

1. How to install Java for ASYCUDA

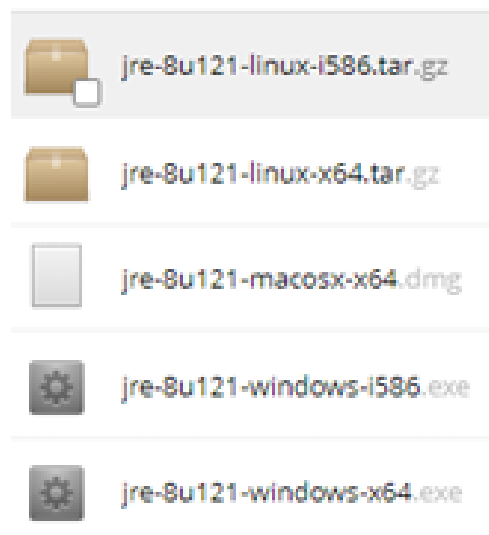

To access the ASYCUDA System, you must have Java installed on your computer. The technical team recommends using Java version JDK 1.8 U121. You can download this software from the GDCE page or the official Java website.

2.1. How to download Java software

1. Go to <https://customs.gov.kh/asyncuda>
2. Click on Download Java 8 as shown below.

3. Please choose a file that matches your computer and click to download it.

Note: In addition to downloading Java software from the official GDCE website, you can also obtain Java software from the official Oracle Java website.

2.2. How to install Java software

After downloading the Java application, you need to install it in the following way:

1. Double-click on the downloaded Java application (as in 2.1 above), then you will see the following screen. Click on the "Install" button

