TOYAMA as a business location

Toyama Prefecture is blessed with an abundance of pure and clean water and inexpensive electrical power.

Combined with its history of few natural disasters and tradition of fine and detailed craftsmanship, Toyama Prefecture has become the largest industrial concentration on the Japan Sea coast. The brochure “Creation of Vibrant Toyama” offers information about various location advantages of Toyama Prefecture.

It can be downloaded in [ENGLISH BROCHURE \(PDF\)](#) .

5-ALA PROTEX

js00032577

Price : 1,430JPY / 30 piece

BB : 720 days

Temp. : Dry

Category : Health Food

This supplement contains 5-ALA, a natural amino acid that was found to be 100% effective in inhibiting the growth of the new coronavirus through research conducted by Nagasaki University, and is made from authorized Japanese ingredients purchased from NeoPharma Japan, a company that conducted joint research with Nagasaki University.

In addition to 5-ALA, this product strongly supports mitochondrial activity by combining Japanese green lacewing (euglena), concentrated astaxanthin, NMN, niacin, and 22 types of lactic acid bacteria.

INGREDIENTS, ADDITIVES

5-aminolevulinic acid phosphate (manufactured in Japan), astaxanthin powder (dextrin, astaxanthin)
 β -NMN (nicotinamide mononucleotide), Euglena powder (dextrin, euglena)
 Lactic acid bacteria powder (maltodextrin, lactic acid bacteria)/crystal cellulose, niacin, Ca stearate, micro silicon dioxide (contains some dairy ingredients and soybeans)

Alpha Premium NMN 3000

js00032564

Price : 3,582JPY / 30 piece

BB : 720 days

Temp. : Dry

Category : Health Food

A capsule-type supplement that allows you to take 100 mg of NMN (nicotinamide mononucleotide), a "rejuvenating substance" discovered by Professor Shinichiro Imai of the University of Washington.

In addition to the anti-aging effect of NMN, astaxanthin, resveratrol, proteoglycan, which are concentrated twice the recommended amount, and biotin, which is a nutritional functional food, are also blended together with ingredients that strongly support antioxidant and cosmetic effects. It is also popular for its high body sensitivity, using acid-resistant capsules that reach the intestines alive.

INGREDIENTS, ADDITIVES

β -nicotinamide mononucleotide (NMN) (domestic production), reduced maltose starch syrup, rapeseed hardened oil, dextrin, red grape leaf extract, astaxanthin, salmon nasal cartilage extract / nicotinamide mononucleotide (NMN), HPMC, sucrose Esther, caramel color, biotin, gelatin gum

Arginine & Citrulline Powder

AFB211216269

Price : 2,780JPY / 240g

BB : 1 year or more

Temp. : Dry

Category : Health Food

Simultaneous intake of arginine and citrulline has various effects such as increasing height, improving head function, preventing aging, gaining muscle, and improving athletic performance.

Contains the recommended amount by Dr. Louis J Ignarro, who won the Nobel Prize for nitric oxide research.

We won the first place in the satisfaction ranking of the blending quantity of arginine supplements, and also won the Monde Selection.

It is a popular product that is also introduced on TV.

INGREDIENTS, ADDITIVES

[Domestic]

Reduced maltose starch syrup (domestic production), L-citrulline, grapefruit fruit powder/L-arginine, citric acid, flavor, sweetener (stevia), vitamin B6, L-valine, L-leucine, L-isoleucine

NEW INTERFERMIN LABRE 180

js00033309

Price : 4,800JPY / 1 bottle

BB : 1,095 days

Temp. : Dry

Category : Health Food

LABRE was born from Japanese traditional food.

The traditional food is Suguki pickles in Kyoto.

Suguki pickles are pickled only with salt.

The action of lactic acid bacteria makes delicious Suguki pickles.

One of the lactic acid bacteria is LABRE bacterium.

LABRE is amazing bacteria. It is characterized by having an intestinal regulating effect and an immune strengthening effect. We have made an even better invention. We made LABRE bacteria nano-sized to make it more effective.

Our New Interfermin LABRE also contains butyrate-producing bacteria and bifidobacteria to make a best supplement.

