JETRO: Survey on Japanese Companies in Africa
Important Survey Findings

Market expectations become clear, 80% of companies have entered the market in Africa because of “future market potential”

- Increased Interest from the 7th Tokyo International Conference on African Development (TICAD7) -

1. [Operating Profit Forecast and Future Business Outlook]
   More than half of companies maintain profitability, with 60% considering business expansion. The importance of Africa in global strategies is increasing.

2. [Changes to Investment Environment]
   Although business management risks remain, companies seek to expand their business by avoiding risks through new methods such as coordination with third-country companies.

3. [Future Market Expectations]
   80% responded “future market potential” as their reason for entering the market. There are also high expectations for consumer markets and regional integration.
Survey Overview & Company Profile

2019 Survey on Business Conditions of Japanese Companies in Africa

- **Survey Period:** September 24th - October 25th, 2019
- **Response rate:** 74.5%
  (Targeted 24 countries, 315 valid responses out of 423 companies surveyed)
  *See details on the next page*
- **Survey target:** Japanese companies in Africa
  ※ A Japanese company in Africa is a company that receives capital contribution from any Japanese company, regardless of the investment ratio or number of Japanese expats present.
  ※ Please note in graph ‘N’ refers to number of companies

Number of Employees: Most are Small-scale Enterprises

- 1 - 10 employees or less: 45.0%
- 11 - 50: 30.1%
- 51 - 100: 7.4%
- 101 - 300: 6.8%
- 301 - 1000: 4.9%
- 1001 - 3000: 3.2%
- 3001 employees or more: 2.6%

Industry: 1/3 of Respondents were Manufacturing Companies

- 32.1% (101 companies)
- Non-manufacturing: 67.9% (214 companies)

Years of Establishment: Approximately Half of Companies Expanded into Africa from 2011

*See details on the next page*

(Note 1) The component percentages in the tables and charts have been rounded off to the 2nd decimal place, therefore the percentage of each answer may not amount to 100%.

(Note 2) "N" written in the report is the number of valid responses (parameter).
1. Operating Profit Forecast and Future Business Outlook
The percentage of companies reporting profit slightly increased from the previous year, at more than 50%. The percentage of companies reporting loss was 2.4 points higher than the previous year.

In South Africa, Nigeria, and Ethiopia, the ratio of profitable companies is more than 50%.

Cote d’Ivoire’s loss ratio was 40%, higher than that of other countries.

**2019 Operating Profit Forecast ①:**

South Africa Sustains its Strong Performance with 70% of Companies Reporting Profit

(Note) Excludes countries where less than 10 companies responded.
Looking at the ratio of profitable companies in major countries, at nearly 70%, South Africa showed a strong performance and steady increase from the previous year.

Kenya has also shown a significant increase by over 10 points from the previous year, marking two years of a major increase.

Egypt showed the most increase in previous years, but saw a major decrease from last year. Morocco saw a decrease for the second consecutive year.

(Note) Morocco was not covered 2013’s survey.
Operating Profit Forecast Compared to Previous Year ①: “Improving” outlook is increasing towards 2020

- When companies were asked to compare operating profit forecasts between 2018 and 2019, 34.5% responded that it had improved.
- At the same time, 40.1% of respondents gave a brighter outlook for the 2020 operating profit forecast, saying that they expect it to improve.
- 8.1% of respondents selected “deteriorating” for 2020, which was much lower than 2019’s 19.5%.

In 2019, Cote d’Ivoire, Kenya and Nigeria had the largest number of companies who responded that their operating profit forecast was “improving.”

For 2020, they were Morocco, Cote d’Ivoire, and Ghana.

(Note) Excludes countries where less than 10 companies responded.

By Country

2019 Operating Profit Forecast (Compared to Previous Year)

2020 Operating Profit Forecast

(Note) Excludes countries where less than 10 companies responded.

By Industry

Manufacturing industry (N=100)

Non-manufacturing (N=213)

(Note) Excludes countries where less than 10 companies responded.

Improving  No change  Deteriorating
Operating Profit Forecast Compared to Previous Year ③:
Reasons for Improvement

- Same as last year, the most common reason given by respondents for improvement of their forecast was due to “increased sales in the local market.”
- 40% responded “improvements in sales efficiency” and 30% responded “increased sales due to export expansion.”
- The proportion responding “increased sales in local markets” was even higher for 2020, demonstrating how companies are eager to see economic recovery in these local markets.

2019 Operating Profit Forecast
Reasons for improvement compared to the previous year (multiple answers)

2020 Operating Profit Forecast
Reasons for improvement (multiple answers)
For both 2019 and 2020, the most common reason for an estimated decline in operational profit was “decreased sales in the local market,” then “effects of exchange rate fluctuations” and “increase in labor costs.”

