

Directory of Japanese-affiliated Companies in Texas

Second Edition

**Published by:
Consulate-General of Japan in Houston
JETRO Houston**

June 2022

Inquiries

All parties interested in companies included in this directory should contact those companies directly.

For inquiries regarding this directory that are not related to specific companies, please contact the following:

JETRO Houston

inqu-hou@jetro.go.jp

Despite our best efforts to provide up-to-date and accurate information in this brochure, the Consulate-General of Japan in Houston and the Japan External Trade Organization (JETRO) Houston decline any responsibility for inaccurate, incomplete, or outdated information that may be printed in this pamphlet, and expressly disclaim any liability for errors or omissions in its contents. The Consulate-General of Japan in Houston and JETRO Houston are not liable for any damages which may occur as a result of using this directory.

Greetings

I would like to welcome the publication of the new edition of the Directory of Japanese Companies Located in Texas.

The number of Japanese companies in Texas has grown dramatically over the last several years, to a record-high of 444, according to our internal survey in 2020. The main driving force is the business friendly environment in Texas, combined with its geographical advantage in terms of the access to other areas in the US and even to Central and South America, and the lower operational and living costs. This directory was created with the aim of further expanding and deepening the partnership between Japanese and US companies, especially those in Texas. The Statement of Mutual Cooperation on small and medium-sized enterprises signed between the State of Texas and the Tokyo Metropolitan Government in January 2022 will further enhance the collaboration between Japanese and Texas companies.

I would like to express my gratitude to JETRO of Houston for its efforts in publishing the new edition of this directory. I also extend my sincere appreciation to the Japanese business associations in 6 major Texas cities and their member companies for their cooperation to this project. I hope this directory will be utilized by many companies across Texas, and serve for further strengthening business partnership between Japan and Texas.

Hirofumi Murabayashi
Consul-General of Japan in Houston

The Japan External Trade Organization (JETRO) is a government-related organization with a global network spanning over 40 domestic offices in Japan and 70 regional offices in other countries around the globe. Using this network, JETRO contributes to the expansion of trade and investment between Japan and the rest of the world by making new connections; business-to-government, business-to-business, and person-to-person.

JETRO Houston was founded in 1969, the year when mankind first landed on the moon, and has actively promoted business relations between Texas and Japan in the 50 plus year that followed.

Japanese companies have more operations in Texas than those of any other foreign nation, and we continue to work toward building even greater cooperation between them and local companies.

We have created this directory in response to the many local governments and businesses in Texas seeking the technological insights and capabilities of Japanese industry. Please feel free to contact any companies that interest you and further expand your business dealings with Japanese companies.

I wish you all business success.

Masahiro Sakurauchi
Chief Executive Director
JETRO Houston

ANA is a launch customer and the largest operator of the Boeing 787 Dreamliner, making ANA HD the biggest Dreamliner owner in the world. A member of Star Alliance since 1999, ANA has joint venture agreements with United Airlines, Lufthansa German Airlines, Swiss International Airlines, and Austrian Airlines - giving it a truly global presence.

The airline's legacy of superior service has helped it earn SKYTRAX's respected 5-Star rating every year since 2013, with ANA being the only Japanese airline to win this prestigious designation for nine consecutive years. ANA also has been recognized by Air Transport World as "Airline of the Year" three times (2007, 2013, and 2018); it is one of only a select few airlines to win this prominent award multiple times.

In 2021, ANA was awarded the 5-star COVID-19 safety rating by SKYTRAX, recognizing the airline's initiatives to provide a safe, clean and hygienic environment at airports and aboard aircraft, embodied in the ANA Care Promise.

ANA Houston route aims to provide our customers with greater choice and flexibility for destinations and travel schedules. "As a key market for the U.S. oil and gas industry, expanding service to Houston the tenth North American destination since June 2015 for ANA emphasizes our desire to make travel more convenient. Additionally, this Houston route will allow us to improve access between Asia and Latin America."

Company and Product/Service Overview, Activities in Texas

Bear Child Education Academy is a Japanese-style preschool classroom for children aged 2 to 6 years. Classes are open for kindergarten classes and preschool learning classes. Bear Child Education Academy is a subsidiary of Kuma Education Center Co., Ltd. As a group, we operate a licensed kindergarten, a licensed nursery school, and a cram school in Kansai. We have 50 years of experience in early childhood education in Japan, and we send many students to famous private elementary schools in Kansai.

Twice a week in the kindergarten class, we learn basic Japanese-style lifestyles through various "plays" in group life and develop a humanity that allows us to interact with our friends. In the preschool classroom, we are working on physical education guidance, intellectual education, numbers, and letters by printing. We are working through group play to foster rules, cooperation, and empathy.

The conversation is basically in Japanese, but if Japanese is difficult, we can also speak English. Important Japanese mind, culture, customs, and early childhood learning. It is very important to learn these in early childhood when the development of the human cerebrum is most active. We believe that it is our mission to convey the heart of Japan to children in Houston, USA through Japanese-style education that has a proven track record in Japan.

Chiyoda International Corporation

Company and Product/Service Overview, Activities in Texas

Chiyoda is a global engineering company providing innovative and integrated solutions to promote energy transition and a sustainable world.

We provide engineering procurement and construction (EPC) services and technologies for energy facilities (LNG/gas, refining, chemicals), environmental, pharmaceutical/bio, renewables (hydrogen, solar, energy storage), and other industrial facilities.

We provide advanced engineering and digital solutions to optimize and solve today’s global challenges such as the reduction of greenhouse gas emission and increasing production for better economics.

In Texas, we have been engaging in Front End Engineering and Design (FEED) and EPC services mostly for energy facilities in North America. Currently we are designing and constructing a world class LNG export facility in the Port Arthur area.

As a local subsidiary in the United States, since 1983, we have overseen import / export and marketing of steel-related products including affiliated companies and developed products such as magnets, while fulfilling the function of the US window of the entire Daido Steel Group.