2. Wait until the loading is complete.

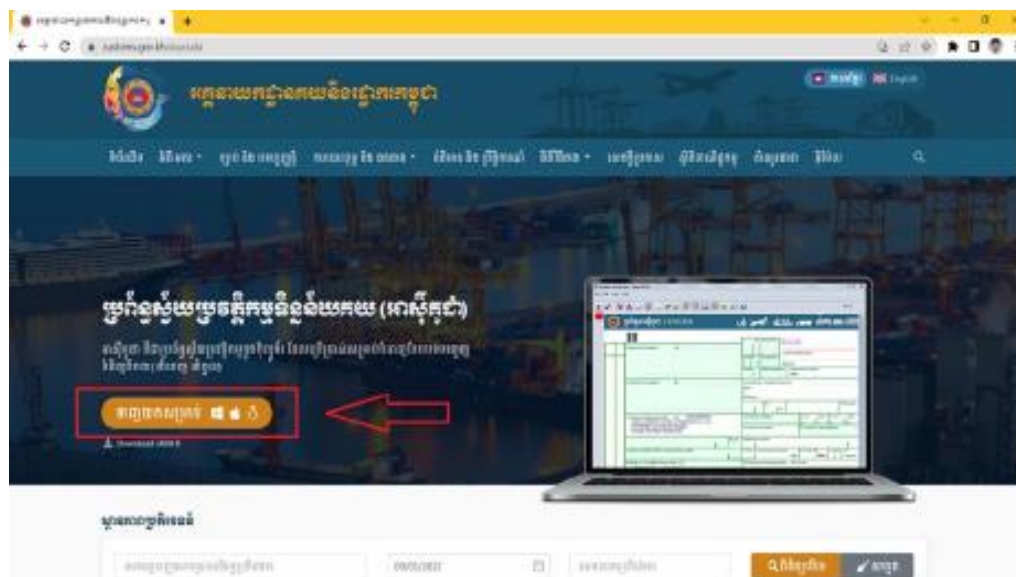

3. Click on "Close" to finish the installation.

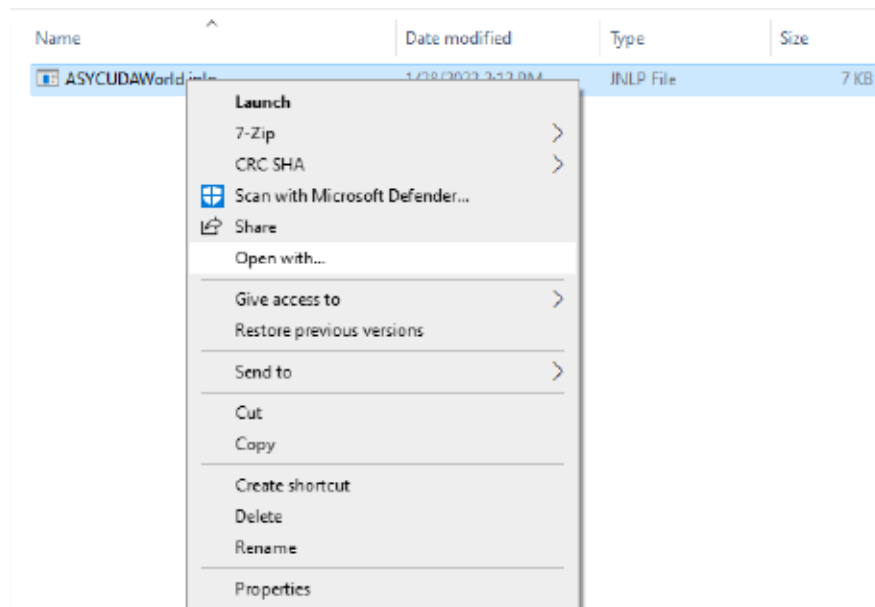

2.3. Setting up to be able to use the ASYCUDA system

Sometimes before using the ASYCUDA system, you need to set the settings first. This setting is made only once after installing Java.

