AZUKI BAR (ICE CREAM BAR - RED BEANS)

This is a popular Imuraya product that has been loved ever since it first went on sale. Due to its proprietary manufacturing method, it melts easily in the mouth and has a strong azuki bean flavour. Its solidity sets it apart from other ice creams.

YUDE AZUKI (CANNED RED BEAN JAM)

Made using only Hokkaido-grown azuki beans. Our method of processing after various selection steps results in a safe and reliable boiled bean. We employ a production technology that has been refined over the 45 years since the product first went on sale. The feel of the bean and taste are brought out by boiling during manufacturing.

Amanatsu Jelly

Sweet pomelos from Kumamoto
Prefecture the home of citrus fruit are
used. This is a refreshing jelly bringing
together the pomelo's well balanced
sweetness and acidity in a somewhat
bittersweet taste. It is a full bodied jelly full
of fruit which is like eating the fruit itself.

Blueberry Jelly

Uses blueberries from Hoshino-mura
village in Yame City, Fukuoka Prefecture,
the home of Yame tea. Blueberry pulp
produced in Fukuoka Prefecture is
generously used. Hoshino-mura village
has a high altitude and a low temperature
which means that the blueberries grown
there have a strong color, and this is
accentuated in the manufacturing
process.

Furano Wine Chocolate

Hokkaido is known as the home of wines, and in this chocolate a red wine is used produced in the Furano winery which typifies Furano City. It is a deep bodied red wine with a rich fragrance, made into a luxury jelly and coated with sweet chocolate. You can enjoy the exquisitely harmonious blend of the wine's sweet-sourness and the mellow chocolate. The alcohol content is less than 1%.

Furano Melon Chocolate with White Wine

The fully matured mellow fragrance and rich sweetness of the Furano melon typifies Hokkaido, and the famous Furano white wine also typifies Hokkaido with its featured fresh, clear taste. These two great qualities are put together in a jelly and wrapped in sweet chocolate. You can enjoy this adult taste. The alcohol content is less than 1%.

Hakata Salt Coarse Salt

This sea salt is naturally dried over several days' time. The unrefined solution of salt left behind with coarse grains is moist and suitable for cooking, and is convenient when used dissolved. It is widely used for all cooking and seasoning such as in stews and soups and for initial preparation of food. It can be used safely and confidently as no chemicals or additives have been used.

Fleur de Sel

This is flake salt slowly crystalized over time. It features a crunchy texture and a mild taste. The "Fleur de Sel" brings out the taste of cooking and is recommended as a topping for steak meuniere marinade and other uses.

Kakuida Blueberry Fruit Vinegar

Natural fruit blueberry black vinegar using a generous amount of fresh Japanese blueberries and black vinegar (Kakuida). A delicious taste is provided the fresh sweet-sourness of the blueberries and the rich amino acids of Kakuida black vinegar.

Kakuida Izumi 3 year aged organic Black Vinegar

Matured over 3 years, Kakuida Izumi features organic soybeans that are added to organic brown rice, which is the standard ingredient for Kakuida organic black vinegar, and is prepared with malted rice and soft water with a hardness of 30 degrees in an earthenware pot. It is left to ferment for 1 year and then given 3 years to mature. Because both brown rice and soybeans are used, the total amount of amino acids is about 5.6 times that of ordinary rice vinegar and 1.5 times that of our company's black vinegar. It also includes GABA (gamma-aminobutyric acid) and soy isoflavone.

SANSHU MIKAWA MIRIN

This product retains the taste of specially cultivated Japanese rice by the traditional brewing method of "one measure of rice / one measure of sweet sake", which is used to brew this product. Ingredients are limited to glutinous rice, malted rice, and genuine shochu. The taste improves with drinking, the taste of the ingredients is drawn out, and the special gloss, lustre and good extension all produce a beautiful product.

