

AGC ASIA PACIFIC PTE LTD

A global materials company with 110+ years of history, providing advanced fluorochemicals and electronic materials for semiconductors.

BUSINESS SUMMARY

The AGC Group creates value through world-class materials and technologies across glass, chemicals, ceramics, and electronics, cultivated over more than 110 years. AGC contributes to the most advanced sectors of the electronics industry.

TECHNOLOGY / PRODUCT / SERVICES

AGC supplies electronic materials and advanced fluorochemical products for semiconductor manufacturing, including fluoropolymer films with heat and chemical resistance, fluororubber, paint fluoropolymers, fluorine gases, and specialty solvents.

COMPANY PROFILE

Asahi Diamond Industrial Malaysia SDN. BHD.

Manufacturer of precision diamond and CBN cutting, grinding, polishing, and drilling tools for industrial applications.

BUSINESS SUMMARY

Asahi Diamond designs and manufactures Diamond and Cubic Boron Nitride (CBN) tools for industries ranging from electric, electronics, semiconductor and others; while supporting their production processes of Cutting, Grinding, Polishing, and Drilling. Asahi Diamond Malaysia sales support office of Asahi Diamond Japan. Tooling consultancy for Malaysia and Singapore market.

TECHNOLOGY / PRODUCT / SERVICES

Asahi Diamond designs and manufactures Diamond tools for industries ranging from electric, electronics, semiconductor and others; while supporting their production processes of Cutting, Grinding, Polishing, and Drilling.

BUSINESS PARTNERSHIP INTEREST

Others

We are looking for more customers that are in the electronics and semiconductor industries who use diamond tools.

ASAHI ENGINEERING (MALAYSIA) SDN. BHD.

A subsidiary of Japan's Asahi Kogyosha, specializing in HVAC, cleanroom construction, and energy-saving solutions for manufacturing facilities.

BUSINESS SUMMARY

Established in 2012 as a wholly owned subsidiary of Asahi Kogyosha Co., Ltd., a leading Japanese company in HVAC and sanitary installation works. The company has a proven track record in cleanroom construction across multiple projects in Malaysia.

TECHNOLOGY / PRODUCT / SERVICES

The company specializes in cleanroom construction for semiconductor and manufacturing facilities. Services include new factory construction, expansion, renovation, and maintenance of existing factories, as well as energy-saving diagnostics.

BUSINESS PARTNERSHIP INTEREST

Others

We undertake new factory construction, expansion, renovation, and maintenance of existing factories. We also provide energy-saving diagnostics and proposals to reduce electricity consumption.

CANON MACHINERY MALAYSIA

A member under the Canon Industrial Group with over 30 years of local production experience in Malaysia, manufacturing die bonders for semiconductor assembly processes.

BUSINESS SUMMARY

Canon Machinery Malaysia is engaged in the manufacturing and sales of automation and labor-saving equipment, and primarily manufactures and sells die bonders for semiconductor assembly processes. With over 30 years of local production experience. Today, equipment is delivered directly from Malaysia to customers worldwide.

TECHNOLOGY / PRODUCT / SERVICES

The company manufactures equipment used in semiconductor assembly processes, specifically bonding integrated circuit (IC) chips onto lead frames or substrates. Its solutions deliver industry-leading precision and high productivity, supporting customers in improving manufacturing efficiency.

BUSINESS PARTNERSHIP INTEREST

OEM/ODM Partner

Others

We are looking for contract manufacturers for equipment component units to support our semiconductor assembly equipment production.

CANON SINGAPORE PTE. LTD.

A global leader providing state-of-the-art lithography, sputtering, bonding, and inspection tools for the semiconductor and electronics industries.

BUSINESS SUMMARY

Canon Industrial Group, one of four Canon Business Groups, develops top-of-the-line products for semiconductor, electronics, and manufacturing industries. Canon Singapore is the South & Southeast Asia headquarters, covering 22 countries with over 170,000 employees globally.

TECHNOLOGY / PRODUCT / SERVICES

Product range includes lithography tools for front-end and advanced packaging, PVD sputtering tools, atomic diffusion bonding equipment, MRAM etching equipment, die bonders/sorters, 3D wire-bonding inspection, curing ovens, substrate processing, vacuum components, and helium leak detectors.

ITOCHU MALAYSIA SDN. BHD. (C.I. TAKIRON)

Industrial PVC sheets for semiconductor wet process equipment.