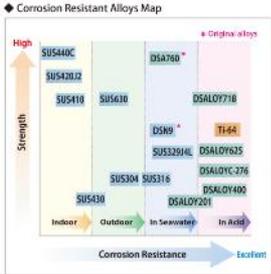

Since its foundation in 1916, Daido Steel Co., Ltd. has contributed to society with its group companies through “Monozukuri (Manufacturing),” which includes development of high value-added products and innovation of existing products by leveraging advanced technology primarily for specialty steel production.

Specialty steel, which has the potential for broad application, plays an important role in sustaining the growth of various industries such as automobiles, aircrafts, vessels, and IT equipment. Among the leading specialty steel companies, the Daido Steel Group has continued to meet the needs and expectations of society by pursuing the potential.

At the Daido Steel Group, we will continue to produce new specialty steel that supports global economic growth through co-creation with our customers, aiming at becoming a specialty steel manufacturer that contributes to the world by pursuing the potential of material, and by supporting the future for people and society.

Annual Sales	<Texas> USD 544 billion <Global> JPY 3,109,100 million (2022.3)	Texas TEL	713-263-5275

Company and Product/Service Overview, Activities in Texas

Daikin is a worldwide leader and provider of advanced, high-quality air conditioning and heating solutions. Daikin manufactures and sells a complete line of energy efficient, intelligent heating and cooling systems for homes, residential buildings, and high-performance commercial buildings.

In 2012, Daikin Industries, Ltd. acquired residential HVAC manufacturing leader Goodman Global Group, Inc. for \$3.7 billion. In 2013, Goodman integrated with Daikin Air Conditioning (Americas), an innovator in ductless air conditioning that developed groundbreaking VRV technology, to begin local production of multi-zone air conditioners that were previously imported, as well as the manufacturing of commercial products.

North America is the largest air conditioning market in the world, accounting for approximately 20 percent of global air conditioning usage. While Goodman’s ducted products constitute the bulk of HVAC sales, emerging environmental awareness and energy saving regulations in the United States have increased the need for Daikin’s ductless products with high energy saving performance capability.

The fusion of Goodman's robust sales system, streamlined logistics and sales network with Daikin's energy saving technology supports a commitment to elevating the quality of air in homes, businesses and public spaces as we aim to create new trends in energy efficiency through innovation, sustainability, environmental stewardship and business expansion.

Company and Product/Service Overview, Activities in Texas

Evaheart, Inc. (EVI) is a C-corporation established in the State of Texas in 2014 for distributing the EVAHEART Left Ventricular Assist Device System (LVAS). EVI is currently managing US randomized clinical trial.

EVI Headquarters is located 10 min away from Texas Medical Center, continuing implant support, customer support, as well as new product development. We have 3 customer hospitals in Texas including Houston, Dallas, and San Antonio, and extended our sales territory across other states in the US (a total of 22 hospitals).

EVAHEART LVAS was a Japanese medical device developed by Japanese academic institutions in collaboration with international research institutes, and the device is categorized as Class III in the US (Class IV in Japan). We are aiming to achieve Pre-market approval in 2024, and parallel, expanding our business opportunities into CE marking territories and India.

Year of Establishment	<Texas> 2019 <Japan> 1976	Contact Person in Texas	Satoshi Ikeda
Annual Sales	<Texas> - <Global> -	Texas TEL	281-258-4752

Company and Product/Service Overview, Activities in Texas

Established in 1987, Gakkyusha U.S.A. Co., Ltd. is a wholly owned subsidiary of Gakkyusha Co., Ltd. d/b/a “ena,” that provides an educational program for Japanese pupils aged between 3 and 18 years. Gakkyusha U.S.A. opened its first school in the United States, ena New York, in April 1987. In 2019, we operate 12 schools in seven different states in the United States: New York, New Jersey, Illinois, California, Michigan, Maryland and Texas.

There are tens of thousands of Japanese families living in the U.S., particularly the East Coast, West Coast, and Mid-West. Because of the major differences in the methods and goals between Japanese and American education systems, the children of these families are confronted with great difficulty upon returning to schools in Japan.

Although Japanese children generally adjust well to American schools when they move to the U.S., the opposite is not true upon return to Japan. Thus, especially given the differences in educational goals and methodology between the two education systems, the looming return to Japan has caused great concern to those Japanese parents whose children have been removed from mainstream Japanese education for some time. To fill this need for supplemental Japanese education, we have established preparatory schools that will provide a Japanese educational program for Japanese pupils temporarily living on the East Coast, West Coast, and Mid-West. Our program parallels the curriculum they would have received had they remained in Japan.

Company and Product/Service Overview, Activities in Texas

In 1953, Fuji Trading started as a marine supplier providing ship's stores, provisions etc. to ships visiting Japan from various countries. Since then for over 60 years, Fuji Trading has greatly contributed to the world marine business by developing IMPA Catalogue which became the 'Bible' for marine suppliers all over the world and through expanding service fields with establishment of Machinery Services Div. and Techno-Network Div. Now we enjoy No. 1 reputation in both name and reality. By taking advantage of the world-wide network and wealth of knowledge about world's articles fostered through marine supply, we created a new trend in Japanese domestic market, and imported liquors, food stuffs, brand name products which we handle, greatly support our company. Further, in addition to the conventional business, we have entered into land fields supplying machinery and equipment to plants in many countries.

Hitachi Zosen U.S.A. Ltd. (HZUSA), a U.S. subsidiary established by Hitachi Zosen Co., Ltd. in 1979, started operations in New York in 1956.

In the U.S.A. market, we have a track record of delivering a large number of products to the U.S. market such as automobiles (press machines), semiconductors (vacuum valves), petroleum refining, petrochemicals, natural gas (reactors and pressure vessels), and nuclear power market (spent nuclear fuel transportation and storage containers).

To contribute to a carbon-free society, Hitachi Zosen revised its organization in April 2022 and established the Carbon Neutral Solution Business Headquarters, and is engaged in the sale of products related to renewable energy such as hydrogen generators and methanation plants, and contributes to customer service.