INGREDIENTS, ADDITIVES

Lactose / Vegetable oil / Bifidobacteria(BR-108)[heat-treated] / Labre bacteria[heat-treated] / Butyric acid bacteria(M-II588) / Vitamin C / (partially contains milk components and soybeans)

[Nano Labre bacteria] "Per daily intake standard amount / 18 billion Nano Labre bacteria" Labre is a lactic acid bacterium that was discovered and isolated from Kyoto's traditional food "Sugukizuke" by Dr. Tsunataro Kishida of the Kyoto Pasteur Institute. Nano Labre is a bacterium that improves the ability of the body to produce this interferon. Interferon does not increase (see more...)

01 | AUTHENTIC JAPAN SHUNME

We produce authentic Japanese shikki. All of the articles in Authentic Japan Shunme are made through traditional production process with totally natural materials such as urushi, wooden base, diatomaceous earth powder and rice powder. Nunokise is applied to specific items to increase the durability of them. Nowadays, it is getting rare to find this kind of shikki even in Japan. Many Japanese traditional crafts have adopted those kinds of chemical (see more...)

Miyabi Black Tame

js00031375

- Price : 33,000 JPY / 1 piece
- Cert. : -
- Category: Display Supplies

The shape of Miyabi requires a high level of woodturning skill, and shitaji, which is the crucial part of traditional production process of shikki, is applied on it by experienced artisans who can coat and smooth the surface so perfect that urushi can be applied to have a glossy finish.

Nunokise is the procedure in which the artisans, the shitaji, attach thin cloths to the surface and the rim of certain parts of the wooden bases after kijigatame to increase the durability of the shikki.

Ofukuwake Black Tame

js00031380

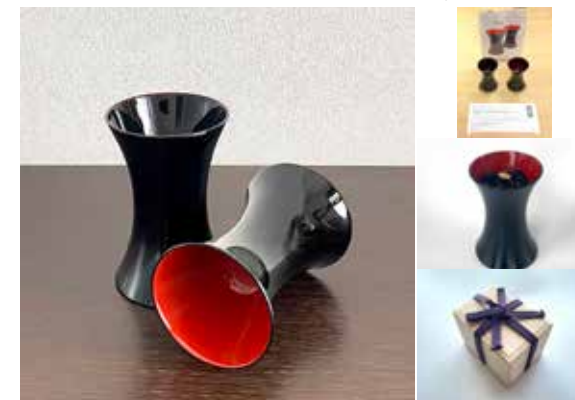

- Price : 63,000 JPY / 1 piece
- Cert. : -
- Category: Display Supplies

The surface of Ofukuwake reflects everything like a mirror. The skills required to manufacture such products are exceptionally high. There are many steps in the shitaji process including nunokise in which the artisans, the shitaji specialists, attach thin cloths to the surface and the rim of certain parts of the wooden bases after kijigatame to increase the durability of the shikki. Our shitaji can coat and smooth the surface so perfect that urushi can be applied to have a glossy finish.

Tsuzumi Black Tame

js00027074

- Price : 100,000 JPY / 1 piece
- Cert. : -
- Category: Display Supplies

The shape of Tsuzumi requires woodturners of exceptionally high degrees of technique, and shitaji, which is the crucial part of traditional production process of shikki, is applied on it by experienced artisans who can coat and smooth the surface so perfect that urushi can be applied to have a glossy finish. The skill of such shitaji specialists is becoming more and more invaluable today because not only of its superiority but also of the declining number of those specialists. Needless to say, as the surface of our items show, nushi, who applies urushi on our items, has outstanding skills as well.

Using only safe and secure domestic paulownia wood, our craftsmen make and sell modern, simple, and well-designed kitchen goods by hand. Although paulownia wood is not so familiar overseas, in Japan it has long been used as a wooden box for storing crafts, works of art, kimonos, and luxury accessories. We have specialized in paulownia wooden boxes since the Edo period (1603-1868), and have been manufacturing and selling paulownia products to (see more...)

Brand Container

js00029186

A long-established jewelry store founded in 1914 with its head office in Toyama Prefecture. From 2010, the 5th generation Rie Gomajima established the original jewelry brand GOMAJIMA and developed it mainly in department stores and select shops in Tokyo. RADEN JEWELRY, which is a fusion of Toyama Prefecture's traditional decoration technique "Raden" with delicate gold, is produced as the main jewelry. We are making efforts to pass on the precious (see more...)