BUSINESS SUMMARY

ITOCHU Malaysia serves as the regional hub for C.I. TAKIRON, a Japanese industrial plastic plate manufacturer. Their FM4910-listed PVC products are well established in wet process equipment for semiconductor front-end processes, with Southeast Asia experiencing the most significant growth.

TECHNOLOGY / PRODUCT / SERVICES

FM4910-listed PVC sheets used in semiconductor wet process equipment for cabinets, chemical tanks, ducting, drain pans, and covers. Offering high chemical resistance, flame retardancy, and lightweight properties as a cost-effective alternative to fluoropolymers for structural components.

COMPANY PROFILE

Daiichi Denzai Co., Ltd.

A Japanese cable company specialising in custom cables and harnesses for semiconductor and medical device manufacturing.

BUSINESS SUMMARY

With 58 years of history, our business areas cover the sales of electronic wires, cables, connectors, and cable assemblies. With over 600 Japanese customers in semiconductor, medical, and factory automation industries, we hold top market share in this field in Japan.

TECHNOLOGY / PRODUCT / SERVICES

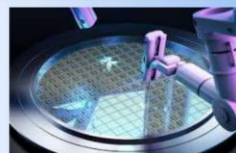

We specialize in custom cables and harnesses for semiconductor manufacturing equipment and medical devices. Our product range includes electronic wires, cables, connectors, and cable assemblies. Our original wires are widely used in semiconductor manufacturing equipment across Japan.

BUSINESS PARTNERSHIP INTEREST

OEM/ODM Partner

M&A into Malaysia Company

We are looking for contract manufacturers of harnesses for semiconductor manufacturing equipment in Malaysia.

Semiconductor Equipment

We supply electric wires to most Japanese semiconductor equipment manufacturers. We have the No. 1 market share in Japan.

Medical Equipment

Our electric wires hold the top market share in Japan, it has been used for CT, MRI, X-ray, and Ultrasound.

Factory Automation

We supply high quality Robot cables that can be used in harsh environments. It's all custom made according to customer needs.

DAIKIN CHEMICAL SOUTHEAST ASIA CO., LTD.

A global leader in high-performance fluorochemical materials with approximately 90 years of experience, providing innovative solutions for semiconductor manufacturing.

BUSINESS SUMMARY

Daikin Chemical Southeast Asia is a global leader in fluorochemicals with approximately 90 years of experience. The company provides high-performance materials, including fluorochemicals, to cutting-edge industries worldwide, offering a wide range of solutions that contribute to sustainable industrial development.

TECHNOLOGY / PRODUCT / SERVICES

Daikin is a global top-level fluorine chemical manufacturer, widely used across the semiconductor industry. Products include raw materials for tubes and valves, high-purity etching materials, coolants, sealing materials, and duct coatings — all built on decades of quality control and production technology expertise.

BUSINESS PARTNERSHIP INTEREST

Sales/Distribution Partner

We are looking for partners to expand our businesses in Malaysia, with a focus on supplying high-performance fluorochemical materials to the semiconductor and related industries.

E.B.S. Patrone (Malaysia) Sdn. Bhd.

The subsidiary of Sanshin Mfg., providing filtration, water treatment, and ion exchange resin regeneration services for the semiconductor industry

BUSINESS SUMMARY

Incorporated in Malaysia in 1996, E.B.S. Patrone (Malaysia) Sdn. Bhd. sells and maintains Sanshin products across Southeast Asian countries. The company has expanded its activities to assist both Japanese and local enterprises in planning new industrial facilities and supporting newly established enterprises.

TECHNOLOGY / PRODUCT / SERVICES

- Sales and construction of various filtration devices, wastewater treatment equipment, and demineralizers
- Maintenance, check, and remodeling of various devices
- Sales of related accessory equipment
- Regeneration of ion exchange resin

BUSINESS PARTNERSHIP INTEREST

Sales/Distribution Partner

- We are seeking new customers in Malaysia for our ion exchange resin take-back and regeneration service.
- This service has over 50 years of proven track record in Japan and has been widely used in facilities that require large volumes of water, such as plating lines.
- Key benefits include:
 - Reduction in water consumption
 - Stable production of purified water
 - Space-saving installation
 - Lower wastewater treatment costs.

IWATA & CO., LTD.

Japanese trading company specializing in chemicals and advanced materials, supporting industry and sustainability for over 120 years.