### 2019 Operating Profit Forecast
#### Reasons for deterioration compared to the previous year (multiple answers)

- Sales decrease in local markets: 60.0%
- Effects of exchange rate fluctuation: 30.0%
- Increase in labor costs: 30.0%
- Increases in other expenditures (Administrative, utility and fuel costs etc.): 25.0%
- Sales decrease due to export slowdown: 23.3%
- Production costs insufficiently shifted to selling price of goods: 23.3%
- Increase in procurement costs: 21.7%
- Effects from own/other country’s trade restrictions: 10.0%
- Rising interest rates: 3.3%
- Effects from own/other country’s trade promotion measures, such as abolishment of tariffs, FTP/EPAs etc.: 1.7%
- Other: 33.3% (N=60)

### 2020 Operating Profit Forecast
#### Reasons for deterioration (multiple answers)

- Sales decrease in local markets: 52.0%
- Effects of exchange rate fluctuation: 24.0%
- Increase in labor costs: 20.0%
- Sales decrease due to export slowdown: 16.0%
- Increase in procurement costs: 12.0%
- Increases in other expenditures (Administrative, utility and fuel costs etc.): 12.0%
- Effects from own/other country’s trade restrictions: 8.0%
- Rising interest rates: 4.0%
- Production costs insufficiently shifted to selling price of goods: 4.0%
- Effects from own/other country’s trade promotion measures, such as abolishment of tariffs, FTP/EPAs etc.: 0.0%
- Other: 32.0% (N=25)
Approximately 56% of companies responded that they are considering expanding business over the next 1-2 years. This trend has continued for the past six years.

Over 95% of respondents expressed their intent to expand or maintain the current level of business in Africa.

High percentages of companies in Cote d’Ivoire, Mozambique and Morocco responded that they are eager to expand business.

Reasons for expansion (multiple answers)

- Sales increase in local markets: 71.4%
- High growth potential: 52.0%
- Sales increase due to export expansion: 34.3%
- Relationship with clients: 31.4%
- Reviewing production and distribution networks: 21.1%
- High receptivity for high value-added products/services: 17.1%
- Cost decreases (procurement costs, labor costs etc.): 6.9%
- Deregulation: 2.9%
- Ease of securing labor force: 1.7%
- Benefits from own/other country’s trade promotion measures, such as abolishment of tariffs, FTP/EPAs etc.: 1.7%
- Benefits from own/other country’s trade restrictions (increased tariffs, export amount restrictions, sanctions, industry policies such as import substitutes): 1.1%
- Other: 11.4%

(Note) Excludes countries where less than 10 companies responded.

Future Business Outlook: More than 50% seek to “Expand Business” for the sixth consecutive year

Number of Employees ①: Nearly 40% of Companies Plan to Increase Local Staff

- Nearly 30% of all respondents said they have increased the number of local employees over the past year. This trend is expanding, as 40% of companies responded that they will increase the number of local employees in the future.
- For Japanese expats based in Africa, “no change” was selected the most, and no significant increases or decreases could be seen.
In the past year, 40% of companies in Ethiopia increased their employment of local employees.
More than 50% of companies in Morocco and Kenya responded that they are planning to increase their number of local employees.

**Changes to Local Staff Over Past Year**

**Future Changes to Local Staff**

(Note) Excludes countries where less than 10 companies responded.

3. Future Market Expectations
FIA & Customs Union ①:
Approximately 40% Currently Using or Considering to Use FIA & Customs Union

- A large increase was seen in companies utilizing FTAs or customs unions compared to 2007. Combining this with companies considering use of these systems produces a total of approximately 40%.
- The most used FTA was the Southern African Development Community (SADC).
- The African Continental Free Trade Area (AfCFTA), which came into effect in May 2019, received the highest number of choices for “considering use in future,” showing a high level of interest.

FTA & Customs Union ②:
High Interest in the African Continental Free Trade Area

FTA or Customs Union Currently Used (Multiple Answers)

FTA or Customs Union Considering to Use (Multiple Answers)
More than 80% of companies answered “future market potential” as their reason for entering the African market, revealing their aim to create opportunities in the market. There was a marked decrease in the proportion answering “natural resources” or “Japan’s Official Development Assistance” compared to 2007.
One area of promise was “consumer market”. This was followed by “infrastructure” and “service industries”.

Amongst service industries there was particular interest in information services and medical services.

A high level of interest was also seen in IoT, big data and fintech amongst digital industries.
Future Investment Destinations ①: Kenya, Nigeria and South Africa Rank Top 3 for 5 Consecutive Years

- Kenya, Nigeria, South Africa were ranked as the top 3 countries of note for 5 consecutive years.
- Ethiopia moved up in rank from 5th to 4th place from the previous year, Ghana jumped up from 9th to 6th place, and Morocco climbed from 8th to 7th place.
