ジェトロニューヨーク事務所では、米国・ボストンに拠点を置き、海洋関連のスタートアップ支援を行っているSeaAhead とのタイアップ企画として、海洋関連のデジタルソリューションをもつ"Bluetech"スタートアップに焦点を当てたウェビナーを開催します。

JETRO hosts Blue-Tech Digital Solutions Webinar with SeaAhead and CIC

In partnering with JETRO, SeaAhead, a startup accelerator based in Boston that focuses on marine-related ventures, recently introduced a group of 'Bluetech' startups to showcase their digital solutions related to the ocean. The webinar featured a keynote address by Tim Rowe, Founder and CEO of CIC, a global leader in startup innovation.

The event focused on five Bluetech startups and aimed to promote their digital solutions while providing an opportunity for Japanese companies to learn more about the marine industry. The startups featured in the webinar presented their innovative solutions that ranged from marine energy production to sustainable aquaculture and ocean data collection.

Through this J-Bridge partnership, SeaAhead aims to support and promote startups that can make a positive impact on the ocean environment. By highlighting the innovative work of these startups, the partnership hopes to inspire more entrepreneurs to focus on developing sustainable solutions for the ocean.

The webinar was well-received, and participants praised the event for its focus on promoting the development of digital solutions for the marine industry. This successful partnership between SeaAhead and JETRO highlights the importance of collaboration and innovation in creating a sustainable future for the ocean.