BUSINESS SUMMARY

IWATA & CO., LTD. is a Japanese independent trading company with over 120 years of history, specializing in chemicals and advanced materials that support industrial infrastructure and daily life. Founded in 1902 and headquartered in Nagoya, Japan, the company operates with the philosophy of "Chemistry for the Future," aiming to contribute to a sustainable society through the power of chemistry.

TECHNOLOGY / PRODUCT / SERVICES

IWATA & CO., LTD. operates across several specialized divisions, each supporting key industries:

- Chemicals Division - Procurement and supply of industrial chemicals and raw materials, supporting manufacturing sites and social infrastructure behind the scenes.
- Plastics & Packaging Division - Supply of resins and rubbers for food packaging, automotive components, and medical equipment, providing solutions from raw materials to finished products.
- Advanced Materials Division - Proposal and supply of advanced materials and equipment for the semiconductor, electronics, and Medical equipment industries, contributing to cutting-edge technology in Japan and overseas.
- Auton (Construction Chemicals) Division - Development and supply of high-performance urethane sealants and adhesives for construction, with a top-class market share built over more than 30 years of continuous improvement.
- Building Materials Division - Provision of construction materials and adhesives that support safe, durable, and comfortable housing, with a strong emphasis on long-term performance and innovation.

BUSINESS PARTNERSHIP INTEREST

Sales/Distribution Partner

We are looking to expand our sales network with the semiconductor-related companies in Malaysia

Nihon Denkei (Malaysia) Sdn. Bhd.

A distributor company for test and measurement solutions for contamination control and environmental stability in high precision manufacturing.

Denkei

BUSINESS SUMMARY

We are a Japanese distributor of test and measurement solutions, with customers in electronics, semiconductor, and other manufacturing industries via product supply, application support, and local follow-up. Our goal is to provide practical solutions that improve quality, testing capability, and operational efficiency.

TECHNOLOGY / PRODUCT / SERVICES

Our solutions portfolio includes,

1. RION Airborne and Liquid-borne particle counters for contamination monitoring
2. KOKEN KOACH ISO-Class1 clean bench for localized clean environments
3. ORION precision air conditioning systems for precise temperature and humidity control.

BUSINESS PARTNERSHIP INTEREST

OEM/ODM Partner

Research & Development

Proof-of-concept Partner

At this event, we are promoting particle counters for cleanroom environments, contamination measurement, and gas and fluid applications with a focus on the semiconductor industry.

We are open to other industries like:

- the automotive sector
- automotive suppliers, the electrical and electronics industry, air conditioning, data centres, universities and other manufacturing sectors.

Nishimura Advanced Ceramics Co., Ltd.

A manufacturer of advanced technical ceramics, delivering high-quality precision ceramic components to the global semiconductor industry

BUSINESS SUMMARY

We are a Japan-based manufacturer specializing in advanced technical ceramics. Our company has been dedicated to delivering high-quality, precision ceramic components, with a strong focus on the semiconductor market. Our company supports customers worldwide with reliable and highly customized ceramic solutions.

TECHNOLOGY / PRODUCT / SERVICES

- Wafer Vacuum Chuck. In-house manufacturing from powder to assembly
- Expertise in advanced ceramic materials
- Precision machining and consistent quality
- Flexible response to custom designs and small-to-medium volume production

BUSINESS PARTNERSHIP INTEREST

Others

We with our strong commitment to quality, reliability, and long-term business relationships, we are seeking partnerships with semiconductor industry players to understand their needs for ceramic components and to explore opportunities for technical collaboration and custom product development.

NTN Bearing-Malaysia Sdn Bhd

A subsidiary of NTN Corporation delivering high-quality bearing products and solutions to the automotive, industrial machinery, and semiconductor industries since 1973.

BUSINESS SUMMARY

Since 1973, NTN Bearing-Malaysia Sdn Bhd has served as the local subsidiary of NTN Corporation, delivering high-quality bearing products and services across automotive, industrial machinery, and semiconductor industries. The company contributes to energy efficiency and sustainability through friction-reducing technologies.

TECHNOLOGY / PRODUCT / SERVICES

NTN specializes in friction-reduction technology, offering products tailored for semiconductor environments including clean room bearings, linear motion systems, and parts feeders. These products are designed to meet the stringent requirements of semiconductor manufacturing.

BUSINESS PARTNERSHIP INTEREST

Others

We are seeking opportunities to supply clean room bearings, linear motion systems, and parts feeders to semiconductor manufacturers and related companies in Malaysia.

OHARA OPTICAL (Malaysia) Sdn. Bhd.