Hitachi Zosen is a pioneer in the expected methanation technology in the U.S. and is engaged in activities to respond to the needs of customers such as U.S. engineering companies and electric power companies. Hitachi Zosen INOVA USA, a U.S. affiliate, is a leading company in the green gas business in the U.S. and has also invested in a business with local governments as well as many plant constructions and operations. We intend to be the first to provide products and services that will contribute to a carbon-free society in the future.

Company and Product/Service Overview, Activities in Texas

IINO KAIUN KAISHA, LTD. is a Japanese corporation operating maritime transportation across a global network.

The history of IINO Japan can be traced backed to 1899, when the founder Torakichi Iino began transporting coal by barge at Maizuru Port, Kyoto Prefecture. Now, IINO Group extended into two distinct businesses: the shipping business focusing on the transport of resources and energy and the real estate business engaged in office leasing.

IINO Japan and USA conducts oceangoing shipping business and regional shipping business through its stable supply of a diverse variety of cargo. The IINO Group fleet includes oil tankers, chemical tankers, LNG carriers, LPG carriers, and dry bulk carriers.

IINO Japan also has been providing a full range of real estate services in Tokyo and London, including integrated maintenance management.

INPEX Americas, Inc., a US subsidiary of INPEX Corporation which is the largest upstream oil and gas company in Japan, was established in 2003 and has been engaged in oil and gas exploration and development activities primarily in the US Gulf of Mexico.

In 2012, the company acquired the participating interest of Lucius deepwater project in the US Gulf of Mexico, which continues to produce oil and gas since its start of production in 2015.

In 2019, the company acquired the oil and gas development and production assets in Eagle Ford shale play in TX through its wholly-owned subsidiary, INPEX Eagle Ford, LLC.

INPEX Eagle Ford owns and operates assets covering more than 10,000 acres, primarily in Karnes County, Texas, producing and selling local market all crude oil and natural gas. INPEX plays a role in ensuring stable energy supply in US.

INPEX considers the various shifts towards a net zero carbon society seen around the world as new challenges as well as opportunities to further expand its business. Based on its Long-term Strategy and Medium-term Business Plan, so called "INPEX Vision@2022", the company will proactively engage in energy structure reforms such as CCUS, Hydrogen/Ammonia towards the realization of a net zero carbon society by 2050 while responding to the energy demands around the world.

Year of Establishment	<Texas> 2003 <Japan> 2003	Contact Person in Texas	HOSHIDE Akihiko, Director
Annual Sales	<Texas> - <Global> -	Texas TEL	281-333-5999

Company and Product/Service Overview, Activities in Texas

The Japan Aerospace Exploration Agency (JAXA) was born through the merger of three institutions, namely the Institute of Space and Astronautical Science (ISAS), the National Aerospace Laboratory of Japan (NAL) and the National Space Development Agency of Japan (NASDA). It was designated as a core performance agency to support the Japanese government's overall aerospace development and utilization.

JAXA, therefore, can conduct integrated operations from basic research and development, to utilization. The JAXA Houston Office, which covers the southern area of the United States, serves mainly as a liaison office with the NASA Johnson Space Center (JSC). The JSC manages manned space programs, for which the JAXA Houston Office offers an extensive range of assistance, including the training of astronauts and the development and operation of the International Space Station.

Company and Product/Service Overview, Activities in Texas

JOGMEC, or Japan Oil, Gas and Metals National Corporation, is a government-related organization that collaborates with governmental agencies and companies both at home and abroad with a view to secure stable supplies of natural resources and energy for Japan, while contributing to the development of resources and energy business worldwide as the duty of a large energy-consumption nation. To contribute to dynamic development of natural resources and energy, JOGMEC's main areas of responsibility are oil and gas, metals, coal and geothermal.

JOGMEC joins hands with Japanese private companies in each of these areas at various phases of projects through geological surveys, technological development, financial support, stockpiling, environmental protection, and gathering and provision of information, to name just a few. International cooperation and collaboration are also at the forefront of JOGMEC's activities, which are designed to contribute to the stable supply of natural resources and energy, indispensable for the national livelihoods.

JOGMEC Houston office is responsible for survey trend of oil and natural gas industry in the north, central and south American countries.

Company and Product/Service Overview, Activities in Texas

JETRO, or the Japan External Trade Organization, is a Japanese governmental organization that works to promote mutual trade and investment between Japan and the rest of the world.

JETRO Houston was established in 1969, the year the world was thrilled by mankind first landing on the surface of the moon. For more than 50 years, we have helped connect businesses in Texas and Japan.

If you're thinking about doing business with Japan, our motto is: talk to JETRO First.

- We convey the appeal of doing business in Texas, and cities throughout the state, to Japanese companies. We also support Japanese companies entering Texas.
- We support Texas companies related to new technologies, cutting-edge industries, life sciences, renewable energy, and other innovative technologies or ideas to enter Japan.
- We support Texas companies interested in open innovation with Japanese companies.
- We introduce Texas companies interested in selling Japanese agricultural products, alcohol, daily necessities, or similar goods that are increasing in popularity in the US to Japanese partners.

Company and Product/Service Overview, Activities in Texas

JERA Americas is a subsidiary of Tokyo-based JERA, which stands for Japan’s Energy for a New Era, and produces about 30% of all electricity in Japan .

Under its ‘JERA Zero CO2 Emissions 2050’ objective, JERA is working to achieve net zero CO2 emissions from its domestic and overseas businesses by 2050, promoting the adoption of greener fuels that do not emit CO2 during power generation.

JERA Americas is supporting an energy transition in an environmentally and socially responsible manner. North America is one of the core markets for the JERA group. JERA Americas manages power and fuel related businesses in the Americas mainly from its Houston office.

Currently JERA group owns 15 thermal power plants in the US and Mexico, and 1 wind power project under construction in Texas. Developing our renewable energy business is a key focus areas. For our fuels business, JERA participates in the Freeport LNG Project located on the Quintana Island, Texas, and is able to produce in excess of 15 million tons per annum of LNG. Commercial operation began in December 2019, and we will continue to export LNG to global destinations including Japan for many years to come.

