## WHAT WE ARE LOOKING FOR

Joint venture agreement in Europe.

Outsourcing for new product development.

## KEY WORDS

- HEMS / FEMS
- Smart community / smart metering / smart home devices
- Remote monitoring

## OUR PRODUCTS

AIZU Laboratory, Inc. proposes the design, the integration, and the development of EMS systems. A combination of FEMS/BEMS/HEMS is a good example of this proposal. To be specific, we will expand our HEMS systems to be able to manage the electricity transaction with block chain and distribute to all over the world.

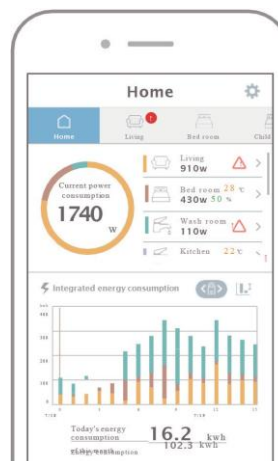

Outlet type HEMS

## Smart Plug

Most HEMS devices requires the renovation. However, our HEMS just need to plug in your home electricity socket! Moreover, it can also measure temperature, humidity and control the smart home devices.

## Smart Plug App

You can check the energy consumption of your home appliances through smart phones (iOS/Android) application. In order to support saving your home energy consumption, we provide useful services and utilities such as graphs, notifications and remote control..

## mononome

Mononome respond the user's activities and the changing of its surrounding environment by emote. Mononome monitor the environmental information such as the energy consumption, motion, and weather, through their sensors and user's feed-back.
