Japan has been the #1 source for Foreign Direct Investment (FDI) in the U.S (\$775 Billion in 2022) for four consecutive years since 2019. The total number of Americans employed by Japanese-owned manufacturing companies in the U.S. was 533,100 in 2021, which is the highest among all investor countries. In order to effectively proceed with future investment plans, Japanese companies need partners at the state and local government levels.

We would like to invite all attendees that are interested in networking with the Japan delegation as well as colleagues from JETRO USA and Tokyo.