Annual Sales	<Texas> - <Global> -	Texas TEL	832-217-5186

Company and Product/Service Overview, Activities in Texas

JFE Steel is an integrated steel manufacturer that owns and operates blast furnaces using iron ore and coking coal as raw materials to produce finished products.

JFE Steel offers a diverse product lineup to meet the needs of customers and society. Our main products include steel sheets, steel plates, steel molds, steel pipes, electromagnetic steel sheets, stainless steel, bar wire, iron powder, titanium, slab products, etc. The globalization of the Japanese steel industry has been dominated by exporting products manufactured in Japan. However, to compete with the world's steelmakers, we provide detailed services and support through efficient local production and logistics systems.

The Houston office's principal activities are to provide technical and product (sheet and plate) support to clients in the automotive industry in Mexico, and technical and product (OCTG and line pipe) support to major oil companies in Texas.

Company and Product/Service Overview, Activities in Texas

Since 1930, we’ve built KOBELCO excavators to be leaders in the industry, adding innovation to our machines at every turn. It’s that attitude that lead to the development of the first short rear swing excavator, as well as the demolition machine with the longest reach in the world.

Today, we’re continuing our commitment to quality and innovation. We’re building the strongest dealer network in North and Latin America. And we’re stocking our parts facility in Texas with more than 54,000 items ready to ship overnight. With one eye on the future, we’re staying ahead of the competition and anticipating what you’ll need tomorrow.

Company and Product/Service Overview, Activities in Texas

Kobelco Welding of America, Inc. (KWAI) was established in Houston, Texas in 1990 as a wholesale company owned by Kobe Steel USA Holdings for marketing Kobelco welding consumables in North America and Latin America.

Since KWAI launched its business, it has worked closely with all of its customers through quality services both in sales activities and technical support. KWAI has earned rapid growth led by its excellent reputation and the distributor’s sales network expansion nationwide. Today, more than 300 distributors are stocking Kobelco welding wires, mostly flux-cored wires, supplied from KWAI. KWAI’s stainless steel flux cored wires have earned the largest market share, 40%, in the North American market. KWAI has been pursuing customer satisfaction, through activities based on the business slogan QTQ (Quality products, Technical support, and Quick delivery), targeting a higher market share.

Furthermore, KWAI is expanding its welding robot “ARCMAN™” business in North America. Kobe Steel, the only welding solution company that develops all of its own original welding materials, welding robots, and welding power sources, aims to be your best partner for heavy steel fabrication, including structural steel, bridges, construction machinery, and shipbuilding fabrication, etc.

Company and Product/Service Overview, Activities in Texas

With top-of-the-line research and production facilities located worldwide and a global supply network, Kuraray leads the industry in producing specialty resins, film, elastomers, fiber, and dental materials found in many everyday consumer goods.

Our U.S. headquarters is located in Houston, TX, with four production facilities throughout the region. We established our first plant, the EVAL™ (ethylene vinyl copolymer gas barrier resin) facility, in 1986. EVAL™, a resin with barrier properties that excel against the permeation of gases and prevent leakage, is an effective and efficient material for food packaging, automotive gas tanks, and a wide variety of industrial products. In 2002, we opened our SEPTON™ plant. SEPTON™ is a styrenic thermoplastic elastomer. SEPTON™ can be processed in a wide variety of forms, including consumer goods, soft-touch grips, and automotive components. The KURARAY POVAL™ (polyvinyl alcohol resin) plant opened in 2016. Kuraray acquired Vinyl Acetate Monomer (VAM) and ELVANOL™ (polyvinyl alcohol resin) from DuPont in 2014. These polyvinyl alcohol resins provide unique and beneficial characteristics to their applications, making them excellent in consumer and industrial products. The resin has many derivatives such as TROSIFOL™ PVB Film, a structural and functional interlayer film for automobile windshields and building windows, Kuraray POVAL Film for LCD polarizing plates for TV, PC, and mobile phones, PVA water-soluble, biodegradable film for unit-dose applications, and KURALON™ fiber for a variety of industrial applications.

The Kuraray Group is committed to developing new business fields using pioneering technology that improves the environment and enhances the quality of life throughout the world. For more information, please visit www.kuraray.us.com.

Kureha America Inc.

Company and Product/Service Overview, Activities in Texas

Kureha America Inc. is a holding company of Kureha U.S. Group, which consists of two subsidiaries — Kureha PGA LLC, which manufactures Polyglycolic acid (“PGA”), and Kureha Energy Solutions LLC, which sells degradable downhole tools used in oil and gas fields. Kureha America Inc. also has a function as a trading company that sells a variety of chemical products manufactured by our parent and affiliated companies.

Our product portfolio includes Seaguar(Fluorocarbon Fishing Line), Microspheres, Carbon Fiber, Krehalon (Food Packaging), and KF Polymer (PVDF). We have been operating our warehouse in KY since 2018 to improve customer satisfaction. In addition, Kureha America Inc. launched a new team called the “New Business Creation Team” in 2019. The goal of the team is to find innovative businesses in various industries such as Energy, Life science, Agricultural, etc. by collaborating with universities or companies with state-of-the-art technology.

Annual Sales	<Texas> - <Global> JPY 144,575 million (March 2021)	Texas TEL	713-893-0730

Company and Product/Service Overview, Activities in Texas

Kureha Energy Solutions LLC has been established to market and sell polyglycolic acid (“PGA”) downhole tools used in oil and gas fields in the Americas. Headquartered in Houston, Texas, we have multiple representatives and warehouses in major shale plays area.

An outstanding feature of our products is the degradability. While conventional tools made of non-degradable materials need to be removed from the well after usage, our products degrade in the well. We contribute to oil & gas operators significantly, generating an extra value by reducing cost, time and risk during the well completion process. Moreover, we provide technical support and services to ensure the products are used suitably at well locations.

Collaborating with Kureha Corporation, who manufactures and assembles our products, we are continuously gaining an exceptional reputation for such services based on our specialized technical knowledge. We will continue contributing our unique value to the energy industry by taking advantage of our integrated innovation from raw materials to tools.