RADEN JEWELRY

js00029021

- Price : 97,000 JPY / 5 piece
- Cert. : -
- Category: Fashion Accessories

The traditional decoration technique "Raden" has been handed down by craftsmen in Takaoka City, Toyama Prefecture since the beginning of the 17th century. Raden technique, which skillfully cuts out the nacre layer inside the shell and has iridescent luster, has been mainly used as a decorative technique for armor, porcelain, heavy boxes, etc., but it is now used for jewelry worn by women. I came up with the idea and made it into a work. By combining Raden and delicate gold, it gives off a unique color and presence and makes the wearer shine more elegantly and attractively.

RADEN JEWELRY KIKU

Black Label 58" Billiard Pool Cue Stick

js00033672

- Price : 45,000 JPY / 1 piece
- Cert. : -
- Category: Sports, Outdoor Items

BLACK LABEL as a spin-off brand of Universal Cue, which supplies high-quality products worldwide.

The butt cap features a monotone logo mark representing the BLACK LABEL image and a red dot inlay on its back. Combining an exotic wooden bat and a high-tech shaft. This is a "function-first" high cost-performance playing cue!

The plain model is available in four woods: curly maple, rosewood, cocobolo, and black (painted maple black). The difference of each wood grain stands out because of the plain model.

Crown Billiard Gloves 10 color For Left Hand

js00033673

- Price : 2,000 JPY / 1 piece
- Cert. : -
- Category: Sports, Outdoor Items

This is an original glove that has been produced in thorough pursuit of functionality and durability. The material used is a highly elastic fabric, and special sewing is used to prevent fraying and tearing of the fingers, which has been a common problem with billiard gloves in the past, and to ensure higher durability.

The inside of the index finger, which comes in contact with the shaft, is sewn in such a way that the seam does not protrude, reducing discomfort during strokes. The palm side is extensively mesh processed to minimize moisture inside the glove.

We are a joinery company that founded in Tonami city, Toyama in 1933 and this year marks the 89th. A technique of wooden fittings was introduced into Japan during the Asuka period (538-710 A.D.). One of architectures that symbolizes the era is Horyuji Temple. A decorative art for the temple is called "Kumiko-Zaiku" and it has a long tradition. Kumiko-Zaiku is the best Japanese woodwork technique that shave thin pieces of wood at the precision level (see more...)

Enju Auspicious Kumiko Panel

js00029174

- Price : 36,000JPY / 518 piece
- Cert. : -
- Category: Display Supplies

A "Engi Kumiko ENJU" series is our new brand for your interior design that was born from the technique of wooden fittings with our history of 89 years. Kumiko is traditional techniques using for Japanese wooden joinery decoration such as a "Fusuma", "sho-ji" and "Ranma". This is precise and beautiful industrial arts that create the various geometric design by putting thin woods together without using nails. These geometric patterns have auspicious meanings like amulet and prayer. We make products of bright a living space while people enjoy Japanese culture.

Hitohira

The Matsui Silk Company is the only remaining traditional silk fabric manufacturer in the prefecture of Toyama. Since 1877, its factory has been located in the once renowned silk town of Jouhana. Matsui Silk Co. specializes in shike-silk fabrics, made from an irregular fibre only a certain type of twin cocoons can deliver. The shike-silk is mainly used to decorate traditional sliding doors. With changing lifestyles, the demand for the product is waning. (see more...)

beauty fece mask

js00024252

- Price : 1,800JPY / 1 piece
- Cert. : -
- Category: Medical Supplies, Medical Hygiene Supplies, First Aid Supplies

A comfortable mask that makes you forget you're wearing it. You can use it comfortably even if you wear it for a long time, and you can expect natural deodorant and antibacterial effects. The calm luster illuminates your skin beautifully and makes the person wearing the mask look more beautiful like a kimono. Since it also contains cotton, men can feel free to use it without the silky luster. The inside of the mask is made of a traditional "woven gauze" weaving at Johana, Nanto City, Toyama Prefecture.

