

Energy Market Japan

3rd “Fukushima - NRW Renewable Energy Seminar”

Fukushima Prefecture's new vision is to become a pioneer by producing 100% of the primary energy consumed within the prefecture from renewable energies by 2040. In order to further promote the introduction of renewable energies and to cluster related industries, Fukushima Prefecture has signed a Memorandum of Understanding (MOU) with the State of North Rhine-Westphalia in February 2014, and renewed it in January 2017. Since then, Fukushima Prefectural Government and companies from Fukushima have been regularly exhibiting at E-world energy & water and will do so also in 2019. At the “3rd Fukushima - NRW Renewable Energy Seminar”, the prefecture's projects and plans are introduced and Fukushima companies will present their technologies/products. NRW.BANK will present their support opportunities and after that, all participants are invited to join the networking event with soft drinks and finger food. This seminar is free of charge but registration is required.

Date: 4th February 2019, 10:00 - 13:00