Company and Product/Service Overview, Activities in Texas

Mitsubishi Corporation (Americas) is a wholly-owned subsidiary of Mitsubishi Corporation, a globally integrated business enterprise with 10 business groups that operate across virtually every industry. These include natural gas, industrial materials, petroleum & chemicals, mineral resources, industrial infrastructure, automotive & mobility, food industry, consumer industry, power solution, and urban development.

Mitsubishi Corporation has had a presence in the United States since 1954 when Mitsubishi International Corporation ("MIC") was incorporated as a wholly-owned subsidiary of Mitsubishi Corporation. In 2012, Mitsubishi Corporation (Americas) ("MCA") was established as the US holding company for MIC and other MC Group companies in North America.

Through its various business groups and subsidiaries, MCA engages in strategic investment and global trading of industrial and consumer products.

In Texas, we have a long history of doing business in the natural gas and petrochemical fields, and in recent years have expanded that business to other fields, while pursuing our strategy to achieve energy and digital transformation. Our major subsidiaries in Texas include Diamond Gas North America Corporation, CIMA Energy, LLP (Natural Gas), Sesaco Corporation (Food Industry), and Diamond Realty Investment Inc. (Urban Development).

Company and Product/Service Overview, Activities in Texas

Mitsui & Co., Ltd., Mitsui USA is engaged in business investment, project development and management, capital goods leasing and technology transfer, in addition to traditional businesses of a sogo shosha (general trading company) such as import, export, off-shore trade and domestic wholesale.

The Houston office is the second largest Mitsui USA office after the headquarters in New York City. The office plays a significant role in supporting and expanding businesses, especially in energy, chemicals, steel, and mobility industries, sometimes in close alliance with Mitsui & Co. group companies.

For example, the energy division aims at providing a steady energy supply by developing value chain from upstream to downstream. The chemical division trades and distributes basic petrochemicals (e.g. olefins, aromatics, and industrial chemicals), and chlor-alkali. The steel division engages in energy-related steel (e.g. pipe, plate) and construction-related steel (e.g. hot rolled coil). The mobility business division promotes a steady supply of transportation infrastructure with global business partners in the fields of shipping, aviation, space and rail. "

Annual Sales	<Texas> - <Global>	Texas TEL	+1(832)615-6476

Company and Product/Service Overview, Activities in Texas

MOL Houston is mainly engaged in energy transportation including operations and business development in North and South America.

The LNG/Offshore team, as a local base for US Shale Gas transportation, serves valued customers providing support to vessel operations and maritime technical information. For offshore business, with experience and expertise accumulated through energy transportation, we develop FPSO (Floating Production,

Storage, and Offloading) business and FSRU (Floating LNG Storage and Regasification Unit) business, mainly in Central and South America.

The Tanker team offers transporting crude oil, petroleum products, LPG, methanol, and related customer service, operational support, and developing new business such as Ammonia, Hydrogen, L-CO₂.

2 group companies are in the same office: MOL Chemical Tankers America, which handles ocean transportation of liquid chemical cargoes, and Nippon Concept America, which provides intermodal transportation of liquid chemical cargoes using ISO tank containers. As MOL group, we are offering wider range of requirements for our customer to transport liquid chemicals.

We will be developing renewable energy related businesses, mainly where our expertise and experience as a shipping company can contribute.

Annual Sales	<Texas> - <Global> -	Texas TEL	713-754-1000

Company and Product/Service Overview, Activities in Texas

Established in 1989, Nippon Chemical Texas Inc. ("NCTI") has been conducting business for more than 30 years here in Houston, Texas. Among ENEOS group companies, what makes us stand out most is that NCTI focuses on manufacturing & globally marketing our specialty chemical materials to industrial customers.

NCTI has mainly two material categories, both of which are manufactured by utilizing proprietary technology developed by ENEOS. The first one is Specialty Aromatic Solvent ("SAS"), which is used for various industrial applications including capacitor fluid, heat transfer fluid, and compressor wash oil. The second one is Ethylidene Norbornene ("ENB"), which is mainly used for special rubber application in automobiles.

If you are interested, please contact our Global Sales Manager, Mike Sexton (msexton@nctius.com). We consider it highly important not only to supply value-added materials to customers, but also to contribute to our society by developing new products for realizing better lives in future.

Company and Product/Service Overview, Activities in Texas

NIPPON EXPRESS USA was established in 1962 as the first overseas subsidiary of Nippon Express. For nearly 60 years, we have provided comprehensive transportation services including Air and Ocean Import/Export, Warehousing, Trucking, and Moving services. Since 1975, we have locations in Laredo, McAllen, and El Paso along the Mexican border, in addition to Dallas, Houston, and San Antonio. We are expanding our business through a network of six locations, the largest number of locations among Japanese logistics companies. Each location has its own warehouse, a total of 276,000 SQF, and provides high-quality logistics services through in-house systems and extensive training. We operate shuttle trucks that connect two major international hubs, DFW and IAH Airports, to various cities in Texas, providing a speedy Air cargo transportation network. In ocean freight forwarding, we provide our own transportation services which cover Port of Houston, West Coast, and East Coast in all directions. Utilizing our network of strengths, we operate daily milk-run trucking services between San Antonio, the center of the Texas automotive industry, and automotive suppliers in various Midwest cities, as well as cross-border trucking services to Mexico. Nippon Express has logistics capabilities to support your business in Texas, the U.S., and globally.

Since its inception in 1899, ClassNK has been engaged in a range of activities dedicated to ensuring the safety of life and property at sea and protecting the marine environment over its over 120 years of history as a leading classification society.

ClassNK conducts surveys from its worldwide service network of around 130 offices to ensure that all new and existing ships and offshore structures fully comply with the classification rules developed by the Society. The rules cover not only hull structures but also propulsion systems, electrics, electronic systems, safety equipment, cargo handling gear, various materials, and navigational equipment, among other systems and components.