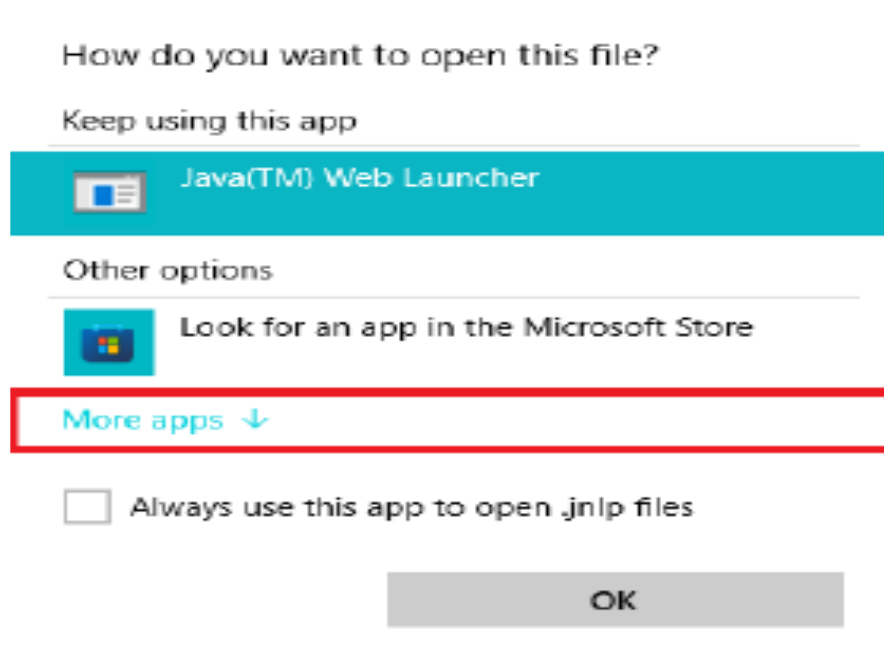

1. Go to the website of GDCE (<https://customs.gov.kh/asycuda>) and click on the button download

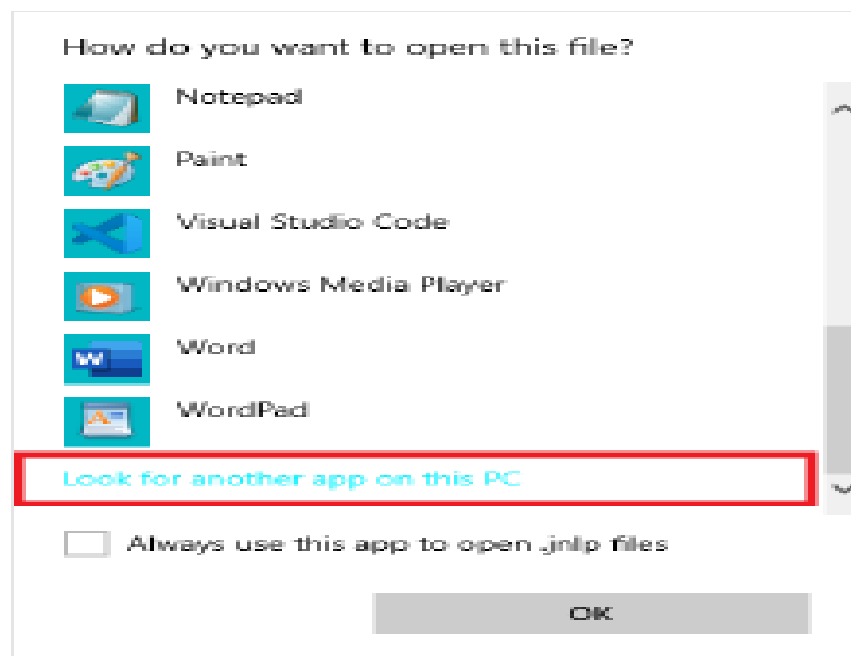

2. Go to the downloaded location ASYCUDAWorld.jnlp (usually in the Downloads location). Right click on ASYCUDAWorld.jnlp and select "Open with"