SANSHU PLUM LIQUEUR (MILD TYPE)

A rich plum liquor with no added sugar and a cooking sake base. It is permeated with a mellow taste and a fresh plum flavour. A pleasant aftertaste is produced by Mikawa's special proprietary two step preparation. This plum liquor contains no additives and brings to life the superior sweetness of glutinous rice. It is a representative Japanese liquor.

C&A CURRY POWDER GOLD 100g

About 80 years have passed since manufacturing of curry began at Fushimi in Kyoto. Over this long period, we have continued to manufacture with an emphasis on quality. In order to make Japanese curry cooking easier we also provide curry roux. Have a look at our products with professional specifications that have been used in many restaurants. Besides a 1 kilo business size, we have commenced sale of a retail size for overseas markets.

Yuzu Kosho Paste 60g

Citron pepper is a seasoning which uses the outer skin of a citron, red pepper and salt as base ingredients. The citron's unique citrus fragrance and the pepper's sharp taste provide a unique product. It can be used as a seasoning for hot pot cooking, fried chicken, and sashimi.

Dried Seacucumber

Our company, now 90 years old, specializes in processing sea cucumber, and is a type of company rare even in Japan.

Our production of dry sea cucumber follows a production method unchanged since our founding. Everything is done by hand, and this is a fine product with natural materials carefully dried for 3 months by the sun and wind alone.

We have received a good reception from customers in Hong Kong and China.

At present we are looking forward to introducing our product to the Singapore market.

DRIED BONITO(KATSUOBUSHI)

"Katsuo-bushi" is smoked bonito with added mold. As a dried fermented food, it has been used as an important ingredient in traditional Japanese cuisine from olden times. Some types have been matured for over 2 years. Thinking especially of traditional soup stock (traditional flavouring), this ingredient has played a very important role.

DRIED KELP(KONBU)

Like dried bonito, kombu has also played a very large role in traditional Japanese food and flavouring. There are many different varieties of Hokkaido kombu. Among these many types are those used especially for stock and those strong in flavour, and some ideal for use as food.

IQF Oysters

Made using the best quality, rigorously selected seasonal oysters from Hiroshima. Ingredients are obtained in the best possible condition to make the product by observing the oysters' state of growth in real time and choosing the best time for hauling when levels of glycogen and taurine, which are the source of good taste, are at a maximum.

IQF Steamed Scallops

In order to make the shellfish easy to extract, heat is briefly applied to the surface and the shellfish is rapidly frozen after taking out the digestive gland. As the contents are still raw, the juiciness and original taste and sweetness of the scallops can be savoured.

TEPPAN YAKISOBA (3P)

This is a 3 meal packet of fried noodles with sauce. No refrigeration is needed and it has a shelf life of 10 months, so it is a very useful product for import and export and distribution nationally or to Singapore. Does not include any animal based ingredients. In contrast with frozen noodles, it can be opened straight into a fry pan and fried, making it easy to handle; and the noodles separate readily for simple cooking.

SANNINMAE UDON

A 3 meal packet of udon without soup. Refrigeration is not needed and it is easy to store with a shelf life of 1 year. Contains no animal based ingredients so it is good for export. English packaging. Soup is not included but the noodles can be widely used for boiling, frying, and as an ingredient for hot pot cooking. Goes with all kinds of condiments and flavouring.

Rolled Barley

Just boiling barley mixed with rice lets you eat a healthy rice meal easily and take in the food fibre lacking in polished rice. It has the versatility to provide special food texture, and also to allow use with salads, soups and other menu items. Compared with white rice it offers 3 times the calcium, twice the vitamin B2, and 17 times the food fibre. β-Glucan has an anti-obesity effect and can be expected to retard other adult complaints.

Roasted Whole Grain Barley Tea

The focus is on roasting and fragrance, using Japanese six-row barley seeds. The roasting method used is a method best adapted to the fragrance and sweetness which are special features of six row barley seeds, and is best able to draw out those special features. We blend using a proprietary method, combining barley with different degrees of roasting, to bring out the fragrance, deep body, and the refreshing sweetness.

