JETRO Investing in Japan
"22 Amount due by term column
Fill out the payment column for each term. The amount due for each term is calculated in the following manner:
Divide the estimated insurance premiums ("the amount in (a) of 14 column") by the number of times of payment mentioned in 17, and if any fractional sum of one yen or two yen is included in such amount, add such fraction to the amount for the first term and enter in "22 (a) the amount of estimated insurance premiums for the first term column," and enter the amount without a fraction (for the second term and third term (if the number of times of payment is two times, only for the second term)) in respective appropriate "22 (h) and (k) columns."

"26 Labor insurance in which a business is enrolled" column
In the case of being enrolled in both industrial accident compensation insurance and employment insurance, circle (a) and (b), in the case of being enrolled only in industrial accident compensation insurance, circle (a), and in the case of being enrolled only in employment insurance, circle (b).