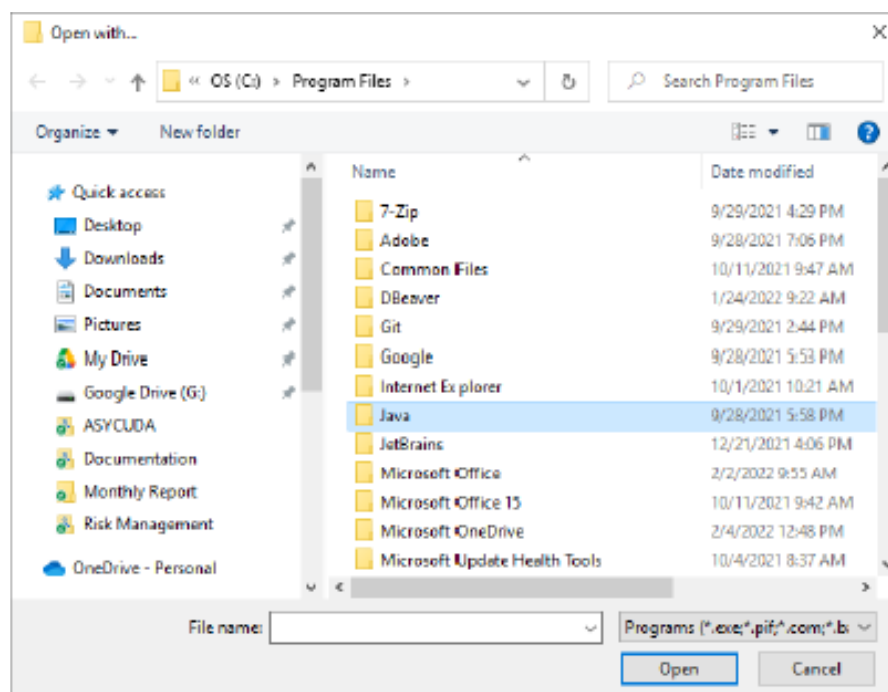

3. Choose 'More apps'

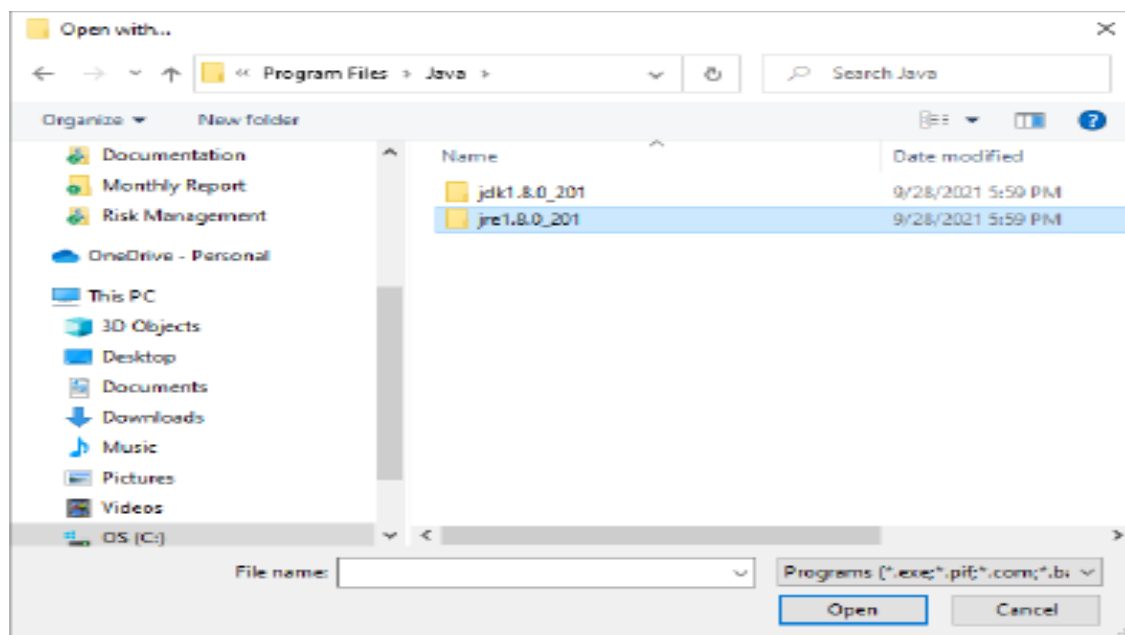

4.Scroll down and select the option that says "Look for another app on this PC"

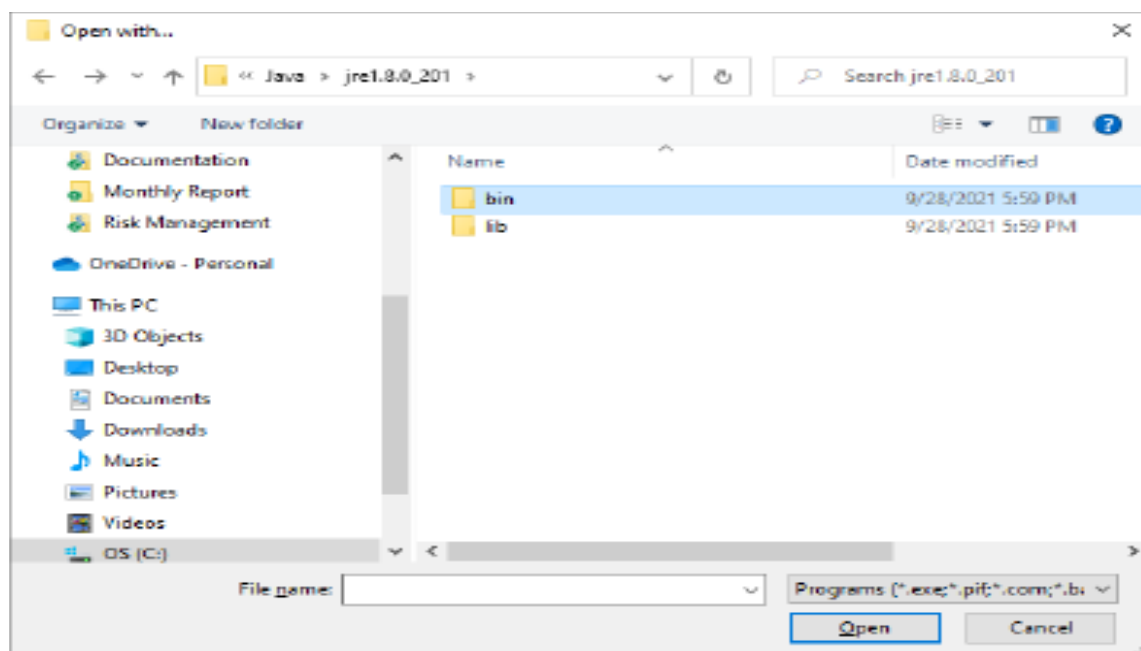

5.Go to the location where you installed Java (usually in the C:\Program location Files\Java)

