

Follow-up Investment Seminar for Polish companies

The seminar is organized in order to assess the results of the business mission to Japan which accompanied the president of the Republic of Poland, Bronislaw Komorowski during his official visit to Japan held from 25th to 27th of February this year. The business mission was attended by more than 50 representatives of Polish companies from different sectors. The important number of participants proves the growing interest among Polish investors in Japanese market, which might in future result in the increase of Polish companies' FDI in Japan. The seminar will provide its attendees with the information about the outlook for developing business relations by Polish companies with Japan as well as it will give the opportunity to hear from experts about the attractiveness of Japanese market for foreign investors.

Date: 27 March 2015, 11:00 – 13:00
