Our proprietary special production method (secondary boiling method) allows us to reduce the amount of food additives to the limit compared with existing products, and we cut 75% compared with our company's products. Materials include HOKKAIDO-made genuine 'MIZUTAKO' (Giant Pacific Octopus), Moroccan / Mauritanian octopus, Peruvian octopus, etc. We deliver safe and secure products at competitive prices to specialized automated octopus processors. In addition, octopus is becoming popular in Europe and the United States as a low-calorie, high-protein food, so our high-quality and attractive Japanese-brand products are used not only in Japanese restaurants and SUSHI restaurants, but also for foods such as pizza, pasta and salads; and demand is growing.
