

Field Trip to Houston & Austin Texas

The JH2F members, with the cooperation of our MOU partner, the Center for Houston's Future, engaged in discussions with numerous organizations, companies, and startups in Houston. JH2F held concrete discussions on the social implementation of hydrogen through close collaboration between Japan and the United States. Through a visit to the Port of Houston, they identified the needs for hydrogen utilization at the port. Additionally, in Austin, the JH2F members deepened their mutual understanding of technological collaboration through a site visit to H2@Scale.

Wednesday, October 15th to 17th, 2024 Houston, Austin TEXAS