ClassNK has authorization from over 100 flag administrations around the world to conduct statutory surveys and issue certifications by international conventions and national rules and regulations. Houston Office provides all ships and offshore structures being registered to our society with the above services in Texas and a part of Louisiana.

**World class support,
anytime anywhere in the world**

ClassNK is a global classification society, providing the highest quality survey and certification services through a network of over 130 exclusive surveyor offices across the world. Established over a century ago, our highly qualified surveyors are there to support your needs, when you need them. Learn more about our efforts to advance maritime safety and protect the marine environment at www.classnk.com

Annual Sales	<Texas> - <Global> JPY 1,586,879 million (March, 2022)	Texas TEL	713-354-9100

Company and Product/Service Overview, Activities in Texas

Osaka Gas USA Corporation ("OGUSA"), a wholly owned subsidiary of Osaka Gas Co., Ltd. ("Osaka Gas"), was formed to expand Osaka Gas' presence in the United States and beyond.

Since our first investment in the US market in 2004, we have been successful in developing, as well as to own and operate energy business such as gas fired IPP & renewables, Freeport project (LNG liquefaction and trading), and shale gas development. We will continuously contribute to stable and sustainable supply of energy as well as to realize a low carbon society. We will accelerate carbon neutralization of our existing business, and boost renewable/future energy development innovation (e.g., synthesized methane, green ammonia/hydrogen, etc.).

With substantial experience in the energy sector, we are looking to grow into a leading energy company in North America.

Company and Product/Service Overview, Activities in Texas

Established in 1952 and headquartered in New York City, Sumitomo Corporation of Americas (SCOA) is the largest subsidiary of Sumitomo Corporation, one of the world’s leading traders of goods and services. As an integrated business enterprise, the company is a major organizer of multinational projects, an important international investor and financier, and a powerful force for the distribution of products and services through a network of offices worldwide.

In Texas, SCOA engages in a wide variety of businesses and industries, including but not limited to energy, chemical, infrastructure, real estate, tubular products, and climate change-related. From renewable energy infrastructure projects like the Mesquite Creek Wind Farm to master-planned communities such as Town Lake to our many subsidiaries and portfolio companies supporting all areas of the oil and gas value chain, SCOA has and continues to invest in industries that are important to the Texas economy. In the past two years alone, SCOA has broken ground on three different sites in Texas: Summit Industrial Park, a logistics hub for tubular transport in the Midland area; and two industrial land sites in the Dallas Fort Worth area that are being developed into logistics supply facilities or warehouses to help support the booming e-commerce market.

Company and Product/Service Overview, Activities in Texas

TADANO AMERICA CORPORATION (TAC) is a wholly owned subsidiary of TADANO Limited in Japan, and in charge of sales and services provided for Rough Terrain Cranes, All Terrain Cranes, Crawler Cranes and Truck Cranes as the base of the business in the Americas. In 2018, TAC marked its 25th anniversary. In 2019 at the end of July, TADANO Limited completed the acquisition of Demag business between Terex Corp. This acquisition has enabled us to strengthen the All Terrain cranes line-up and add Lattice Crawler cranes to our product line to meet more customer’s demands. In 2020, TAC integrated sales & service networks in North and Latin America. And also added telescopic boom crawler cranes made by TADANO MANTIS CORPORATION (TN, USA) to our lineup for sales and service in the territory of Americas. We define our business domain as "Lifting Equipment (LE)= anti-gravity and aerial working products", and aims as "LE No. 1", "Overseas (outside of Japan) Sales Ratio 80%" and "Stable and Profitable Company". As one of the major subsidiaries in TADANO group, TAC promises to continue providing reliable products and services to the market from Houston under our core value of "Sozo(Creation)", "Hoshi(Contribution)" and "Kyoryoku(Cooperation)"

Company and Product/Service Overview, Activities in Texas

Company and Product/Service Overview, Activities in Texas

Tokyo Gas America Ltd. (TGAM) was established in Houston, Texas on February 1, 2013. It is fully owned by Tokyo Gas Co., Ltd, one of the largest gas & power utility companies in Japan. We develop wide-ranging businesses that include upstream businesses, renewable energy projects, gas fired power generation, natural gas liquefaction, LNG exportation and energy services. In Texas, our main business is shale gas and renewables.

Our Operations in Texas:

- East Texas Project: TGAM has approximately 80% of equity interest in TG Natural Resources (TGNR), formed to acquire and develop oil and gas assets in the East Texas and North Louisiana. TGNR owns over approximately 304,000 net acres, which produced over 385 million cubic feet equivalent per day as of December 2020
- Eagle Ford Shale Gas Project: TGAM has 25% of working interest in the Eagle Ford Basin with Lewis Energy Group.
- Aktina Solar Project: TGAM is 100% owner of this solar power generation project which has a capacity of 500 MWac. This will be the largest solar power generation plant in Texas to date, located in Wharton County. The Aktina Solar Site has been commercially operated since July of 2021.

Annual Sales	<Texas> USD 609 Million (FY2021) <Global> USD \$31 Billion (FY2020)	Texas TEL	713-466-0277

Company and Product/Service Overview, Activities in Texas

In 1977, Toshiba International Corporation established its corporate office and main campus on the corner of Eldridge and West Little York in Houston, Texas. A prime location within 10 miles of the Energy Corridor, TIC covers over one million square feet of manufacturing with auxiliary facilities around North America.

Four main divisions - Motors & Drives, Power Electronics, Automotive and Solution Products – research and develop industrial products covering industries such as oil and gas, utilities, datacenters, renewables, HVAC, water/wastewater, food, mining and railway to name a few. TIC has a proven history of putting the customer first and understands that quality of service is as important as the product. Teams from sales, field service, and customer service strive to ensure ease of business is top-of-mind when engaging with customers. The national sales force logs thousands of miles each year making in-person visits to even the most remote industries to build relationships. Customer service reps are standing by, even in the immediate aftermath of historic Hurricane Harvey, to lend a human voice to any questions customers may ask. And in the event service is required, TIC field service experts are dispersed across North American to be deployed at a moment’s notice.