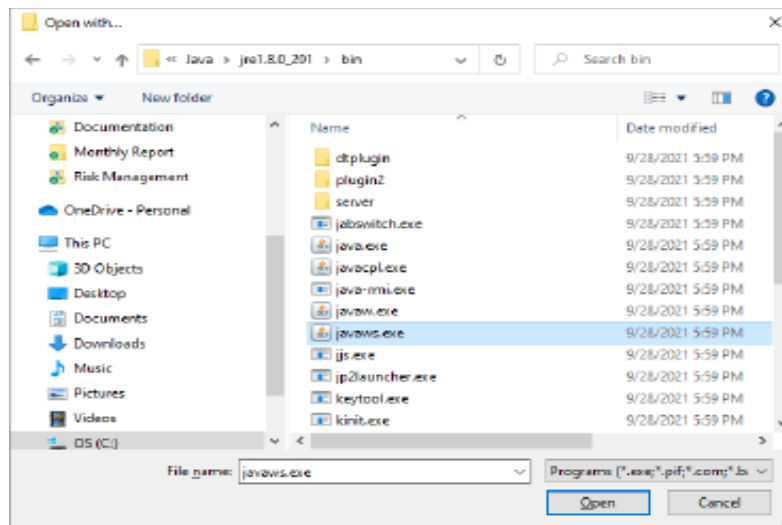

6.Go to Jre

7.Go in Bin

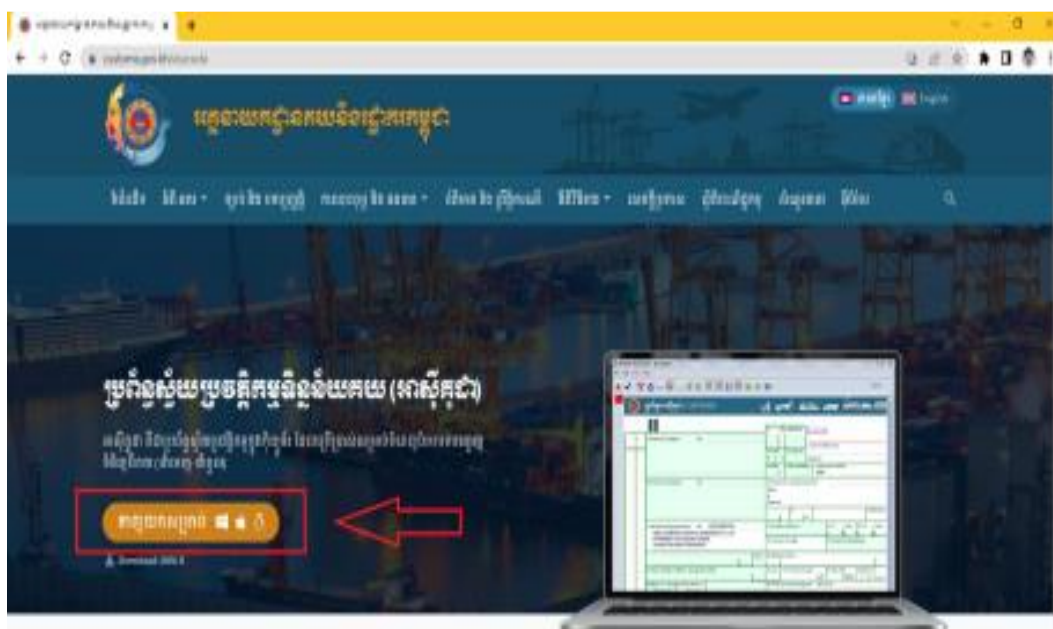

8. Go to find javaws.exe and Go to click ‘Open’

2.4. Access to ASYCUDA System

After installing Java software, you can go to the website of GDCE and search for the ASYCUDA system.

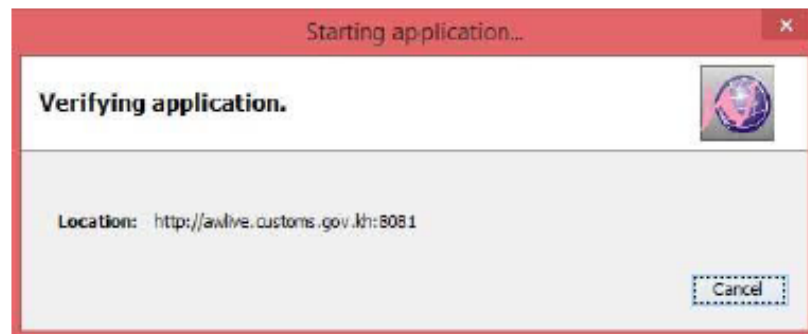

1. Go to <https://customs.gov.kh/asycuda> then click on the "Download" button as shown below

2. Open file that had downloaded

3. if Java asked you for update , Please don't update it .

4. if Java ask you the following screen , click” I accept the risk and want to run this application ” and then click the “ Run” butto

5. 5. Enter the correct username and password, then click on the “✓” button.