A pioneer in optical glass since 1935, providing high-homogeneity glass and advanced ceramics for semiconductor lithography.

ひかる素材で、未来をひらく

BUSINESS SUMMARY

Ohara, established in 1935, is a pioneer in optical glass in Japan. The company continuously develops cutting-edge materials for technological innovation, contributing to industrial advancement across optics, electronics, and semiconductor manufacturing.

TECHNOLOGY / PRODUCT / SERVICES

Ohara offers over 140 types of optical glass, i-Line high-homogeneity glass for semiconductor stepper cameras, CLEARCERAM-Z ultra-low thermal expansion glass-ceramic, and VAD-process synthetic fused silica for semiconductor and LCD applications.

COMPANY PROFILE

Website	https://www.ohara-inc.co.jp/en/
Address	Lot 6B & 6C, Merlimau Industrial Estate, 77300 Merlimau, Melaka
Founded	1991
Company size	N/A
Capital	N/A

BUSINESS PARTNERSHIP INTEREST

Research & Development

We seek contact and information exchange with companies involved in semiconductor front-end lithography equipment development, and manufacturers of optical inspection, machine vision, and measurement systems.

PILLAR SEAL SOLUTIONS MALAYSIA SDN. BHD.

An Osaka-based company holding approximately 90% global market share for fluoro-resin fittings used in semiconductor cleaning equipment, with a new manufacturing base in Penang.

BUSINESS SUMMARY

PILLAR Corporation is an Osaka-based company holding approximately 90% global market share for fluoro-resin fittings in semiconductor cleaning equipment. In December 2025, PILLAR established its first ASEAN semiconductor production base in Penang, Malaysia, strengthening supply and shortening lead times for equipment manufacturers.

TECHNOLOGY / PRODUCT / SERVICES

PILLAR's PFA tubes and fittings are used in wafer cleaning and chemical fluid delivery in semiconductor manufacturing. These applications demand high chemical resistance, heat resistance, and cleanliness — where any leakage could cause serious accidents. PILLAR products meet these stringent reliability requirements.

BUSINESS PARTNERSHIP INTEREST

OEM/ODM Partner

Sales/Distribution Partner

We are seeking partnerships with companies in the semiconductor manufacturing equipment industry to expand our presence in Malaysia and the ASEAN region.

COMPANY PROFILE

Website <https://www.pillar.co.jp/en/>

Address PT 5281, Jalan Cassia Selatan 3/8, Taman Perindustrian Batu Kawan, 14100 Simpang Ampat, Seberang Perai Selatan, Pulau Pinang

Founded 1924

Company size 1,308

Capital JPY 4,966,000,000

SANKYU MALAYSIA SDN. BHD.

A Japan-based logistics and plant engineering company with nearly 50 years of experience in Malaysia, offering integrated end-to-end solutions for the semiconductor industry.

BUSINESS SUMMARY

Sankyu Malaysia Sdn. Bhd. is a Japan-based logistics and plant engineering company with nearly 50 years of experience in Malaysia. Its strength lies in delivering end-to-end solutions by integrating logistics and plant engineering — from international forwarding and warehousing to equipment transportation, installation, and setup.

TECHNOLOGY / PRODUCT / SERVICES

In Penang, the company operates a bonded warehouse for dangerous goods, widely used by chemical suppliers as a VMI hub. It also provides end-to-end equipment handling, including transportation and installation, with proven experience serving semiconductor manufacturers.

BUSINESS PARTNERSHIP INTEREST

Others

We are seeking partnerships with chemical suppliers requiring dangerous goods warehousing, as well as manufacturers looking for integrated equipment transportation and installation services.

COMPANY PROFILE

A manufacturer of high-precision motors, cooling fans, and UPS systems essential for semiconductor manufacturing equipment reliability.

BUSINESS SUMMARY

We supply high-precision stepping motors and servo motors, cooling fan motors for thermal management, and UPS systems for power stability, all essential for semiconductor manufacturing equipment. By combining motion, cooling, and power solutions, we contribute to the overall reliability of semiconductor equipment.

TECHNOLOGY / PRODUCT / SERVICES

We offers three core product lines in our business.

1. Motion Control - both the servo and stepping motors with our unique PB motor.
2. Cooling Systems - environment-resistant cooling fans for humid, dusty, and cleanroom environments.
3. Power Systems - inverter technology with extended battery life.

