

The Fourth STS forum European Workshop

The STS forum, a non-profit organization established in 2004, aims to provide a platform for the world leaders in the fields of policy making, academia and industries to gather and discuss how to deal with science and technology issues from a long-term perspective for the future of all humankind.

At the 15th Annual Meeting held last October in Kyoto, we welcomed nearly 1,400 world leaders from over 80 countries and regions, including 11 Nobel Laureates, 22 Ministers of Science and Technology, 65 university presidents and representatives, and executives of multinational enterprises. We believe no other forums, conferences nor meetings on science and technology have such a truly global and interdisciplinary nature of that considerable size.

The 16th Annual Meeting will be held from Sunday, October 6 to Tuesday, October 8, 2019 in Kyoto, Japan.

The STS forum has been holding Workshops as an outreach program around the world.

This year, The Fourth STS forum European Workshop will be held in Stockholm.

It is our great honor if you would attend to the workshop.

Title: The Fourth STS forum European Workshop

Organizer: STS forum (NPO)

<https://www.stsforum.org/>
