Japan focus on medical device market in the Middle East

JETRO sets up Japan Pavilion at Arab Health 2013 in Dubai:

The Japan External Trade Organization (JETRO) will organize a team of Japanese companies at the forthcoming Arab Health 2013 in Dubai. Arab Health – the largest trade show in the healthcare industry in the Middle East will be held at the Dubai International Convention & Exhibition Centre from 28th to 31st January 2013. This will be Japan's 3rd endeavour setting up the Japanese National Pavilion for this event.

Over 3,500 exhibitors from around 65 countries, specialized in medical technology, laboratory equipment, diagnostics, physiotherapy/orthopaedic technology, commodities and consumer goods for hospitals, surgical products and services, information and communication technology in healthcare, medical disposables, healthcare building technologies, radiology etc. are slated to be present at the exhibition to showcase their products and services.

Participation from Japan:

This year, 10 companies specialized in medical device manufacturing, will participate in the Japan Pavilion. Realizing the high potential growth of the medical and healthcare market in the Middle East, these companies will showcase a unique variety of high-tech and innovative products, aiming to expand their business in the Middle Eastern region.

Companies from Japan's disaster hit area take part in the exhibition:

This year, 4 companies from the areas in Japan hit by the earthquake and tsunami in 2011, including companies from technologically advanced areas such as Ibaraki and Chiba, are participating in the exhibition, indicating the rehabilitation and fast recovery accomplished by the companies in such areas with the support of the Japanese government.

Companies within the Japanese Pavilion:

Animo Limited: - Specialized in software and services for healthcare, welfare and e-health, Animo is a solutions company that offers software and service centered on key technologies related to sound and speech, founded by Fujitsu Ltd. In 1994 as their first venture

company. The company is active in three business areas namely, Social Infrastructure, Call Center and Healthcare. Snoring check service is one of the unique solutions to make snoring self-check available on your Smartphone.

(Contact person: Mr. Masaya Motegi. E-mail: mmotegi@animo.co.jp)

Bear Medic Corporation: -This Company is specialized in Disposable Micro Vascular Clip and Micro Suture needles. Single-use disposable clips are developed under supervision of Dr. Tamai, a world-famous orthopedic surgeon. Its unique hemispheric shape in

jaws assures secure, atraumatic and non-slip occlusion. The single-use vascular clips can draw out doctors' best performance because clamping pressure is always exact and reliable. Non-necessity to scrub before use secures patients' trust for debris, corrosion and rust free

surgery equipments. (Contact person: Mr. Noriyuki Kawasaki. E-mail: Kawasaki-n@bearmedic.co.jp)

Feather Safety Razor Co., Ltd.: - This Company is a leading manufacturer of high-precision cutting tools and has a wide-ranging product lineup, including surgical blades and scalpels for general

surgery, isroscaples for ophthalmic surgery, micro blades and handles for fine incision, and disposable microtome blades and trimming knives for histology/pathology use. High precision and excellent quality of Feather products are all made in Japan and have earned

immeasurable trust from the users all over the world. (Contact person: Mr. Keiichi Sakaide. E-mail: feather@estate.ocn.ne.jp)

JETRO continues promoting trade through Invitation Programs:

In continuation of JETRO's trade promotion through programs targeting different segments in the market, and after the successful completion of the Buyer's Invitation Program for the women's fashion industry, beauty products and the entertainment industry, JETRO has organized an invitation program for buyers from the Digital Contents Industry during the month of October 2012. Out of 13 members of the group from different countries, three were from the UAE, namely Fox Channels Middle East, 03 productions and Rubicon.

JETRO's Digital Contents Buyers Invitation Program was organized during the time of the Tokyo International Film Festival, and the associated Content Buyers Market (TIFFCOM 2012) held between 23rd and 25th October 2012 at the Grand Pacific De Daiba, in Tokyo's Odaiba area. The multi-content market, which is an annual event, is jointly organized by the Ministry of Economy, Trade and Industry and UNI Japan. TIFFCOM is slated to be held again at the same venue in October 2013.

The first invitation programs was targeted at the Women Fashion Industry, where, JETRO invited three companies from the region - two from Saudi Arabia and one from Dubai. The second invitation program was targeted at the beauty products segment, in which JETRO invited three business persons, representing 3 companies from the sector.