BUSINESS PARTNERSHIP INTEREST**Sales/Distribution Partner**

We are looking for partners/distributors who want to grow together with us in the expanding semiconductor market in Malaysia.

By partnering with us, you will be able to offer your customers:

- Proven products used in world-class semiconductor equipment
- A complete solution covering motion, cooling, and power
- Reliable, long-term supply backed by global manufacturing

Shimizu Corporation

Design and construction of industrial factories, data centers, R&D facilities, offices, and warehouses.

BUSINESS SUMMARY

We are Japanese International General Contractor, ventured into Malaysia since 1982. We provide design & build or build only for industrial factories, data center, R&D center, office building, warehouses etc. Our activity covering whole peninsular Malaysia. Recent works: Dexcom South Campus, JOTUN Paint R&D and Office, US Data Center, NHK Manufacturing, Shimadzu, Panasonic R&D etc.

TECHNOLOGY / PRODUCT / SERVICES

Design-and-build and build-only construction services for industrial factories, data centres, R&D facilities, office buildings, and warehouses. Projects span Peninsular Malaysia with a track record including semiconductor, manufacturing, and technology sector clients such as Dexcom, Panasonic, Shimadzu, and NHK Manufacturing.

COMPANY PROFILE

SMFL LEASING (MALAYSIA) SDN. BHD.

The Malaysian subsidiary to Sumitomo Mitsui Finance and Leasing (SMFL) in Japan, offering a wide range of machinery and equipment through lease and hire purchase arrangements to support customer's diverse business needs.

BUSINESS SUMMARY

SMFL Leasing (Malaysia) Sdn. Bhd. is a subsidiary of Sumitomo Mitsui Finance and Leasing, Japan's longest-established leasing company. Established in Malaysia in 1997, the company provides tailored lease and hire purchase solutions for machinery and equipment.

TECHNOLOGY / PRODUCT / SERVICES

The company offers finance lease and hire purchase arrangements — purchasing machinery and equipment on behalf of customers from manufacturers and dealers, then leasing it directly to them. Each financing structure is customized to suit individual business needs.

BUSINESS PARTNERSHIP INTEREST

M&A into Malaysia Company

We offer flexible financing solutions for companies looking to invest in or expand operations in Malaysia. We can structure lease and hire purchase arrangements to support your business goals.

COMPANY PROFILE

Website	https://www.smfl-global.com/malaysia/en/index.html
Address	Suite 16D, Level 16, Vista Tower, The Intermark No.348, Jalan Tun Razak, 50400 Kuala Lumpur

SMFL MIRAI PARTNERS CO., LTD.

A secondhand semiconductor equipment trading and financing company under the Sumitomo Mitsui banking and Sumitomo Corporation trading company with warehouses in Japan, Korea and Taiwan.

BUSINESS SUMMARY

SMFL MIRAI Partners Co., Ltd. specializes in buying and selling secondhand semiconductor manufacturing equipment and providing equipment financing such as leasing. The company operates under the Sumitomo Mitsui banking group alongside Sumitomo Corporation.

TECHNOLOGY / PRODUCT / SERVICES

Our main solutions are:

1. Secondhand equipment provisions - we own several equipment in our facilities, but we often remarket the equipment on behalf of user who wants to sell them.
2. Financing structure – we provide leasing (Finance Lease/Operating Lease) through Sumitomo Mitsui Finance & Leasing (SMFL), customizing the structure for each customer's demand.

BUSINESS PARTNERSHIP INTEREST

Sales/Distribution Partner

M&A into Malaysia Company

We are primarily looking for sales agents and distributors in Malaysia, but we are open to any partnership opportunities in the semiconductor equipment market.

COMPANY PROFILE

Website	https://www.smfl-mp.co.jp/
Address	3-2, Marunouchi 1-chome, Chiyoda-ku, Tokyo 100-8245, Japan
Founded	October 2018

SUMITOMO HEAVY INDUSTRIES MATERIAL SOLUTIONS CO., LTD.

A manufacturer of ion implanters and laser annealing systems for the global semiconductor industry

BUSINESS SUMMARY

Our mission is to contribute to society through our products and services. Playing a role in changing the world in an extremely specialized field of the ion implanters and laser systems, we continue to challenge ourselves every day without being satisfied with the status quo.

TECHNOLOGY / PRODUCT / SERVICES

The company offers ion implanters (SAion, MC3-II GP, SS-UHE II, S-UHE) covering energy ranges from 0.2 keV to 6.8 MeV for applications including image sensors and power devices. It also provides laser annealing systems (SWA-20US, SWA-90GDA) for next-generation power device fabrication.

