was introduced in Japan-EU EPA and TPP11 (see notes), $39.0 \%$ of firms that were either currently using or considering using an FTA chose "(the system) can reduce labor costs and time for origin procedures". However, $37.0 \%$ answered "lack of information available on the system" while $30 \%$ also answered "internal structures within firms not ready for the system."

Note: A system that allows either exporters, producers, or importers to declare a product's country of origin, without having to use thirdparty organizations.

## 6. Utilization of foreign personnel

- Approximately $60 \%$ of SMEs are employing foreign personnel or are considering hiring them -

## Approximately $60 \%$ of SMEs are employing foreign personnel or are considering hiring them

The percentages of firms employing foreign personnel at domestic bases remained at $45.1 \%$, the same level as the previous year ( $45.4 \%$ ). Firms that responded they would like to consider employing them in the future increased from the previous year (from $15.7 \%$ to $17.8 \%$ ). In the case of SMEs, about $60 \%(58.6 \%)$ responded that they are either employing foreign personnel or considering doing so in the future, and among firms with foreign employees, almost half ( $49.8 \%$ ) responded that these employees were "general administrative staff". This was also the most common answer.

## Upward trend in percentages of foreign personnel

Looking at percentages of foreign personnel, the most frequent answer was "less than $1 \%$ " at $40.9 \%$ of firms, followed by " 1 $5 \%$ " at $33.2 \%$. However, compared to the previous survey (FY 2015) there were increases seen amongst many industries. In particular, increases were seen in 10 out of the 14 manufacturing industries, with these firms answering that they had more than $20 \%$ foreign personnel.

## Emphasis on hiring foreign personnel from Japan

Among firms who answered that they were "currently hiring foreign employees" or were "considering hiring them in the future", most had hired these employees from Japan or were considering hiring them from Japan. By industry, the proportion of transport, finance \& insurance, communication, and information \& software firms who were hiring or considering hiring foreign exchange students was highest, at more than $50 \%$. On the other hand, the number of firms in the construction, earth \& stone, and iron \& steel/non-ferrous metals/metal products industries who were either employing or considering hiring technical interns was more than $40 \%$.

Note: 1) $\mathrm{n}=$ firms who answered "currently hiring foreign employees" or "considering hiring them in future" 2 ) highlighted areas are the top 5 industries per employment method.

## Focus placed on "clarification of job content and authority"

Amongst firms who were either employing or considering hiring foreign personnel, $42.2 \%$ answered "no special measures" in regards to their hiring measures. This was followed by "clarification of job content and authority" ( $18.5 \%$ ) and "improvements to treatment, such as wages and welfare programs" (16.3\%). When compared to the previous survey (FY 2016), the proportion of firms that answered "improvements to treatment, such as wages and welfare programs" had increased by $5.4 \%$. By firm size, the most common answer for large-scale firms was "presentation of carrier plans and a training policy" at $22.4 \%$

Note: $\mathrm{n}=$ firms who answered "currently hiring foreign employees" or "considering hiring them in future". "clarification of job content and authority" and "clarification of salary raises and promotion" are new categories that have been added from FY 2018.

[^8]
## Issues relating to Japanese proficiency/communication

Regarding issues in hiring/employing foreign personnel, the two most common answers (at approximately $20 \%$ each) included "their Japanese ability has not reached the required level" and "frequent troubles in communication with Japanese employees". By firm size, the proportion of SMEs that answered "don't know how to recruit foreign employees" was $9.2 \%, 6.8 \%$ higher than large-scale firms. This answer had the largest difference in regards to firm size.

## Common measures by firms that have a large proportion of foreign employees

Examining the measures of firms that have a large ratio of foreign employees showed that many of them were using similar measures including "clarity regarding duties and rights" and "improvements to compensation such as pay and benefits" as well as "improvement of in-house consultation", "improvement of training, such as support of Japanese language study", and "clarification of salary raises and promotion". In terms of issues relating to hiring and employment, regardless of the ratio of foreign personnel, the most common answer was "their Japanese ability has not reached the required level".

Employment measures by ratio of foreign employees

|  |  | No. of firms | Presentation of carrier plans and a training policy | Assignment to department of one's choice | Clarity regarding duties and rights | Clarification of salary raises and promotion | Improvements to compensation such as pay and benefits | Improvement of training, such as support of Japanese language study | Improvement of in-house consultation | More flexible recruitment schedule and hiring procedures | Increasing supply of employment information and the like in English | Increasing supply of employment information and the like in English | Carrying out no special measures | Other |

## 7. E-commerce

- Use of e-commerce in overseas sales expands, approximately $60 \%$ feel they have benefited -

## Use of e-commerce increased from $24.4 \%$ to $30.3 \%$

Of all the respondent firms of this survey, $30.3 \%$ answered they "have used e-commerce" for sales, an increase from the previous survey ( $24.4 \%$ in FY 2016). There were no large difference in the rates by firm size. By industry, more than $50 \%$ of firms have used ecommerce for sales in medical products \& cosmetics and retail.
Note: "Have used e-commerce" includes firms which selected either "have used and plan to increase the use in the future", "have used and plan to maintain the use in the future", or "have used and plan to decrease the use in the future".

## China is top sales market both now and in the future

As in the previous survey (FY 2016), the top 3 overseas sales markets (both Sales from Japan to overseas markets and Sales at overseas bases) were China (49.5\%), the US (31.8\%), and Taiwan (27.5\%). China was also the top choice for countries/regions planned for sales expansion (next 3 years or so) or as a new sales market ( $50.8 \%$ ). In most of the industries, the country was also the top choice.

Note: $\mathrm{n}=$ firms that have used e-commerce for overseas sales.

Future overseas sales markets (total, time series)

Note: $\mathrm{n}=$ firms that have used or plan to use e-commerce for overseas sales
("plan to use" for FY 2016 includes firms that have not used e-commerce for sales but are planning to use it either domestic or overseas sales).

## E-commerce sales to ASEAN countries by SMEs expected near future

When comparing results for current and future overseas sales markets, ASEAN countries stood out as future sales markets. In particular, the proportions of SMEs choosing "future sales markets" exceeded those for "current sales markets" by $5.0 \%$ for all 6 major ASEAN countries.