Oblate bag type entering 100pieces

An oblate bag is a useful product that is used when taking medicine. It is 0.01mm thick, soft but strong and can be used to swallow powders, tablets, or capsules. It is made from Hokkaido potato starch pulp. In Japan it is used by everyone from small children to adults needing nursing care. This product has over 90% of the Japanese-produced market share.

Edible Oblate

In Japan, oblate film or powdered oblate is used to stop sweet rice cakes, jelly, or gum candy from sticking together. It is also possible to print on it with water-based edible ink or draw messages or pictures on it using an edible-ink pen.

Black Garlic Oyakoukou 150g

This product uses a refined garlic typical of Aomori Prefecture. Its distinctive but disliked odour is suppressed to bring out a sweet fruity taste. It has health-promoting ingredients such as various amino acids and polyphenol to support building a strong body every day which is impervious to age. One or two cloves should be eaten every day after removing the skin and can be used in various kinds of foods such as dressing and sauce.

BLACK BURDOCK TEA 7Tea bags

Aomori Prefecture produces the largest crop of burdocks in Japan. Our company's proprietary manufacturing process has developed a new black burdock with new functions. Its health-promoting effects have been confirmed in joint research with Hirotsuki National University, including suppressing a rise in blood sugar after eating with an antioxidant effect, and reducing alcohol related liver damage. A tasty tea drink can be made by mixing black burdock with burdock tea and double roasting.

Frozen Kujo Leek

Kujo leeks are called the "King of Leeks" and are characterised by their good fragrance compared to other leeks. This is a frozen product manufactured by fresh eye processing to provide more people with rare Kyoto vegetables. Kyoto vegetables have a limited distribution and have little opportunity for circulation outside Kyoto, but it is now possible to cook with Kyoto vegetables that can be supplied year round without waste.

Frozen Ebi-imo (Shrimp-shaped Potato)

The name "ebi-imo" comes from the vegetable's bent shape and appearance that make it look like a shrimp. Care is taken building up earth round the roots during cultivation and its taste is developed as a special high class product. Fresh eye processing is used to allow Kyoto vegetables with a limited distribution and little opportunity for circulation outside Kyoto to be supplied all year round to make cooking with Kyoto vegetables without waste possible.

Nagasa Rice Koshihikari 2kg, 5kg

For the coronation of Emperor Meiji in 1872, fruit and vegetables were selected from all over the country, and rice was chosen from what is now the Nagasa area of Kamogawa City. Nagasa rice has been recognised from olden times as very delicious rice, and its taste and popularity continue to improve. Nagasa rice allows you to experience the full flavor of rice, providing a good texture, the right amount of adhesion, gloss, delicate sweetness, and a delicious fragrance that lasts despite freezing.

Soft Steamed Brown Rice Oh! Musubi

A heat processed brown rice treated in saturated moist air promoting beauty and health. Enzymes are largely active in the starch to give this brown rice a very pleasant taste with enhanced sweetness. It does not require washing or soaking and can be cooked straight off. It is also rich in fibre, vitamin E, vitamin B1, GABA, and various minerals and has proved popular in overseas exhibitions in Hong Kong and Singapore.

SHIRAKAWAGO TANSAN-JUNMAI AWANIGORI-SAKE

Effervescent Nigori-Sake was born as a companion to the Shirakawago series. Pure Rice Sparkling Nigori-Sake allows fresh enjoyment of the sweetness of rice in Nigori-Sake and the full bodied taste from the carbonic acid due to secondary fermentation in its bottle which is the same as a champagne bottle. The superfine effervescence gives a smooth, refreshing and gentle taste.

SHIRAKAWAGO JUNMAIGINJO SASANIGORI-SAKE 720ml

The taste and fragrance of rice fill the mouth and the clear quality of the aftertaste lingers, achieved by the modest addition of Ginjo Moromi to sharp tasting Ginjoshu. The texture of sake can be enjoyed and is suited to a wide variety of cooking. This Junmaiginjo sake is much appreciated in America and Asia as well as Japan.

