JETRO (Japan External Trade Organization) is setting up the Japan Pavilion at BEX Asia 2015 in Singapore, in which 14 Japanese companies are showcasing various world leading products, renowned for eco-friendliness on top of their superior functionality and high-performance. The Japan Pavilion occupies an area of 270 m² and is one of the biggest country pavilions among the many countries participating this time. Japanese companies are presenting a wide range of products such as paint, floor materials, laminated glass, building material cutters, and so on.

Embark Trade & Consulting

N10-01

Products : Composite Panels

We produce composite panels which overcome the disadvantages of single materials, such as stone, paper, timber, etc.

Urushi (Japanese lacquer) and Washi (Japanese paper) are traditional Japanese materials of natural origin, and possess unique color and texture that enrich interior design. By panelizing these materials at our factory, the newly-formed composite panels become easy to handle and install on building surfaces on-site.

KUMALIFT CO. LTD.

N10-03

Products : Dumbwaiters, Home Elevators

Dumbwaiters are small freight elevators that are used to transport food or goods between floors. Often, they are used in commercial settings, such as hospitals to exclusively transport clean food and used linen for sanitary control, restaurants, factories, warehouses, schools and even in residential settings as well. Kumalift's Made-in-Japan dumbwaiters have kept No.1 market share in Japan since the 1960s.

Brand Name : KURIKI

Products : Soft Close for Doors

Whether a door is closed forcefully or gently, our product Soft Close has the special function of adjusting its speed to ensure it closes slowly. Soft Close has multiple advantages such as high durability performance and the ability to support heavier doors than products of other companies. In addition, Soft Close, when installed on hinged doors, has a special correction mechanism called an automatic return function, which brings the door back to soft close mode even after closing it inappropriately.

About JETRO

JETRO, or the Japan External Trade Organization, is a government related organization that works to promote mutual trade and investment between Japan and the rest of the world. Originally established in 1958 to promote Japanese exports abroad, JETRO's core focus in the 21st century has shifted toward promoting foreign direct investment into Japan and helping small to medium size Japanese firms maximize their global export potential.