Annual Sales	<Texas> USD 72 Million (2021) <Global> JPY 288 Billion (2021)	Texas TEL	979-778-1538

Company and Product/Service Overview, Activities in Texas

Founded in 1896, we have developed materials including pigments, resins, and original technologies such as color material design, polymer design, and dispersion processing. The strength of the Toyo Ink Group lies in that we control all these materials and know-how from within. We create unique products by adding a broad array of functions based on practical applications, such as printability, coating physical properties, durability, or electrical characteristics. We will continue to offer higher value-added products to many different markets and business areas.

Toyo Ink started business in the United States in 1976. Since that time, Toyo Ink America has grown into four business divisions within the U.S. Today, Toyo Ink America has a wide variety of products including printing inks, colorants, and functional materials. Regardless of the application or processing needs, our experts can help you resolve issues, improve productivity, and deliver value to your customers.

Toyo Ink America has developed a unique network of distributors, technical specialists, and sales/support experts to cover nearly all regions in the U.S. Combined with our local manufacturing, research, and digitized color-matching capabilities, our commitment to quality and customer service is as vibrant and reliable as the very color materials we craft.

Valqua NGC, Inc.

Japanese HQ	Valqua Limited	Industry Classification	Chemical

Company and Product/Service Overview, Activities in Texas

VALQUA NGC, established in 1981, is the recognized leader in fluoropolymer-lined chemical storage and transportation vessels. Since that time, we have provided thousands of linings for chemical processing, transportation, and storage vessels worldwide.

<Mission Statement>

VALQUA NGC will provide the highest quality fluoropolymer linings and lined equipment, meet our customer's expectations, and earn their confidence in our products, services, and personnel.

<Lining Technology>

Our lining system combines the well-known qualities of fluoropolymer with a highly advanced application and welding process to provide contamination free storage, handling and transportation of high-purity material.

<Products>

In addition to lining containers, we also sell a wide variety of parts such as PFA lined valves, tubes, hoses, coupler and connectors, rupture discs and so on.

<Services>

With lining-related technology accumulated over many years, we can meet the diverse needs of our customers, such as legal inspections, various types of maintenance, voluntary inspections, and large-scale tank modifications.

Company and Product/Service Overview, Activities in Texas

The Plano, Texas, location of Aisin Technical Center of America (ATCA) is part of a growing network of technology development centers around the United States, which also includes Northville and Ann Arbor, Mich., and Silicon Valley, Calif. ATCA-Texas was established in 2017 and is focused on solving current and future mobility social issues while creating new value in vehicle navigation, connected and location-based service technologies, and logistics. The fifth largest Tier One automotive supplier in the world, and manufacturer of world-class vehicle navigation systems, Aisin today is recognized as a global leader in the auto industry as it transforms to electrification and carbon neutrality. More than 50 team members work in the ATCA office in Plano and are involved in design, advanced development, software and applications engineering, project management, server operations, validation and administration. Together, this highly technical team works to leverage its rich experience in navigation technologies to realize solutions that will contribute to safe and comfortable mobility in the vehicles and societies of the future.

Meanwhile, in September 2021, another Aisin company – Aisin Corporation Texas – celebrated the grand opening of its newest manufacturing plant in North America and its first in Texas. The 463,800 square foot plant in Cibola produces high quality/high performance automatic and Hybrid transmissions and is expected to employ more than 900 team members as the plant expands. Aisin plans to grow the plant into a highly advanced, innovative manufacturing facility, a so-called “plant of the future,” which not only responds to the current demand for automatic transmissions, but also to future technologies, including the next generation of mobility needs and electrification.

Year of Establishment	<Texas> 2017 <Japan> 1976	Contact Person in Texas	HIROSHI KATO
Annual Sales	<Texas> - <Global> -	Texas TEL	469-661-9201

Company and Product/Service Overview, Activities in Texas

Established in 1987, d/b/a “ ena Gakkyusha U.S.A. Co., Ltd. is a wholly owned subsidiary of Gakkyusha Co., Ltd.,” that provides an educational program for Japanese pupils aged between 3 and 18 years. Gakkyusha U.S.A. opened its first school in the United States, ena New York, in April 1987. In 2019, we operate 12 schools in seven different states in the United States: New York, New Jersey, Illinois, California, Michigan, Maryland and Texas.

There are tens of thousands of Japanese families living in the U.S., particularly the East Coast, West Coast, and Mid West. Because of the major differences in the methods and goals between Japanese and American education systems, the children of these families are confronted with great difficulty upon returning to schools in Japan.

Although Japanese children generally adjust well to American schools when they move to the U.S., the opposite is not true upon return to Japan. Thus, especially given the differences in educational goals and methodology between the two education systems, the looming return to Japan has caused great concern to those Japanese parents whose children have been removed from mainstream Japanese education for some time. To fill this need for supplemental Japanese education, we have established preparatory schools that will provide a Japanese educational program for Japanese pupils temporarily living on the East Coast, West Coast, and MidWest.

Our program parallels the curriculum they would have received had they remained in Japan.

The popularity of matcha and other Japanese foods, as well as the growing interest in healthy lifestyles, is expected to continue to drive sales of green tea products around the world. In order to grow with this market, we need to promote the value of tea to consumers.

Our goal is to establish a reputation as a "Global Tea Company" that can contribute to the health of people around the world. We want everyone to know the many benefits of incorporating green tea into their daily lives. By positioning Ito En as a top Japanese tea brand, we hope to increase our market share overseas.

Company and Product/Service Overview, Activities in Texas

NIPPON EXPRESS USA was established in 1962 as the first overseas subsidiary of Nippon Express. For nearly 60 years, we have provided comprehensive transportation services including Air and Ocean Import/Export, Warehousing, Trucking, and Moving services.

Since 1975, we have locations in Laredo, McAllen, and El Paso along the Mexican border, in addition to Dallas, Houston, and San Antonio. We are expanding our business through a network of six locations, the largest number of locations among Japanese logistics companies.