Rice Vinegar

This product brings out the taste and fragrance of rice, having a mellow sour taste and clean fragrance. Use it in dressings that bring out the flavour of the ingredients.

Premium Fruit Vinegar ~Sinsyu Apple~

This is a product that brings the pleasure of a new tastiness to vinegar by using fruit vinegar from fermented fruit juice. Our apple cider vinegar is carefully made from the juice of Fuji Apples from Nagano Prefecture, which have a robust, deep sweetness. Fuji Apple juice is added to bring out the delicious taste of the original vinegar to produce our Premium Fruit Vinegar, Shinshu Apple Vinegar Fuji. Taken as a drink, it should be diluted to one third strength.

Covered Tea produced by Shizuoka's Chagusa Noho

Hay is used in the traditional farming method of spreading organic fertilizer on tea fields (traditional tea-grass integrated system). Haymaking is carried out by harvesting Japanese pampas grass around tea plantations in autumn and winter, in Kakegawa and Makinohara, in Shizuoka Prefecture. The object is to improve the tea quality. Also the diversity of life is maintained in the area where the hay is taken and its survival together with farming has been recognised by recording the area as a world farming heritage site in May, 2013.

Bankei Red Wine (no additives)

This is an original blend prepared using low temperature brewing, with Bankei's Campbell type vineyard grapes, Yama Sauvignon, and Glory Vine, added to Campbell type grapes from Nikicho. After being picked, de-stemmed and crushed these are hand treated using wine yeast. In order that everyone can savour the flavour of the grapes and the intermixed natural taste of the wine yeast, antioxidants are not used. Keep under refrigeration after opening.

Bankei Cider Wine

Apples are treated using only yeast after autumn harvesting at Ebeotsu in Takikawa. This is a lightly sparkling fruit wine made with fermented apples, having elevated sugar content because of the cold. Antioxidants and sweetening are not used. As the yeast is active store under refrigeration, and enjoy the taste of autumn apples.

KAGOSHIMA WAGYU Beef, Yakiniku Set

Kagoshima Wagyu beef is Japanese Black beef reared amidst the spas of Kagoshima. The best known feature is the marbling caused by ample fat. This mouth melting fat produces delicious smoothness and body. Salt and pepper are recommended to bring out the taste of the roasted meat. Roast till browned, and good exposure to the fire softens and gives the prized taste.

KAGOSHIMA KUROBUTA, Loin and Belly

Kagoshima Kurobuta is a pig of an improved Berkshire strain carefully raised in Kagoshima Province and fed sweet potatoes. The best known characteristics are the simple, sweet, fatty meat known for its whiteness and the chewiness of its red muscle fibre. This ingredient is essential for standard dishes of Japanese cooking such as table boiled sliced meat and pork cutlet.

Yotsuba Buttermilk Pancakemix 450g

The flour, sugar and butter milk powder are sourced from Hokkaido. The moist texture and light, melt-in-the-mouth batter is produced by blending in butter milk powder. No chemical flavors, preservatives or artificial colours are used. Aluminium free baking powder is used.

Yotsuba Hokkaido Cream Whip 1000ml

This is a whippable cream-like product with 100% pure milk fat adjusted to 35% fat content. The milk ingredient is 100% Hokkaido produced. The addition of additives is strictly limited to produce a natural taste.

Contact	Mr. Yuki HIDA

Sapporo, with a population of 1.9 million, is the capital city of Hokkaido Island in the north of Japan. Since Hokkaido is famous, not only in Japan but also in many of the Asian countries, for its natural beauty and finest food resources from land and sea, Sapporo has grown as the culinary capital of Hokkaido. We would like to take the opportunity of Food and Hotel Asia to introduce eight brands from Hokkaido.
