

NAVIGATE KUALA LUMPUR

Malaysian Company List

14 December 2017

Company profile

Enterprises worldwide are capitalizing on the Internet of Things (IoT) to drive business transformation and deliver innovative connected services. IoT holds the potential to reform how businesses are currently operated across the utilities sector, financial services and retail amongst others. The future will be driven by enterprises that embrace IoT as a strategy to streamline business growth.

At N'osairis we foresee and understand that the IoT wave will hit the emerging Asian countries sooner than later and are in the forefront of enabling enterprises to embrace business optimization by providing Turnkey IoT Services.

Contents

The IoT ecosystem is made of 3 key components – Sensors, Connectivity & Business Intelligence. Any enterprise wanting to explore IoT as a strategy for business optimization will find it a major hindrance due to the nature of the key components being totally fragmented.

At N'osairis we have built our very own NeX Platform which incorporates these key components into a single logical framework, Enterprises can leverage on the NeX Platform to deploy their IoT strategies in a brisk.
