

## 「The Fourth STS *forum* European Workshop」

The STS *forum*, a non-profit organization established in 2004, aims to provide a platform for the world leaders in the fields of policy making, academia and industries to gather and discuss how to deal with science and technology issues from a long-term perspective for the future of the humankind. At the 15th Annual Meeting held last October in Kyoto, we welcomed nearly 1,400 world leaders from over 80 countries and regions, including 11 Nobel Laureates, 22 Ministers of Science and Technology, 65 university presidents and representatives, and executives of multinational enterprises. We believe no other forums, conferences nor meetings on science and technology have such a truly global and interdisciplinary nature with that considerable size. The 16th Annual meeting will be held from Sunday, October 6 to Tuesday, October 8, 2019 in Kyoto, Japan.

The STS *forum* has been holding Workshop as outreach program at around the world. This year, **The Fourth STS *forum* European Workshop** will be held in Stockholm as follows. It is our great honor if you would attend the workshop.

**【Title】**

The Fourth STS *forum* European Workshop
