

ARM-Robotechs – the system integrator company established in Russia in 2011.

Our specialists have knowledge and skills of design and realize difficult projects with industrial robots FANUC (ABB and KUKA too), grippers and automation modules of SCHUNK, safety systems of TROAX and Fortress Interlocks, roller and belt conveyor systems of INTERROLL.

We use the complete package approach by design and produce of robotic solutions.

We active cooperate with production leaders of technological equipment and industrial robots. ARM-Robotechs company is certified system integrator-partner of SCHUNK, SCHMALZ, SMC pneumatic, TROAX, Fortress Interlocks, INTERROLL, FANUC.

- Official system partner-integrator of SCHUNK GmbH since 2011.
- Official system partner-integrator of SCHMALZ GmbH since 2012.
- Official system partner-integrator of SMC pneumatic since 2012.
- Official distributor of TROAX AB since 2013.
- Official distributor of Fortress Interlocks since 2015.
- Official system partner-integrator of INTERROLL since 2016.
- Official system partner-integrator of FANUC since 2017.

Our company welcomes cooperation with new Russian and foreign partners, and we are ready to implement the most interesting and ambitious joint projects.

## Main business profile of company

### Robotic production processes

- palletizing, sorting, Pick&Place, packaging
- loading/uploading of machines, TPA, presses
- automatically assembling with technical vision
- gluing

### Safety systems for industrial and DATA centers

- modular safety fences, doors, accessories
- industrial safety locks (Ple, PLd)

### Mobile robotic platforms for education, research and science works

- collaborative robots
- collaborative grippers
- anthropomorphic grippers

Unique complete solutions for educational sector.

**Our solutions** – contained 80% components, key parts and mechanisms from Europe, Japan and USA.

More than 750 design works, more than 50 complete projects (installations), more than 35 robots installed.

**Ourselves researches** of fixtures and safety system for industrial robots, mechanical and vacuum grippers.

**Service support** of projects after installation.

**Training** of specialists to work with equipment.

If you have the same actual tasks for your production company, we will be glad to participate in your projects and to divide with you our cumulative skills.