Botanical dyed stole

js00024255

- Price : 25,000JPY / 1 piece
- Cert. : -
- Category: Fashion Accessories

This is a stole made by dyeing Shike silk woven in Toyama Prefecture using plants from the Toyama region. Although it is a natural dye, it is specially processed to prevent color fading and reproduce natural vivid colors. The craftsman weaves using a miracle thread made by two silkworms together so that the surface of the fabric has a natural texture. Despite the extremely thin and light fabric, it has excellent heat retention, and the gentle luster of Shike silk will wrap you up.

eye mask

js00028912

- Price : 4,500JPY / 10 piece
- Cert. : -
- Category: Bedding

Silk has excellent humidity control properties, so it protects your skin from drying out in dry places and prevents stuffiness in humid places, allowing you to sleep comfortably.

The soft, enveloping feel of silk relaxes the body and mind, and the warmth of the fabric soothes tired eyes that are overworked from working at home.

Since its establishment in 1938 (Showa 13), our company has undergone a transition to flower utensils and tea utensils for 80 years. We have been selling tea utensils that make the best use of the characteristics of metal by making the best use of the strength of the production area of Takaoka copperware, mainly at tea utensils stores all over the country. This time, we are proposing a box garden-sized famous castle series as a heavy souvenir for adults. (see more...)

Clothesline, Stand

Founded in 1916, Nousaku is based in Takaoka, Japan. Takaoka city is famous for metal casting in Japan since the 17th century. Originally a manufacturer of Buddhist altar goods and traditional Japanese tea sets, Nousaku now makes beautiful home goods using techniques passed down through generations. Every Nousaku product is handmade, hand cast and hand finished with exceptional care which brings out unique variations in each piece. By making use (see more...)

Candle Holder - Seven Beads

js00011782

- Price : 13,600JPY / 183 g
- Cert. : -
- Category: Light, Candle

Seven Breads Candle Holder is made from solid brass. Each piece is handmade, hand casted and hand finished by techniques passed down over 400 years. A special coloring treatment is applied to each piece resulting in a stunning color that is subtle and unique. Available in Golden Brown and Blackish Brown.

Incense Burner Set Round Brass

js00011783

- Price : 5,500JPY / 185 g
- Cert. : -
- Category: Aroma Fragrance, Deodorant

The Round incense stand is made from solid brass. Each piece is handmade, hand casted and hand finished by techniques passed down over 400 years. The brass is uncolored and left in its original form so that the color will change and patina over time. This incense holder was designed for use with traditional Japanese incense sticks, which are usually 2.3mm Dia x 70mm long. Other incense sticks may not be fully supported.

Time Bell Candle

js00011784

- Price : 10,000JPY / 312 g
- Cert. : -
- Category: Light, Candle

The Time Bell Candle set is made from solid brass. Each piece is handmade, hand casted, and hand finished by techniques passed down over 400 years. Each set includes 2 beeswax candles, 3 brass pins, a brass candle holder dish and a candle chipper to remove wax from the dish after each burn. Simply insert the brass pins into the candle, as the candle melts the pins will fall into the brass plate creating a clear and soothing sound which is perfect for evening meditation.

13 | OTERA-KOHACHIRO-SHOTEN

Takaoka-City, with its 400-year history, has avoided the ravages of war and still retains the old-time atmosphere of the Edo period. Since the first Kohachiro opened a metal casting workshop in 1860, Otera Kohachiro Shoten has been associated with Takaoka Bronzeware present, we have opened our house up the public with manufactures 'and wholesalers 'goods set up as a gallery.

The power of the WALKING FLOOR(R) can move 35 tons of load.

We have our unique technologies, and manufacture and sell substrate peeling machines (Eco Collector), separators and shredders (Eco-Separates), cutting machines (Eco-Cutter, Eco-Loop Cutter), and shredders (Roller Mill). We are a manufacturing company that consistently deals with everything from proposals to our customers to purchasing steel materials, processing and painting of steel material using our own machine tools, and installation. (see more...)

Cutting Machine (Eco-Cutter)

js00007121

- Price : 14,000,000 JPY / 1 unit
- Cert. : -
- Category: Others

The Eco-Cutter is equipment that can cut difficult-to-cut materials, such as aramid fibers (fibers used for bulletproof vests), using our unique technologies. In addition, since the cross section is not easily crushed due to its sharp cutting performance, it is possible to recycle it in a high-value state by taking out the contents of the objects to be cut.

<Features>

- Four portions of each blade can be used, and the surfaces can be polished individually, so the structure allows reduction of the cost for blade replacement.

IoT Module (IoT Technology)