Each location has its own warehouse, a total of 276,000 SQF, and provides high-quality logistics services through in-house systems and extensive training.

We operate shuttle trucks that connect two major international hubs, DFW and IAH Airports, to various cities in Texas, providing a speedy Air cargo transportation network. In ocean freight forwarding, we provide our own transportation services which cover Port of Houston, West Coast, and East Coast in all directions.

Utilizing our network of strengths, we operate daily milk-run trucking services between San Antonio, the center of the Texas automotive industry, and automotive suppliers in various Midwest cities, as well as cross-border trucking services to Mexico.

Nippon Express has logistics capabilities to support your business in Texas, the U.S., and globally.

Annual Sales	<Texas> - <Global> 1,129,254 million yen (FY2019)	Texas TEL	-

Company and Product/Service Overview, Activities in Texas

Sekisui Specialty Chemical's mission is to be a leading innovative polymer solutions provider, utilizing its prominent technologies and dedicated associates to create sustainable solutions essential to a better, safer, and healthier life for people everywhere.

In June of 2009, Sekisui Chemical Co., Ltd. acquired Celanese's PVOH (polyvinyl alcohol) business, taking control of facilities in Calvert City, KY; Pasadena, TX; one unit within a complex in Tarragona, Spain; as well as resources in the company's Houston Technology Center. The Celanese acquisition resulted in Sekisui Specialty Chemicals establishing entities in the United States, Europe, and Mexico. Through these three entities, Sekisui Specialty Chemicals endeavors to expand on new applications for polyvinyl alcohol products, delivering consistent quality and service to our customers worldwide.

In 2018, Sekisui Specialty Chemicals also began representing 3 new brands: Durastream CPVC compound and resins, Advancell thermo-expandable microspheres, and SLEC BK polyvinyl acetal resins. These new products come with the decades of Sekisui Chemical Group experience and worldwide support in each industry. SSC represents these products globally, and we are ready to collaborate with customers to create tomorrow's essential products.

Toyota (NYSE: TM) has been a part of the cultural fabric in the U.S. and North America for more than 60 years and is committed to advancing sustainable, next-generation mobility through our Toyota and Lexus brands.

During that time, Toyota has created a tremendous value chain as our teams have contributed to the world-class design, engineering, and assembly of more than 40 million cars and trucks in North America, where we have 13 manufacturing plants, 14 including our joint venture in Alabama (11 in the U.S.), and directly employ more than 54,000 people in North America.

Our 1,800 North American dealerships (nearly 1,500 in the U.S.) sold nearly 2.39 million cars and trucks in 2021. Since 2017, as part of the "One Toyota" initiative, all operations in North America (R&D, manufacturing, sales, marketing, after-sales and corporate functions) are conducted under "Toyota Motor North America (TMNA)".

NIPPON EXPRESS USA was established in 1962 as the first overseas subsidiary of Nippon Express. For nearly 60 years, we have provided comprehensive transportation services including Air and Ocean Import/Export, Warehousing, Trucking, and Moving services.

Since 1975, we have locations in Laredo, McAllen, and El Paso along the Mexican border, in addition to Dallas, Houston, and San Antonio. We are expanding our business through a network of six locations, the largest number of locations among Japanese logistics companies.

Each location has its own warehouse, a total of 276,000 SQF, and provides high-quality logistics services through in-house systems and extensive training.

We operate shuttle trucks that connect two major international hubs, DFW and IAH Airports, to various cities in Texas, providing a speedy Air cargo transportation network. In ocean freight forwarding, we provide our own transportation services which cover Port of Houston, West Coast, and East Coast in all directions. Utilizing our network of strengths, we operate daily milk-run trucking services between San Antonio, the center of the Texas automotive industry, and automotive suppliers in various Midwest cities, as well as cross-border trucking services to Mexico.

Nippon Express has logistics capabilities to support your business in Texas, the U.S., and globally.

Annual Sales	<Texas> - <Global> JPY 27,214 Billion	Texas TEL	210-263-4000

Company and Product/Service Overview, Activities in Texas

Toyota broke ground on a manufacturing plant in San Antonio, TX in 2003, building its first truck in 2006. As the plant grew, eventually adding a second shift, employment also grew. Today, TMMTX employs approximately 3,200 team members and another 4,000 people work for suppliers on the 2,000-acre campus.

In 2020, Toyota announced plans for focusing on full-size body-on-frame vehicles. New technology supporting manufacturing advancements added to the facility made it possible to launch the Tundra Hybrid and Sequoia SUV in 2022.

Toyota has invested over \$3 billion into the San Antonio plant since its groundbreaking. Toyota Motor Manufacturing, Texas continues to play a key role in education and workforce development in the San Antonio community.

TKR is a worldwide leader in Manufacturing, Service and Logistics located in the border cities of Laredo, TX & Nuevo Laredo, Mexico offering a unique quality on a widespread range of services such as:

- Electronic Manufacturing Services
- Injection Plastic Molding
- Reverse Logistics
- Warehouse & Distribution
- After Market Services.

TKR has a strategic location in one of the main imports and export ports for international trade in USA/MEXICO, a city that gives competitive advantages in the market.

Our current infrastructure includes 2 industrial buildings: 1 manufacturing plant in Nuevo Laredo, Mexico, and 1 Warehouse & Distribution Center in Laredo, Texas. These facilities ensure our company has the capacity to fully support the manufacture of products in a coordinated, effective and safe way to our customers.

We aim to continue growing together with our customers.

Our Philosophy “All services and products that we deliver start from listening to the customer’s voice.

Company and Product/Service Overview, Activities in Texas

Vinton Steel, LLC is a mini-mill that produces steel with EAF technology and uses ferrous scrap as a primary raw material.

The steel making facility consists of two electric arc furnaces, continuous casting and rolling mill, recycling more than 250,000 tons per year.

Automobiles, major household appliances, industrial scrap and other forms of salvaged steel are converted into new steel products in our plant.

Operations include scrap processing facilities, a steel mill, rolling mill, and a grinding ball mill.