In the 3rd such program, JETRO Invited 8 business men from the entertainment industry for Business Matching Meetings in Japan during the Tokyo Game Show (TGS) held between 20th and 21st September 2012. Out of the 8 invitees, 2 were from Dubai.

MY CONTENT JAPAN PAVILION AT THE BIG ENTERTAINMENT SHOW AND CONTENT SUMMIT 2012

JETRO has set up a Japanese pavilion at the MYCONTENT - the leading international entertainment content and media marketplace show in the MENA region between 27th and 28th November, at the Dubai International convention Centre. The Pavilion was established in association with the Osaka Digital Content Industry Promotion Council of Japan (ODCC), and the event was held in conjunction with the leading entertainment show in the region, "the Big Entertainment Show 2012".

ODCC is a platform organization of the content industries, educational institutions, economic organizations and governmental agencies etc. ODCC and JETRO have organized a team of companies aiming to partner with UAE's businesses, organizations, educational institutions and governmental agencies concerned with digital content in the Middle East countries in order to deploy various projects based business corporations. With the vast network in the industry, ODCC has the potential to bring significant value to businesses in the Middle East.

My Content is essentially a marketplace for networking, selling, buying and distributing entertainment content across all platforms, providing professionals involved in the TV, film, animation, documentary, kids programs, digital content, social & interactive media, mobile content, internet content, apps, interactive entertainment industry with the perfect platform to make deals. This company is specialized in the distribution and ancillary development of quality TV programs for domestic and international markets as a subsidiary of Yomiuri Telecasting Corporation, a terrestrial broadcasting corporation in Japan. This company is also specialized in music publishing and advertisement.

Topics of Japanese Economy and Industry

The Act for promotion of Japan as an Asian Business Centre enforced in November 2012:

The Act on Special Measures for Promotion of Research and Development by Certified Multinational Enterprises (hereinafter referred to as the "Act for Promotion of Japan as an Asian Business Center,") which was enacted in the ordinary Diet session this year, came into force on November 1, and support measures such as reduction of corporation tax would be implemented. Furthermore, patent applications relating to research and development businesses certified under said Act would be additionally included in the scope of applications for early examinations and proceedings (operational measures according to the existing provisions of the Patent Act).

1. Concerning the Act for Promotion of Japan as an Asian Business Center:

In order to promote activities to invite high-value added company bases, such as research and development bases and Asian headquarters of global enterprises, to Japan, the Act provides for measures to be taken for global enterprises certified by the competent minister, such as a reduction of corporation tax and patent fees. The Act, which was enacted in the ordinary Diet session this year, was promulgated on August 3 and would come into force on November 1.

2. Outline of new support measures:

In order to further promote activities to invite high-value added company bases upon the enforcement of the Act, as support measures, not only will legal measures be taken but also patent

applications relating to research and development businesses certified under the Act for Promotion of Japan as an Asian Business Center will be additionally included in the scope of applications for early examinations and proceedings (operational measures according to the existing provisions of the Patent Act).

A brief outline of the Act:

1. Targeted business activities:- Support measures shall be taken for research and development businesses and regional headquarters business that are newly conducted by global enterprises certified by the competent minister as conforming to the basic policy established by those ministers.
2. Support measures:- (1) Corporation Tax: realizing 7% of effective tax cut by 20% income deduction for 5years. (2) Income Tax: Same treatment as Japanese enterprises for taxation of stock option benefits granted by parent companies (foreign enterprises).
3. Reduction of patent fees: Reduction of patent fees for outcome of R&D businesses (only for small and medium enterprises).
4. Shortening of investment procedures: The period from making a notification under the foreign Exchange and Foreign Trade Act during which investment cannot be made is shortened from 30 days to two weeks.
5. Assistance for fund raising: Assistance for fund raising by the Small and medium Business Investment & Consultation Co., Ltd.

In addition to the above, acceleration of examinations and proceedings for patent applications relating to certified R&D business and acceleration of entry examinations are also considered.

The overall effects of these initiatives are attracting global enterprises that realize high added value and creating employment opportunities, and developing new products and technology in collaboration between global enterprises and Japanese SMEs.

The articles of the Act in full can be found in the following website of the Ministry of Economy, Trade and Industry.