COMPANY PROFILE

Website	https://shi-ms.com/en/
Address	ThinkPark Tower, 1-1 Osaki 2-chome, Shinagawa-ku, Tokyo 141-6025, Japan April 1983
Founded	718 (As of January 2026)
Company size	JPY 480,000,000
Capital	

BUSINESS PARTNERSHIP INTEREST

Others

We are seeking to develop new customers in the Malaysian semiconductor market for our ion implantation and laser annealing equipment.

TANAKA Kikinzoku (Singapore) Pte. Ltd.

A world-class precious metals company contributing to the semiconductor and advanced technology industries through refining, recycling, and high-performance precious metal products.

BUSINESS SUMMARY

Tanaka Precious Metal Technologies Co., Ltd. is a world-class precious metals company with proven expertise in refining, recycling, and assaying. Its products are used across automotive, electronics, clean energy, nanotechnology, and biotechnology applications.

TECHNOLOGY / PRODUCT / SERVICES

TANAKA delivers high-performance precious metal materials and components for the semiconductor industry, automotive, and electronics sectors. Core capabilities include precision refining, recycling, and assaying — enabling reliable supply of high-purity materials for advanced manufacturing.

COMPANY PROFILE

Website	https://www.tanaka.co.jp/english/company/group/tkk/
Address	85 Science Park Drive, #04-07/08 The Cavendish, Singapore 118259

Tokyo Electron (Malaysia) Sdn. Bhd.

A leading global company in semiconductor production equipment, with comprehensive sales and service support in Southeast Asia.

BUSINESS SUMMARY

We are a leading global company in innovative semiconductor production equipment, engaged in development, manufacturing, and sales. TEL's product lines maintain high market shares in their respective global segments. In Malaysia, TEL provides comprehensive sales and service support for a diverse spectrum of customers.

TECHNOLOGY / PRODUCT / SERVICES

In Singapore, Malaysia and the Philippines, TEL has in place a comprehensive sales and service support structure to support the diverse spectrum of customers operating in this fast-growing region, ranging from memory, logic, analog, power devices, OSATs etc.

BUSINESS PARTNERSHIP INTEREST

OEM/ODM Partner

We are seeking local sourcing opportunities to strengthen our supply chain and support semiconductor manufacturing operations in Malaysia.

UZABASE, INC.

A premier economic information platform accelerating business expansion and strategic decision-making across Asia, with deep coverage of the semiconductor industry.

BUSINESS SUMMARY

Speeda provides access to 3.3 million Southeast Asian companies (720,000+ in Malaysia), 3,000+ industry reports including semiconductors, quarterly PESTLE analysis, and customized research with local analysts. The platform also connects users to a global expert network of 920,000 professionals, including 370,000 in Southeast Asia.

TECHNOLOGY / PRODUCT / SERVICES

Uzabase, Inc. provides Speeda, a premier economic information platform that accelerates business expansion and strategic decision-making across Asia. Headquartered in Tokyo with offices in Singapore and Bangkok, Speeda transforms business research by reducing competitor analysis and market reporting from days to minutes.

BUSINESS PARTNERSHIP INTEREST

Others

We bridge the information gap in Southeast Asia's semiconductor ecosystem, supporting Japanese and Malaysian companies with data-driven market strategies powered by corporate intelligence and expert networks.

Yokogawa Electric (Malaysia) Sdn. Bhd.

A global leader in measurement, control, and industrial automation solutions for semiconductor manufacturing with over 100 years of expertise.

YOKOGAWA 

BUSINESS SUMMARY

Yokogawa provides advanced digital and industrial automation solutions for semiconductor and electronics manufacturing. With over 100 years of expertise, the company supports digital transformation to improve manufacturing quality, operational stability, and productivity from its Malaysia headquarters in Puchong.

TECHNOLOGY / PRODUCT / SERVICES

Yokogawa offers production management solutions, after-sales management systems, temperature controllers, PLCs, machine controllers, data loggers, flowmeters, gas and oxygen analyzers, and test and measurement instruments for semiconductor manufacturing.

BUSINESS PARTNERSHIP INTEREST

Proof-of-concept Partner

Sales/Distribution Partner

Others

We are interested in collaborating with manufacturing companies and IT solution providers aiming to accelerate digital transformation in semiconductor, electronics, and advanced manufacturing operations.
